

In the United States District Court for the District of North Dakota

United States v. Doug and Kathryn Burgum HA-31-8-26

By Anthony J. Sanders
Hospitals & Asylums
Public Trustee applicant

Doug Burgum is charged with fraud and related activities in connection with computers 18USC§1030. The sentence, for using the Interior Department headquarters as his online scam center, is up to twenty years, due to the prior, is commuted to probation to swiftly remove the pirate from federal office and pay restitution 18USC§3563(6). US Trustee shall help account for the consistent annual reporting of the Office of Natural Resource Revenues (ONRR) 11USC§704(a)(2) and forfeiture of Burgum's billion(s) 43USC§1735; Private trustee may pay Windows 8 software engineer level IV executive salary with \$5 million assets 28USC§586(e).

U.S. Senator Lindsey Graham (1955–2026)

Dear Cybersecurity and Infrastructure Security Agency:

1. Fraud and related activity in connection with computers

To duly process the cyber-stalking, desktop surveillance and access devices emanating from the District of Columbia to other mosquito infested public lands, especially along the northern border, it is convenient for the United States to charge Doug Burgum, Windows 8 software engineer, with fraud and related activities in connection with computers 18USC§1030. The sentence is up to twenty years due to concealment of Burgum's Windows 8 prior by and/or from the President and Senate and to equate with the sentence for tampering with public water system 42USC§300i and torture - internet port block torture of public land visitors and District of Columbia petitioners, to foment Iran protests and silence the settling of the s-nuke attack on Venezuela 18USC§2340A, to invoke (possibly hacked) §1030(a)(1) accessory to presidential piracy, more than five years for treason 18USC§2381. Section 216 of the E-Government Act of 2002 44USC§3501(8) ensure that the creation, collection, maintenance, use, dissemination, and disposition of information by or for the Federal Government is consistent with applicable laws, including laws relating to—(A) privacy and confidentiality, including section 552a of title 5; (B) security of information, including section 11332 of title 40 (repealed); and (C) access to information, including section 552 of title 5 under 43USC§776(b)(4)(A)(i).

The search and destruction of malicious software and access devices at the Interior Department online scam center headquarters in Washington DC and Burgum personal computers, goes to Cybersecurity Infrastructure Security Agency (CISA) pursuant to Rule 41 Fed. Crim. P. Idly referenced enforcement officers, like the Secret Service, FBI, Attorney General and Treasury Secretary, whether morbidly obese cardiotoxic cyber-stalker or port blocked homosexual, Controlled Substances Act forfeiture, must be alleged defendants, 18USC§1030(d),(h),(i)(2). Burgum is thought to be too intellectually disabled (ID) to do anything but the computer crime he always projects, and the greenhorn is not so horribly suspect of being the defendant Secretary in the Interior statute he has never read, only the data center proposals would seem to be his true crime 42USC§300i. Forfeiture of Burgum's billion(s) is to the Interior Department (ID) 43USC§1735. However, the ID is cyber-pyro-violently incommunicado, in whole or in part because of Burgum's bugs, especially the tribal racial suicide, forest service arson and now

national government Windows 8 email block stalking, except for the many National Parks and presumably the National Park Foundation. How many millions, \$5-\$500, the Burgum couple gets to keep for their retirement is up to your ONRR (Office of Natural Resource Revenues) pursuant to suspension pending appeal and bonding 30 CFR Part 1243.

