

In the United States District Court for the District of Utah

Bluehost v. Central Utah Completion Project HA-4-8-26

By Anthony J. Sanders
Hospitals & Asylums
Former Bluehost customer

I am asking Bluehost to refund me a total of \$618.18 for both \$465.08 early termination of \$727.82 three-year word press and hosting contract beginning 7/28/25 and \$153.10 for Malware Scan and Clean dated 7/27/26 to hold Bluehost billing warranty of title and against infringement; buyer's obligation against infringement §2-312 Uniform Commercial Code harmless. For speedy settlement in August 2026, I willing to accept the exact maximum sum of \$500 recovery of civil damages authorized under 18USC§2520.

1. \$500 or \$618.18 Warranty

I am asking Bluehost to refund me a total of \$618.18 for both \$465.08 for early termination of \$727.82 three-year word press and hosting contract beginning 7/28/25 and \$153.10 for Malware Scan and Clean dated 7/27/26. I am not charging for the fake \$153.10 Malware Scan and Clean dated 11/14/24, that actually refers to either the \$153.10 Word Press and Hosting fee 7/28/2024 or \$36.17 domain name 11/16/2024 in my more credible financial records.

For speedy settlement in August 2026, I willing to accept the exact maximum sum of \$500 recovery of civil damages authorized under 18USC§2520. The billing fraud composed of both fake email bills threatening domain name termination from day one, discredited by Bluehost chat and novel Malware Scan and Clean infringement of billing records, that went through, at least once, are downright criminal, and may cost the Court up to \$250,000 in fines to correct Bluehost billing under 42USC§1320d-6, to better hold harmless Bluehost customer warranty of title and against infringement; buyer's obligation against infringement §2-312 Uniform Commercial Code.

To protect my website and accounting it holds, I am obligated to get my authorization number and close my Bluehost account early, 8/26, after only one year and one month, 36.1 percent of a \$727.82 three-year word press and hosting pre-payment on 7/28/25, due to infringement of Bluehost billing by (1) Malware Scan and Clean July 2026 and (2) fake email bills with Bluehost logos and my personally identifying, but not price, information, discredited by Bluehost chat, that was not effective at stopping sending these fake bills, with Bluehost logo, but alien email address when investigated, threatening my domain name, to my webhost email address.

(1) Malware Scan and Clean \$153.10 on 7/27/26, that seems to have falsified the billing record to remove the original payment, and alter the word press and hosting payment of \$153.10 on 07/28/25 to appear as though it was the terminally fraudulent biannual Malware Scan and Clean bill when the 2025 bill was in fact for one year of word press and hosting; due to the medical language and malicious destruction of Microsoft Office 2019 license, the fraudulent entries and statements generally 18USC§1001 can be neatly fined \$250,000 for malicious corruption of my Microsoft Office license, rather than \$100,000 for false pretense pursuant to 42USC§1320d-6 but so far we have not heard any of those tech company market capitalization overestimates that enrage insurance 18USC§1033, or even been able to sustain any artificial intelligence online describing Bluehost, Utah Mormon crook during wartime 18USC§2388, concealing Utah data centers and business 18USC§2071, to justify anything more than a civil settlement for my two year overpayment of word press and hosting, ie. \$2 trillion Space-X IPO (2026 checked by SEC), \$4 trillion Google (BC),

(2) fake email bills with Bluehost logos and my personally identifying information generally, from private European email addresses that have been discredited by Bluehost chat, threatening the warranty of title (domain name/ fake price) and against infringement; buyer's obligation against infringement (with prejudice against the Mormon crooks in Utah) under 2-312 of the Uniform Commercial Code.

2. Bluehost Online Scam Center Diagnosis and Treatment

Besides relocating their billing address from the Mormon crook in time of war state of Utah, to one of their many other less incriminating locations, I advise Bluehost email customers, with a responsible email address, to inform them - Due to a recent report of an isolated case of hacking of Bluehost webhost account billing records in summer of 2026, to prevent any more online scams from going through and hopefully stop the chronic onslaught of fake email bills with Bluehost logos once and for all, and better keep your business, Bluehost billing is to be reduced to the "bill" consolidating essential programs (1) word press and hosting and (2) domain name. The cost to consumers will either remain the same or go down if they fell for any of the extra protection money, that is so un-American, a material deficiency of internal control. In general, due to the mutilation of billing records, Bluehost consumer billing records must be overruled by consumer financial transaction records. Other, frivolous billing programs, privacy protection and extra-backup, that hasn't been billed and doesn't seem to work in this case, and malware scan that criminally infringed and damaged Microsoft Office license, will be deleted. To prevent extortion and excessive duplication, backup and privacy protection, and even domain name

