

In the United States District Court for the District of Nevada

Red Rock and Silver Springs Water Companies *et al* v. Alka 65 Restore and Hydrate Electrolytes
Bottled in Las Vegas HA-1-5-26

By Anthony J. Sanders
Hospitals & Asylums

Appellation of origin of Alka 65 Restore and Hydrate Electrolyte 1.5 L bottles is needed to redress contamination with *E. coli* Shigella neurotoxin after Las Vegas tap-water was “purified” with grocery store caliber reverse osmosis filtration. The alkalinity tastes good and temporarily masks the flavor. However, the Shigella neurotoxin in the Las Vegas, Nevada tap-water, passes through the filter to intoxicate senility, with a minimum of insomnia, and constipation, to confuse the otherwise inalienable human right to a solid stool. Because a reverse osmosis filter cannot sufficiently purify the intoxicating Las Vegas tap-water Alka 65, and Court bailiff drink, the bottler of Alka 65, and warden must be held responsible to either test nearby Silver Springs Water and Red Rock Springs Water, or invest in expensive “vapor distilled” technology to add electrolytes to taste, to procure potable drinking, coffee and cooking water pursuant to the Safe Drinking Water Act of 1974 land grant under 28USC§1354. It is held, sellers of reverse osmosis filtered “purified” water must advertise their prudent selection of a natural source 42USC§300g(3).

Sanders, Tony J. *Santa Fe to Taos Trail; Bottled Sangre de Cristo v. Gallon of Kroger Alkaline 9.5 pH Water*. Hospitals & Asylums [HA-29-4-26](#)

Alka 65 Restore and Hydrate Electrolyte 1.5 L bottles are presumed to be contaminated with *E. coli* Shigella neurotoxin after Las Vegas tap-water was treated with grocery store caliber reverse osmosis. The alkalinity tastes good and temporarily masks the flavor. However, the Shigella neurotoxin passes through the filter to intoxicate senility, with a minimum of insomnia, and constipation on the otherwise inalienable human right to a solid stool. Because a reverse osmosis filter cannot sufficiently purify the intoxicating Las Vegas tapwater Alka 65, and Court bailiff drink, a quick online appellation of origin holds the bottler of Alka 65, and warden responsible to either test nearby Silver Springs Water and Red Rock Springs Water, or invest in expensive vapor distillation technology to add electrolytes to taste, for consumption of potable drinking, coffee and cooking water with reverse osmosis filtration pursuant to a land grant under 28USC§1354.

It is held, sellers of reverse osmosis filtered bottled water must advertise their prudent selection of a natural source like Pure Life, marketed by Bluetriton Brands, Inc. from Stamford, CT advertises their Source: Deep Protected Wells in, Hawkins, TX pursuant to the Safe Drinking Water Act of 1974 42USC§300f *et seq*, read for the first time in *Santa Fe to Taos Trail; Bottled Sangre de Cristo v. Gallon of Kroger Alkaline 9.5 pH Water* [HA-29-4-26](#) that held: To sell their tasty, but diarrheal, gallon of water pursuant to the first reading of the Safe Drinking Water Act of 1974 under 42USC§300g(3) Kroger is ordered to either change the presumed source of their reverse osmosis and chemical treated water from the Ohio River to the Great Miami Buried Valley Aquifer or invest in expensive vapor distillation desalination technology pursuant to the same land grants from different states jurisdiction New Mexico seeks to bottle the Sangre de Cristo for sale to Rio Grande valley households, cafes,

restaurants and grocery stores under 28USC§1354.