To bridge communication with ID and the National Capital Region 36CFR§7.96 although thoroughly captured by dread, port blocking, pirate Burgum, the United States trustee program is sought to take responsibility under 28USC§586. The United States Trustees, from all Districts, especially the District of Columbia, are sought to secure consistent annual accounting for ONRR pursuant to Chapter 7 11USC§704(a)(2). The United States Trustee must also appoint a private trustee to pay Burgum's ill-gotten billion(s) to the ID, for permanent appropriations robbed, instead of infinite number of vulnerable computer crime victims whose Chapter 11, 12 and 13 debt to online and offline intellectual disability and data center proposals amount to Republican wastewater discharge 11USC§727. ONRR, usually accused of not bearing the consistent annual reporting burden of proof, has proven beyond a shadow of doubt I, the Public Trustee applicant, have failed to accurately account for either ID revenues or mineral leasing payment to States inclusive budget authority in Part 411 of the President's Budget [HA-2-2-26](#), whose budget authority can be updated to include Payments to States in a separate row, independent of the corrupted Secretary, but cannot upgrade to consistent annual revenue reporting pursuant to Audit Standard No. 6 Evaluating Consistency of Financial Statement by the Public Company Accounting Oversight Board (2008) and 11USC§704(a)(2).

Windows 8 Warranty of (public land) title and against infringement; buyer's obligation against infringement §2-312 Uniform Commercial Code may be tried by any Apple computer purchasing United States District Court to redress the escalating cyber-retaliation of the District of Columbia whose tiny black stalking devices planted at capital security check-points are friendly and harmless majority-minority, but disqualifying them to search the Interior Department and Burgum for the damaging stalking and access devices that have expensively corrupted stalking tweaker Johnson's national capital 28USC§1343. The United States District Court for the District of North Dakota is especially obligated to recall the domestic violence and piracy of their former governor to excuse their current email port block (at least from my email, they once healed when blocked conducting a background check of the Interior Secretary from North Dakota, also Maryland). The Department of Homeland Security Cybersecurity and Infrastructure Security Administration (CISA) may be warranted by any District Court to search the Interior Department headquarters and Doug and Kathryn Burgum and seize for destruction any malicious stalking, desktop surveillance, law hacking, access devices and programs pursuant to Rule 41 Fed. Crim. P. Before your honor can fully access Burgum financial accounts to pay restitution to the Interior Department, who Burgum stalkers may have personally embezzled layoffs and poorly accounted mineral leasing revenues, in behalf of too many victimized computer users to count, the billionaire couple must be removed from the Office of Interior Secretary and sentenced to probation on condition of restitution 18USC§3563(6).

The truth of the matter is Doug Burgum is the Windows 8 Software Engineer, a notorious pirate against the laws of nations under Art. I Sec. 8 Clause 10 of the US Constitution, is now a major war criminal 18USC§2441, psychological and physical, person and property dangerous stalker who must be restrained 18USC§2261A whose very ill-gotten Microsoft billion constitutes

treason 18USC§2381. Having theoretically caused more damage to computer hardware and mutilated more records than any other personality disorder in history, Doug Burgum is especially disqualified to hold federal office under 18USC§2071 or ever discharge his debt to computer users 11USC§727. Warranty of title and against infringement; buyer's obligation against infringement §2-312 Uniform Commercial Code.

In regards to the working conditions in online scam centers. UN News reported that International Organization on Migration (IOM) seeing victims from over 80 different countries being trafficked into the scam centers, especially playing across Asia. Recruiters, posing as armed customs officers intercepting international travelers as they cross an international border, or issuing tourist rather than work visas, target people who speak English well and often hold degrees. They take their passports away and force them to work off their arbitrary debt by extorting money from customers of these online scam centers. Forced online scams: IOM warns trafficking networks are booming. UN News. 28July 2026. After Trafficking in Myanmar, Jean Rebuilds His Life in Rwanda. International Organization on Migration (IOM) 29 July 2026. A friend's elderly British-American father was scammed out of thousands of dollars for sympathizing with an Asian trafficking victim before the concern of his heirs brought this issue to the attention of UN News earlier in the year before the troublesome United States District Court for the Southern District of New York successfully applied extra-territorial jurisdiction over an Asian scam center under 18USC§3042 after their fake drug allegations failed to justify pre-trial detention for the speedy sentencing of the International Criminal Court for the protection of Venezuelan Civil Rights and Elective Franchise 28USC§1343 in *United States v. Nicolas and Cilia Maduro* HA-3-1-26, [HA-6-1-26](#).