should be included in the usual word press and hosting bill that could be called the bluehost "bill". This would mean Bluehost would be obligated to backup all data without billing people extra, and also it would be good judgment to provide all customers the privacy protection of the Bluehost mailing address, (whether or not it is in Utah) so their personal address is not exposed to ICANN, who, like Bluehost, should better treasure the email address. For free it seems webhost privacy protection only obfuscates ownership name reporting to WHOIS and does not defend against the email-less ICANN infringement on personal real estate.

Fake bills far outnumber Bluehost's bon fide do not respond emails. Bluehost must make an effort to prohibit the infringement of their trademark to protect their workers and their customers against the novel threat of online scam centers (operating in Utah under the malicious influence of disqualified Interior Secretary Doug Burgum Windows 8 Software Engineer. 18USC§2071. Bluehost may be infringed by an online scam center in the United States whose billing practices may be so abusive the forced labor qualify for domestic or international human trafficking protection and relocation by the International Organization on Migration (IOM). Or, what I believe, Bluehost is dominated by stereotypical Mormon crooks in the unaccountable, overestimated tech industry, extra-pardoned by a Republican President who massively s-nukes American casualty insurance 18USC§1033, §2388 and to acknowledge unauthorized military damages he has caused far exceeds his net worth needs disgorge all his campaign contributions, although the Federal Election Commission campaign contribution database may be as whited out as the Board membership. the General Fund 18USC§603.

UN News reported that International Organization on Migration (IOM) seeing victims from over 80 different countries being trafficked into the scam centers, especially playing across Asia. Recruiters, posing as armed customs officers intercepting international travelers as they cross an international border, or issuing tourist rather than work visas, target people who speak English well and often hold degrees. They take their passports away and force them to work off their arbitrary debt by extorting money from customers of these online scam centers. Forced online scams: IOM warns trafficking networks are booming. UN News. 28July 2026. After Trafficking in Myanmar, Jean Rebuilds His Life in Rwanda. International Organization on Migration (IOM) 29 July 2026. A friend's elderly British-American father was scammed out of thousands of dollars for sympathizing with an Asian trafficking victim before the concern of his heirs brought this issue to the attention of UN News earlier in the year before the troublesome United States District Court for the Southern District of New York successfully applied extra-territorial jurisdiction over an Asian scam center under 18USC§3042 after their fake drug allegations failed to justify pre-trial detention for the speedy sentencing of the International Criminal Court for the protection of Venezuelan Civil Rights and Elective Franchise 28USC§1343 in United States v. Nicolas and Cilia Maduro HA-3-1-26, [HA-6-1-26](#).

3. Decision-making on Appeal of Roundcube Webmail Degradation

I have decided to get a new webhost and sue for the remainder of the three year contract Bluehost extorted, incidental to, for instance, Jeff Bezos's American Express Serve block denial of service attack, still ongoing under my name, although Serve is no more. Reason being warranty of title and against infringement is the obligation of the buyer to hold harmless, of

embezzlement, nuclear terrorism in Colombia, etc. under 2-312 of the Uniform Commercial Code.

The fake "bluehost.com" bills, are now hardwired email address, although "bluehost.com" is not an email address. The untimely and unsupported bills threatening to terminate my domain name, cannot be investigated and dismissed because the email come from a private European email address. I'll be back later this week to find out if Bluehost is going to refund the money they are not worth due, to third party infringement, with Burgum embezzling material deficiencies of internal control.

Bluehost billing does not record my initial bill on August 12, 2022. I had to check my American Express Serve account before the defunct financial product goes offline. August 2022 was misfiled in July 2022. The American Express Serve "express" warranties by affirmation, promise, description, sample went smoothly pursuant to §2-313 Uniform Commercial Code and Planned Obsolescence of the One Big Beautiful Bill Act [HA-1-6-25](#) was flawless.

I am writing to dismiss the biannual \$153.10 Bluehost Malware Scan and Clean with prejudice and Domain Privacy + Protection without having been credibly billed or protected against ICANN address disclosure with their representative web-host address. The email format has been changed for the occasion. Bluehost is essentially incommunicado, with AI "port blocking" more and more of their computer science insufficient human intelligence. The Court and DHS Cybersecurity and Infrastructure Protection Agency (CISA) are sought to bridge the First Amendment right by accepting my involuntary payments to and damages caused by Bluehost parasite, as civil filing fee. Non-Utah Bluehost headquarter review of Mormon crooks in Utah is sought.

