Hydrocortisone, Eucalyptus, Lavender, Peppermint or Salt Helps Water Cure Coronavirus Colds; Mentholiptus Cough Drop Cures SARS and Influenza; Echinacea cures Respiratory Syncytial Virus and Triple Threat of RSV, SARS-CoV-2 and Flu Act of 2023 HA-15-9-22

A Bill

To end all cold war and poverty

Be it enacted in the Senate and House assembled

Preamble

Part I Green Economy

- Sec. 1 Federal Litter - Hot Air and Cold Water
- Sec. 2 Two percent Interest in Inflation USury
- Sec. 3 Bipartisan Counsel against Abortion
- Sec. 4 Republican Split Ticket Vote

Part II \$777 billion FY 23 Treasury Balance

- Sec. 5 Perpetual Availability Goal
- Sec. 6 Loss of Balance
- Sec. 7 Student Loan Forgiveness
- Sec. 8 First Deposit Insurance Fund Benefit
- Sec. 9 Low Highway Trust Fund Compensation Stabilization
- Sec. 10 Interior Department Undistributed Offsetting Receipts
- Sec. 11 Ukraine Subsidy
- Sec. 12 Trial in Haiti – Socializing International Security Assistance
- Sec. 13 Two Percent Open Devaluation Defense

Part III Revenues

- Sec. 14 Internal Revenue Service Watch
- Sec. 15 Supplemental Security Income Trust Fund
- Sec. 16 Ten Dollar an Hour Federal Minimum Wage 2022 Plus Three Percent Inflation
- Sec. 17 Maternity Sabbatical State Unemployment Tax Assessment
- Sec. 18 Method for Estimating Customs Revenues
- Sec. 19 One Billion Benefit One Percent World Income Tax

Part IV Outlaws

- Sec. 20 President's Budget Request
- Sec. 21 Constitutional Disorder

- Sec. 22 [1,700-2,200 Nuclear Warhead limit](#)
Sec. 23 [Inflationary Veterans League](#)
Sec. 24 [250 Prisoner per 100,000 Resident Legal Limit](#)

Part V Don't Pandemic Treaty

- Sec. 25 [Preamble](#)
Sec. 26 Art. 1 [Diagnosis](#)
Sec. 27 Art. 2 [Water](#)
Sec. 28 Art. 3 [Essential Oils of Eucalyptus, Lavender or Mint Aromatherapy](#)
Sec. 29 Art. 4 [Eucalyptus and Echinacea Products](#)
Sec. 30 Art. 5 [Corticosteroids](#)
Sec. 31 Art. 6 [Drug Resistance Propaganda](#)
Sec. 32 Art. 7 [Office Opening Protocol](#)
Sec. 33 Art. 8 [Immunization](#)

Work Cited by Section

Hydrocortisone, Eucalyptus, Lavender, Peppermint or Salt Helps Water Cure Coronavirus Colds; Mentholiptus Cough Drop Cures SARS and Influenza, Echinacea cures Respiratory Syncytial Virus and Triple Threat of RSV, SARS-CoV-2 and Flu of 2023

Preamble

To prescribe the gold standard for the diagnosis and treatment of coronavirus colds - hydrocortisone, eucalyptus, lavender, peppermint or salt helps water cure coronavirus colds; mentholiptus cough drop cures both severe acute respiratory syndrome (SARS) from coronavirus and influenza;

To try Purple Pitcher Plant (*Sarracenia purpurea*) poultice to cure monkeypox, smallpox, other poxviruses, papovirus SV-40 and various herpes viruses, including papillomavirus and Epstein-Barr virus-associated carcinomas.

To inform split ticket voters to vote Republican to neutralize the Democratic supermajority in the midterm elections, and agree to remove Nancy Pelosi from Democratic leader and Congress in exchange for the resignation of Xi Jinping and Vladimir Putin who have abolished term limits.

To comply with the 2,000 warhead limit set by the nuclear non-proliferation treaty (NPT) in 2010.

To enforce a legal limit of 250 prisoners per 100,000 residents.