Having suffered Burgum to be their state governor, the United States District Court for the District of North Dakota, now suffering a lengthy email port block, and greatly embarrassed by Burgum's advocacy of the overthrow of the Interior Department government 18USC§2385 has become painfully aware that the Windows 8 software engineer is disqualified from holding federal office and cannot be Interior Secretary and should not have been governor of North Dakota under 18USC§2071. Burgum is unable and unwilling to discharge his Windows 8 debt to society 11USC§727. It is the duty of the District Court for the District of North Dakota to recall their former governor to remove the Windows 8 software engineer from power and pay compensation to the Interior Department, but not the infinite number of computer crime victims, who would be better protected against this terrible pirate, by the government, pursuant to Civil rights and elective franchise 28USC§1343 and United States trustee 28USC§586.

2. Cyber-entomology

Email port block of US Attorneys for the Districts of Maryland and North Dakota must be redressed. Department of Homeland Security Cybersecurity and Infrastructure Security Agency (CISA) is sought to serve the court, remedy the abridgement and provide professional testimony. The District of North Dakota healed the email block I contracted from the Interior Department postmaster incidental to the filing of Burgum's background check at the top of the Interior Department FY 17 - FY 26 [HA-2-12-25](#) codified for effect in Part 411 of the President's Budget President's Budget [HA-2-2-26](#). I now hope to do the same for theirs. These two important Burgum background check and arresting Districts, seem to have had their email ports blocked

incidental to *Bluehost v. Central Utah Completion Project in the District of Utah* [HA-4-8-26](#).

I was infringed after being conned into paying a multi-year obligation and was not only billed \$160 by Bluehost, but paid to have my Microsoft Office 2019 license destroyed, costing \$200 for Microsoft Office 2024 and had to get a new web host, because Mormon's are crooks and it is the obligation of the buyer to escape infringement. The Interior building, and capitol in the District of Columbia, including the Speaker of the House and District Court, is being used as Burgum's online scam center for sending out destructive viruses - stalking, attempting to steal, damaging petitioner property, tampering with online law and computer products, corrupting politicians, federal agencies and corporations while trying to embezzle permanent appropriations, all computer crime usury belabored in 18USC§1030. The \$28 million FY 27 vote to terminate funding for the Central Utah Completion Project wetlands, that secretly drain the Great Salt Lake, does not do Burgum justice. The tabloids want to know if both Melissa Holyoak US Attorney for the District of Utah and her appointing Attorney General Pam Bondi were flat chested blond Epstein hookers like Melania Trump and maybe Kathryn Burgum and E. Jean Carrol, the President is jerking around about her \$5.8 million rape settlement for which, non-payment, the Court should register the President in the sex offender register, not to mention the many Clinton rape-murders or An Act To change the name of the ...Court of International Trade of the United States (COITUS) to Customs Court (CC), and amend Title 22 of the United States Code Foreign Relations and Intercourse (a-FRaI-d) to Foreign Relations (FR-ee)?

The first burden of proof under 18USC§1030(a)(2) is that Burgum Windows 8 Software Engineer intentionally accesses a computer without authorization or exceeds authorized access, (by concealing from the public, President and Senate his prior conviction for concealment, removal and mutilation of records generally that is especially disqualifying of holding federal office 18USC§2071) and thereby (unlawfully) obtains— (A) information contained in a financial record of a financial institution, or of a card issuer as defined in section 1602(n) of title 15, or contained in a file of a consumer reporting agency on a consumer, as such terms are defined in the Fair Credit Reporting Act (15USC§1681 et seq.); (B) information from any department or agency of the United States (the Interior Department); or (C) information from any protected computer. Due process of unlawfully obtained evidence is to use it against Doug Burgum and his 6,500 Great Plains stalker robots from way back when, before Microsoft paid Burgum off for the permanent loss of a lot of expensive repeat customers to Apple, after Burgum's ICE-like stalkers repeatedly broke in the "back door" and sabotaged Windows 8 computers and files.