Bluehost opportunistically billed me \$727.82 for three years of Word Press Plus Hosting incidental to the termination of American Express Serve, fine. It has subsequently become apparent that their other bills, aside from the annual \$36.2 Domain Name bill, are frivolous at best.

I previously discontinued my chat with AI while hiking in a bug storm, Burgum seems to think his electronic bugs, remote access, etc. are so profound about, but are actually the worst green-horn ever, the cause of racial suicide emailing tribal government email and so many more federal arson bugs listed in the fines and forfeitures of An Act Supplementing appropriations fiscal years 2017-2027, I wrote: I want to discontinue payment for malware scan and pay only either Codeguard Basic or Xcitium Backup. The auto-renew function is jammed on. Codeguard Basic check box is gray. (On my Mac the renew buttons worked and information is that Codeguard Basic is changing to Xcitium Backup). The case against Malware Scan and Clean follows:

Microsoft Office 2019 is not malware and I fine the Mormon crooks in Utah \$200 for Office 2024, incidental to their July 26, 2026 auto-renew, and many other fake blue host bills, using

European email addresses, in addition to the \$360.2 the Provo Utah bill embezzled, Bluehost's Mormon crooks, may have stolen enough to justify this civil filing in the US District Court.

I will publish and serve you with a more formal brief later this week when I am staying with my computer scientist friend, to accompany a brief on my other personal Deposit Insurance Fund business, bluehost phishing so distinctly resembles (Burgum's FDIC Windows 8 for email). Bluehost frauds alone, not including what is evidently their wanton destruction of my Microsoft Office license, have consumed more than three full computer working days of time this summer. I am tired of the third party infringement of their bills. I do not like their fake bill concealing new Russian email format, or disability to convert back to the original unfringed Roundcube email format named Larry. The primary reason for deciding to terminate the bluehost contract, is that the billing errors present such a material deficiency of internal control Bluehost seems to have been seized by Burgum Windows 8 software engineer, via the dominant Mormon crooks in Utah, to try and embezzle me like the Interior Department, to psychologically torture me and obstruct any work this summer recess, with sadistic permission of the cyber-stalking tweaker of the House from Louisiana, Burgum client and unjust censure.

Due to them wasting my time, it is up to you to urgently fine Trump personal income another \$100 million to stop "port blocking" Iran and of course stop stealing Venezuelan oil nuking Venezuela, Colombia and littering the Mediterranean and Ecuador pacific coast with hydrocarbon heating pumps burning stolen petroleum aka, El Nino 15USC1 and In re: Certain Iranian Assets (Islamic Republic of Iran v. United States of America); \$80 billion Unlawful Sanction Theft Bond effective Oct. 1, 2026. International Court of Justice. Hospitals & Asylums [HA-15-7-26](#)

4. Original Mormon Crook

The case is that Interior Secretary Doug Burgum is the Windows 8 Software Engineer who in Utah is particularly forfeit his beloved \$28 million FY 27 Utah Completion Project draining the Great Salt Lake. Vote to terminate the Central Utah Completion Act Oct. 1, 2026 for \$0 FY 27: \$21 million FY 17; \$19 million FY 18; \$22 million FY 19; \$31 million FY 20; \$31 million FY 21; \$28 million FY 22; \$27 million FY 23; \$26 million FY 24; \$26 million FY 25; \$27 million FY 26 pursuant to 2CFR411.2(26) of the President's Budget for Fiscal Year 2017-2027; An Act To change the name of the Department of Homeland Security (DHS) to United States Customs (USC), Court of International Trade of the United States (COITUS) to Customs Court (CC), and amend Title 22 of the United States Code Foreign Relations and Intercourse (a-FRaI-d) to Foreign Relations (FR-ee) [HA-2-2-26](#) and Interior Department FY 17 - FY 26 HA-10-10-25, HA-16-10-25, HA-7-11-25, HA-10-11-25, [HA-2-12-25](#).