Essentially, the case against Doug Burgum, instantly triggered by submission of Interior Department Fiscal Year 2017-2026 [HA-10-10-25](#) is that although disqualified by Windows 8 conviction uncovered by his background check of the North Country Trail in North Dakota in fall of 2025, where he should not have never been allowed to be elected Governor, if he was to get away with his ill-gotten Microsoft billion, he has unlawfully obtained the headquarters of the U.S. Department of the Interior in the Stewart Lee Udall Department of the Interior Building, located at 1849 C Street NW, Washington, DC 20240, to be his "online scam center". Since taking office Burgum has knowingly caused the transmission of a program, information, code, or command, by the Interior Department postmaster, and as a result of such conduct, intentionally causes damage without authorization, to a protected computers in violation of 18USC§1030(5)(A). Inclosure of or assertion of right to public lands without title is prohibited in

43USC§1061. Under cover of email block and cellphone reboot by local human traffickers on the fringe of the police protected methamphetamine manufacturing facility, sends out stalkers for restraint under 18USC§2261A. Stalking is not sufficiently cross-referenced to computer fraud statute and the murder attempt by Burgum fentanyl burger by police protected methamphetamine facility is definitely an aggravating offense warranting the up to 20 years sentence for the Epstein couple with a Window 8 Software Engineer prior. CISA must fully search Burgum for knowingly and with intent to defraud traffics (as defined in section 1029) in any password or similar information through which a computer may be accessed without authorization, if such trafficking affects interstate or foreign commerce; or such computer is used by or for the Government of the United States under 18USC§1030(a)(6) and §1029.

Furthermore, it is necessary for me to articulate my extensive bug collection on the North Country Trail (NCT), along the northern border, since finishing the also buggy Pacific Northwest Trail in summer of 2025. Definitions –

iPhone Unavailable (minutes) means the iPhone has been temporarily shut-off by the service provider because there have been too many remote access attempts. Since Burgum took office in 2025, in the public land along the northern border there seem to be a lot of access devices scattered in buggy locations. They cause iPhone to be unavailable for a certain amount of minutes, in a certain locations on the public land. Two days ago, I encountered iPhone unavailable incidental to an encounter with a hunter and his wife in Michigan State Land on the NCT. Frequent encounters with iPhone unavailable over the past two summers have in the last two months, resulted in the blocking of my First American Bank (FAB) online app, and restriction on my debit card, that on last check only provides cash at the ATM and does not purchase goods. Luckily, or corruptly, my new ABLE card, that does not pay cash, buys goods. CISA is urgently enjoined to search, seize and destroy the iPhone unavailable access devices 18USC§1030(a)(2)(A). It is important to level the bank fraud charge against the iPhone unavailable message, to an attempt at bank fraud by a computer fraud 18USC§1344, so far they have not managed to rob any banks or financial institutions, although they try, and have induced unplanned obsolescence of at least one financial institution debit card, the ID wants billion(s) permanent appropriations 18USC§641.

Port Block – with an access device any online port may be blocked. The primary target of port block is email. However, any online port or website may be functionally blocked. Burgum is suspected of supplying the stalking tweaker Johnson with Pornblocker software that was seized by DOJ when he rudely seized Speaker of the House censuring the US dosed Hamas in 2023. Burgum is also suspect in blocking Iranian online communications to foment the revolution before the international war, and also to block Venezuelan online access at the moment they were s-nuked. Most fraudulently, Burgum Window 8 software engineer is highly suspect of being the source of the FDIC's Windows 8 for email. FDIC's 100 percent email response rate, with embarrassing messages, is actually the FDIC sending out malicious code to block the petitioner's Apple email or hack the text of Windows email in violation of 18USC§1030(a)(5)(B), obfuscating defendant, Burgum and/or FDIC of the \$1 million fine for obstructing FDIC transactions 18USC§1007. It is interesting to note the FDIC "insured deposits" are not believed to have paid a single bona fide deposit insurance benefit in the 90 year history of the Deposit Insurance Fund (DIF) *Rodriguez, as Chapter 7 Trustee for the Bankruptcy*

Estate of Western Bancorp Inc. v. FDIC as receiver for United Western Bank 589 US __ (2020) partially paid after five years for the majority of the life savings lost in Union Station Washington DC on September 24, 2021, by Bancorp via State of Oregon *Bancorp v. Deposit Insurance Fund (DIF)* HA-22-11-25, [HA-7-4-26](#).

Walky stalky. Another online tic, found in Minnesota, is the walky stalky. Particularly when it is raining and wet, and the perpetrator is inside, the phone becomes extra-difficult to operate and suffers a lot of pop-up search screens, before even logging on, that are often being ghost-written by the perpetrator whereas there is no way accidentally rubbing the phone could cause such frightening searches for Jews or to a lesser extent MKUltra or dishonorable discharge. The most frightening part of this bug is that within a day of first popping up on my phone I was visited by an armed local police officer while sitting on a dock on a lake. He was friendly and had real business to attend to after we watched a sunfish eat a dragonfly. The Court was very concerned about the stalking software because health insurance assassin Mangione and state legislator assassin Boelter, who wore police clothing when committing his senseless act of violence, were both convicted of using stalking software, but this stalking charge was dropped due to the violent crime. There is concern that this walky stalky is an illegal wiretap, with GPS tracking, that not only infringes on police support, but is the same software that has been used in extrajudicial killings 18USC§2261A.

Famous hacks and wiretaps that require honorable mention, but precede or transcend the Window 8 Software Engineer's unlawful seizure of the Interior Department, must be listed. Whether or not the result of illegal Burgum wiretaps and desktop surveillance and unauthorized access to webhosts, it is his computer criminal responsibility, to have made such an unqualified seizure of a badly cyber-bugged federal department and gotten caught cyber-stalking on day one, and still be torturing to this day, of unfulfilled permanent appropriations.

The original sin, other than hydrocarbon defense hacks, from before Windows 8 in 2014, is that due to former Speaker Pelosi's weakness for spying and torturing, Congress must amend federal torture statute to comply with Arts. 2, 4 and 14 of the Convention against Torture by repealing the phrase "outside the United States" (altered in 2009 causing Obama to state, "United States does not torture")" from 18USC§2340A(a) and amend Exclusive Remedies at §2340B so: The legal system shall ensure that the victim of an act of torture obtains redress and has an enforceable right to fair and adequate compensation, including the means for as full rehabilitation as possible. In the event of the death of the victim as a result of an act of torture, their dependents shall be entitled to compensation pursuant to Art. 14 of the Convention against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment (1987), Armed Activities on the Territory of the Congo (*Democratic Republic of the Congo v. Uganda*) 1999-2022 and Joint Application Instituting Proceedings Concerning a Dispute under the Convention against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment (*Canada and the Netherlands v. Syrian Arab Republic*) 2023.

Aggravated Identity Theft 18USC§1028A has been hacked since 2025 when Burgum stole federal office. Armed federal officers are no longer implicated in the beauty pageant for aggravated identity theft that has been stolen by insertion of Immigration and Customs Enforcement (ICE) impersonators. I suppose the reason ICE has taken the aggravated identity theft prize is it is more likely off-duty ICE and similar police protected meth officers have bugged the public lands than their lawful stewards, who leak pretty bad, that is how they got seized by Burgum. It is no joke that prior to this hack the Interior Department National Park Service Law Enforcement was always the winner of the most outrageous terrorism that transcends national boundaries from seemingly harmless background checks of person and place, aggravated identity theft. Sec. 20,000(b)(2) of An Act Supplementing appropriations for the fiscal year 2017-2027 notes. The principal organized crimes that must be redressed are systematic murder, “racial suicide” incited by wiretapping tribal government email, grand scale arson and novel political appointment interference (ie. AG Garland MRSA squirting pen), and greenlighting the dosing of Hamas, by National Park Service (NPS) aggravated identity theft, 18USC§1028A. Ironically, civilian NPS tends to have secure email. Do not email land agencies as a rule, they burn. Tribal government email is especially noted for being murderous to persons of the same race as the emailer, hit and run, treefall etc. do not email, appoint a non-governmental Tribal Trail Association to receive reservation emails and represent them to their tribal member only tribal government, and/or do due diligence to prosecute the unlawful wiretap between federally protected email address to convicted offender, tribal murderer or forest service arson, into history. Power of Secretary or designated officer 43USC§1457c mistaken reference to Title 32 National Guard. Should probably be repealed rather than corrected to Title 16 and 43 because of the high likelihood it is National Guard murdering tribal government email and maybe the arson, as well, although the arson comes up solid FBI infringed criminal justice.