United States v. Doug and Kathryn (Epstein blonde?) Burgum Windows 8 Software Engineer – Removed from federal office and sentenced to probation and fined more than \$1 billion, to avoid more than five years in prison for treason if not immediately vacated before the 2026 midterm elections, leaving the couple recreational multi-millionaires, divested of Microsoft or other stock

vulnerable to corporate manipulation, eg. Cocaine addiction labor budget cut, block, and phish snorting strategy, and any active business or for-profit employment ventures. I had to pay \$179.99 for new Microsoft Office software + taxes and \$9 legal fees, for a \$200 hour, that took three days to fix, incidental to a bank app block and phishing attempt. Support for Microsoft Office 2019 on Mac ended October 10, 2023. I don't want support or updates, nor do I want to erase the data on my phone to get rid of the iphone unavailable bug in the outdoors, that sometimes doodles stupid messages and burdens uniformed police officers. Malicious, but not quite the quite potentially lethal human trafficking police cell-phone reboot with Burgum fentanyl burger support, and email block, accompanying Burgum's initial seizure of the Interior Department emails. It is a breach of contract that my lifetime Microsoft Office 2019 purchase should have been corrupted by the Windows 8 Software Engineer, whose unjust billion(s) was made tampering with (Microsoft) consumer products 18USC§1365 by (Great Plains) stalking 18USC§2261A and lost mostly due to disqualification of concealed record mutilators to hold public office 18USC§2071, treason 18USC§2381, war crime 18USC§2441 and embezzlement of the Interior Department 18USC§641 to the creditors of the United States, the Interior Department via the General Fund 18USC§914.

Utah Completion Project is slated for abolition FY 27 because the frivolous wetland project secretly drains the endangered Great Salt Lake. The State recognizing Interior Department payment category is a suspicious division from the Bureau of Reclamation and it is necessary to implicate the Utah Completion Project of draining the Great Salt Lake without sufficient public discussion. Taking this self-harming money from Mormon crooks is however a difficult task, for an Interior Secretary other than Burgum, whose bugs impede the recounting of the Office of Natural Resource Revenues (ONRR) mineral leasing row(s) and Interior Department Revenue table, Interior accounting went from a serious material deficiency of internal control with duplicate mineral payments floating around in the un-surplus calculated budget expenditures and revenues to a huge overestimate under legally sound Native American mathematically insolvent accounting 2020-2024 18USC§1033 and the Interior Department was then embezzled by the concealed Republican Windows 8 Software Engineer and his probably Epstein wife, Microsoft billionaires. ONRR cannot be worked by the SSA Actuary and myself, until Burgum is removed from office, placed on probation, relieved of his ill-gotten billion(s) and ONRR staff are prosecuted for Burgum conspiracy, especially email block by Interior Department spam from third party surveillance, with an i-cloud phisher Burgum fentanyl burger murder attempt by an ubiquitous (not dissimilar to Utah) police protected meth manufacturing facility in North Dakota, where he was governor, who didn't legalize recreational marijuana, and any other criminal activity so the SSA Actuary and myself can guide those currently held incommunicado by Burgum bugs, who appealed their conviction for the President's kill the foreigner, and appeal must be denied Windows 8 software engineer scum, to fill in the blanks regarding Interior Department Revenues in Part 411 2CFR411.2 (internal hyperlink broken, navigate by code, copy and paste chapter to blank for ONRR to fill in the blanks in the Interior budget revenue table) [HA-2-2-26](#)

Know everything, but how to charge Trump with 18 more \$100 million fines for restraint of

trade Sanders, Tony J. An Act Supplementing appropriations for the fiscal years 2017-2027 [HA-16-7-26](#)

Non-Utah representation is sought from Bluehost headquarters to discuss infiltration by Mormon Malware Scan and Clean crooks charging \$153.10 biannually in Utah. During the bluehost "port block" non-fluency, I was so frustrated I was going to get a new webhost, despite their \$700 three year thing, but Utah was removed from their AI list of data centers, and the Court relieved the bluehost "port block", so my prejudice against Utah and Mormons could not be acquitted.

The thing is that in my experience living in Utah for one year culminating in the 2010 Haiti quake by torturing wrongfully divorcing National Guard male nurse (Utah torture suspect) roommate who left for a week for "hospital construction in the Caribbean" and wired the nuclear bomb to the prison ID of his torture victim he falsely imprisoned and had already been released from Utah Prison, whose room I moved into, the deadliest single day casualty count in world history, Mormons are more deadly in one day than Jews since the birth of Christ, not including the World War incitement. The male nurse had already been evicted and sent to his wife to serve his sentence to the ball and chain. Real federal probation is necessary to reign in Burgum's warranty saboteurs. Email consultation with Utah's National Parks could get the Utah Completion Project abolished as soon as Oct. 1, 2026 FY 27.