Burgum may be responsible for ICE unlawfully obtaining information from Courts and Agencies. The Gulf of America cadastre revision of Google maps by Burgum has been a catastrophe. The term “cadastre” means an inventory of real property developed through collecting, storing, retrieving, or disseminating graphical or digital data depicting natural or man-made physical features, phenomena, or boundaries of the earth, and any information related to the data, including— (i) surveys; (ii) maps; (iii) charts; (iv) satellite and airborne remote sensing data; (v) images; and (vi) services of an architectural or engineering nature 43USC§776. Far Out has terminated the ability to post comments on their thru-hiking guidance app. The ability of Far Out to take money to sell their GPS maps for smartphones has been impaired, and their compensation recently rejected. My free NCT map was rudely discontinued and I must now navigate without an accurate mileage gauge and shall probably never know if I can road-walk the thirty miles a day, faster hikers do in the most rugged terrain. Far Out went out like Windows computers. Google Maps was badly affected by the Gulf of America revision so omit commercial establishments on the northern border, to the consternation of shopkeepers, and include many fake commercial establishments on the southern border where refoulered food and drugs are sold 18USC§1365.

HA State by State public land acreage table was hacked by Apache Open Office Number Format Error and could not be repaired by what remains of Natural Resources Council of Maine Trust for Public Land City Parks Facts Report 2011. I shall try to restore the table with Microsoft Office 2024, but it is unlikely to heal this loss of state-by-state public land acreage data. This

was noticed in 2025 but may have occurred when former Secretary Haaland contracted Burgum to attempt to criminally defend the un-American mathematics of her UN popular 30 x 30 thirty percent protected land by 2030 in a nation with 903.4 million acres of protected land, 39.9 percent of 2,263 million acres, Total. 666.6 million acres are federal land, 29.5 percent of total. Maybe the federal government wants to buy another 0.5 percent, 11 million acres of farmland tree lines for shady walking path connected metro-parks, etc. The moral is more protected land and water, not more GDP overestimates, that may also have been hacked globally incidental to Windows 8 and Burgum, but are probably just a material deficiency of international control, the United States corrects base year 2017, that can only be corrected globally by the UN Assembly.

3. Office of Natural Resource Revenues (ONRR)

The public lands are held in trust for the Native Americans, who accidentally duplicated mineral leasing revenues as Interior Secretary and Park Director 2020-2024, due to long-standing material deficiency of internal control in financial reporting by the Interior Department budget that must be corrected 11USC§704 as directed in Part 411 of the President's Budget President's Budget [HA-2-2-26](#). Consequential infringement by Burgum is not a laughing matter. Due to Burgum's port blocking it is not safe for HA and the SSA Actuary to attempt to instruct the incompetent Office of Natural Resource Revenues (ONRR) how to fill in the mineral leasing blank(s) confusing the Interior Department revenues table, negligently filed in the appendix of the Interior Department budget, and not at the top, right below the introductory surplus calculation, the Natives totally lost control of, with their revenue overestimate 18USC§1033.

ONRR currently reports revenues of \$19.1 billion, up 56 percent from FY 25 and disbursements of \$14.3 billion, up 17 percent from FY 25, for fiscal year 2026 (Oct-July). This is different than the \$5.6 billion half year of mineral leasing reported earlier in the year. Their data products are defective and the available explanations are not consistent with any annual reporting.