Whereas Utah National Guard is held responsible for mining the 2010 Haiti quake, the highest single casualty count in history, and most expensive outstanding claim for damage by the United States to any nation due to partial payment of Iraq; General Fund Reparation [HA-30-7-26](#) is updated and included herein for emphasis HA-12-8-26. As of the Columbia quake on August 10, 2026 at least eighteen nations are believed to be due a total of \$275 billion compensation for casualty and property damage caused by the conventional, nuclear and unconventional arsenal of the President of the United States (POTUS). Beneficiaries: (1) Afghanistan \$485 million; (2) China \$441 million; (3) Columbia \$500 million; (4) Haiti \$103,322 million; (5) Iraq \$82,000 million; (6) Iran \$25,000 million; (7) Japan \$10,000 million; (8) Libya \$237 million; (9) Morocco \$2,543 million; (10) Myanmar \$11,000; (11) Pakistan \$128 million; (12) Palestine \$10,000 million; (13) Philippines \$500 million; (14) Syria \$3,245 million; (15) Taiwan \$6 million; (16) Turkey \$14,291 million; (17) Ukraine \$10,000 million; (18) Venezuela \$11,487 million.

App. A Bona fide Bluehost Financial Institution Transactions

Besides being disqualified to hold office, due to concealment or removal of the initial \$592.14 payment(s) from my account Bluehost billing record, the record of orders contains erroneous entries and statements generally, and must be overruled by review of my financial transactions.

App. D Hostinger Discount Price Correction Inflation Proposal

I found your email address. I cannot find Bluehost's. Email is so vulnerable to port block these exposures to daylight. I hope Bcc keeps the Court sufficiently secret. Bluehost's Roundcube webmail has recently been degraded by AJAX applet just when their billing became so intolerable I decided to breach our three year contract and go with Hostinger.

I hope the domain transfer goes through quickly. I need to be able to upload Microsoft Office files to my website and access my email using Hostinger instead of Bluehost by the end of the work week, to put an end these delays, once and for all.

I pray I can negotiate with Hostinger for one reasonable annual fee of \$59.88 (2026) for a Business webhosting and domain with all the frills, except I want my name on WHOIS, not my real address on ICANN, if possible. I usually allow up to 3 percent annual inflation in these types of annual contracts. \$13.19 domain transfer (one time payment) + \$59.88 all inclusive business webhost = \$73.07 (2026-2027). After the hefty introductory discount the renewal fee for all inclusive business webhosting and domain name quoted at \$203.88 (2027-2028); and with three percent inflation would be \$210.00 (2028-2029); etc.

The reason the Court gets the privilege to warranty the refund of another multi-year web-hosting obligation today, is that I accidentally paid Hostinger for both a one-year business plan until 2027 and a multi-year obligation until 2030 because I was tricked by temporarily blocked payments to temptation. Please refund the 48 month business plan pursuant to the Hostinger 30 day refund policy of Express warranties by affirmation, promise, description, sample 2-313 Uniform Commercial Code.

The Hostinger multi-year obligation is duplicate of the one year business plan and paying for both is neither financially prudent nor mathematically valid. Falling for the multi-year obligation ultimately compounded the material deficiency of internal control regarding Bluehost billing to such a degree that I chose to migrate my website to most highly recommended online Hostinger, in the first place.

"Consistent annual reporting" is required by Audit Standard No. 6 Evaluating Consistency of Financial Statement by the Public Company Accounting Oversight Board (2008) to avoid the pitfalls of Rule 66 of the International Public Sector Standards Board Handbook of International Public Sector Accounting Pronouncements 2022 Edition Vol. I. Financial statements shall be presented at least annually. When an entity's reporting date changes and the annual statements are presented for a period longer or shorter than one year, an entity shall disclose, in addition to the period covered by the financial statements: (a) The reason for using a longer or shorter period; and (b) The fact that comparative amounts for certain statements such as the statement of financial performance statement of changes in net assets/equity, cash flow statement, and related notes are not entirely comparable.

For the sake of consistent annual reporting of a fair market price, and a secure future, I am happy to offer to pay 97 percent of the \$203.88 (2027-2028) business webhosting all in one price, as the introductory business webhosting price of \$97.76 (2026-2027) plus the \$13.19 one time domain transfer fee that isn't confused by auto-renewals or a bleak future subject to attrition due to consumer price inflation, for a total initial bill of \$210.95 (2026-2027). Whether Hostinger opts

for your discount price on the one year business webhosting plan or my sustainable 3 percent inflation proposal, is up to your honor. I pray I am done editing this brief.