All sums received under the provisions of section 1460 of this title shall be deposited in the Treasury to the credit of miscellaneous receipts 43USC§1463. Essentially, ONRR is currently only worth 25 cents for their one-page statement that they disbursed \$14.9 billion and received \$19.1 billion in 2026. Copies of records, documents, etc.; charges; disposition of receipts 43USC §1460.

ONRR jokes aside, it will be necessary to carefully read ONRR statute in pursuit of duplicate reporting, Royalty Resilience Act 30USC§1701, Energy Policy Act of 2005 PL 109-58, Federal Oil and Gas Royalty Management Act of 1982 PL 97-451, and Amendments to the FOGPMA by the Federal Oil and Gas Royalty Simplification and Fairness Act in 1996 PL 104-185, Lease Sale or Surrender of Allotted or Unallotted Lands 25USC§396d, Indian Mineral Development Act of 1982 25USC§2103, Geothermal Steam Act of 1970 30USC§1001, Outer Continental Shelf Land Act of 1953 43USC§1353, Mineral Leasing Act of 1920 30USC§1923 and Natural Resource Revenues 30 CFR Part 1241 et seq.

ONRR, usually accused under 18USC§1001, has proven beyond a shadow of doubt I, the Public Trustee applicant, have failed to accurately account for either ID revenues or mineral leasing payment to States inclusive budget authority in Part 411 of the President's Budget [HA-2-2-26](#). Budget authority in Part 411 of the President's Budget can be updated to include Payments to States in a separate row, independent of the corrupted Office of Secretary expenditures, but cannot upgrade to consistent annual revenue reporting pursuant to Audit Standard No. 6 Evaluating Consistency of Financial Statement by the Public Company Accounting Oversight Board (2008) and 11USC§704(a)(2). Without conclusive revenue information the due date on another HA ID audit is unknown, maybe I'll take two years off, maybe Burgum will be removed and HA and SSA Actuary will be safe to quiz ONRR on their Annual reports 43USC§1741, Annual reports of department and its bureaus 43USC§1465 pursuant to consistent, annual reporting under

Any moneys received by the United States as a result of the forfeiture of a bond or other security by a resource developer or purchaser or permittee who does not fulfill the requirements of his contract or permit or does not comply with the regulations of the Secretary; or as a result of a compromise or settlement of any claim whether sounding in tort or in contract involving present or potential damage to the public lands shall be credited to a separate account in the Treasury and are hereby authorized to be appropriated and made available, until expended as the Secretary may direct, to cover the cost to the United States of any improvement, protection, or rehabilitation work on those public lands which has been rendered necessary by the action which has led to the forfeiture, compromise, or settlement 43USC§1735.

Having just received notice of a second port block and access attempt by First American Bank I am compelled to prosecute the US Trustee now. I shall do more on this brief in September 2026 to come up with an exact amount of permanent appropriations Burgum robbed. Interior makes enough money, and ONRR claims to have paid more than all the money, I have estimated the Department needs to cover the permanent appropriation shortfall. I however neglected to enter Burgum's wimpy permanent appropriations and budget authority and need to subtract his numbers from mine to determine how much he owes. It is a shame Congress paid to increase overestimate corrected current appropriations, to relieve some of the austerity imposed on the Department, and the feeling is that Burgum should be privately billed the cost of the Interior, Environment and Related Agency Bill PL 119-74. But the General Fund has already paid for

these arrears and fining Burgum would merely result in computer crime victim money being deposited in the General Fund. That is okay, money is a liquid asset, whether the ID or the General Fund that finance(s)(d) it during its overestimation, is the ultimate beneficiary, and the Trustee is mostly engaged in negotiating a reasonable level IV executive income with only \$5 million in assets, until the Title 11, 12 and 13 computer crime victims claims start rolling in. Smart Water has reached \$12.07 a gallon at the gas station, although Dollar General now usually sells \$2.25 liter of Smart Water. My claim for civil damages is for \$500 *Bluehost v. Central Utah Completion Project in the District of Utah* [HA-4-8-26](#).