To increase the federal minimum wage to \$10 in 2022 plus 3 percent inflation to \$10.30 in 2023 and 3 percent more every year thereafter.

To pay the applicant Public Trustee >\$20,000 with leave to appeal (the Senate) for \$250,000 to resolve the first ever Deposit Insurance Fund (DIF) Treasury benefit payment to an individual and insure all the unclaimed deposits embezzled in the Great Swipe of Fall 2021.

To secure a deficit less than 3 percent of GDP by 2025, agency inflation must be limited to 2.5 percent for administration, including rent and Congress, and 3 percent for services and education, as if consumer price inflation had remained at an average rate 2.7 percent 1982 - 2021.

To experimentally devalue the 30 percent counterfeit dollar 2 percent in 2023, to reduce Debt Held by the Federal Reserve by \$690 billion, reduce Interest Payments by \$13 billion, and increase world purchasing power by \$1 trillion to buy American exports.

To demand the Federal Reserve and Treasury reduce their interest rates to the two percent rate they prescribe to control consumer price inflation in excess of eight percent in 2022 and renegotiate rents to 2.5 percent inflation from 2020.

To supply a 6.6 percent Cost of Living Adjustment (COLA) to increase Supplemental Security Income spending above \$70 billion FY 23 (Revelation 13:10); Veterans, more than 50 percent disabled, would only receive a 3 percent raise from the VA, to remain under budget control.

To hold the \$777 billion FY 23 Federal Treasury Balance responsible for insuring markets against deficits in excess of three percent of GDP, Student Loan Borrowing, and Usury in perpetuity.

To sustain the original \$55 billion FY 22 Ukraine subsidy, plus seized Russian assets used to reduce torture compensation due Ukraine, and future European contributions, less money received by Ukraine.

To immediately distribute a \$15 billion stock buyback before the end of FY22 to enforce the 3 percent limit on the sale of deficits, in a contracting economy, to see if a \$15 billion F22 stock buyback, taxed one percent \$150 million, from the \$777 billion FY 23 balance, is enough to keep the market green; after the \$22 billion FY 22 Semiconductor Trust for one plant, was re-invested in Treasury securities, when the rest of the \$250 billion market subsidy overestimate was denied, as usual, without contest, to be fair to the rich and middle-class.

To tax the rich and state employees, the full 12.4 percent social security tax on all their income, to relieve SSI spending from the General Fund by creating a SSI Trust Fund charged with ending child poverty by 2024, state underinsurance and all poverty by 2030, by which time state employees would have contributed 10 quarters to be eligible for social security disability, survivor and retirement benefits, based on contribution, under current law.

To terminate \$8.5 billion International Security Assistance FY 23, other than \$1 billion (FY25) Non-Proliferation, Anti-terrorism and Demining, and transfer the money with 3 percent inflation to an International Social Security Account created in the Treasury, to finance a \$4 billion annual trial of a \$2 a day international poverty line benefit for people make less than \$3.50 a day in Haiti, and transfer the expanding trust fund back to the State Department when Iraq megamurderer Antony J. Blinken has been removed and the \$63 billion FY 22 agency is ready to try to make the leap of faith to \$70 billion again, in peace (Revelation 13:10).

To pay one billion international poverty line benefits at current US \$2 a day prices demand equals \$730 billion, at the \$1.90 a day long term international poverty line equals \$694 billion. 3 percent benefit inflation is wanted to compete with 1-3 percent usual consumer price inflation. Taxable income might supply a total of \$741 billion individual and \$68 billion corporate taxes at 2023 prices. \$741 billion

revenues from a one percent individual income is exactly enough to pay \$730 billion in benefits and \$11 billion administration in pursuit of 100 percent trust fund ratio. \$68 billion revenues from a one percent corporate income tax would be nearly enough to pay all \$63 billion revenues of the United Nations in 2020 rapidly increasing to more than \$70 billion by mid-2022 to pay for COVID emergencies, \$72 billion 2023, a \$4 billion deficit.

Part I Green Economy

Sec. 1 Federal Litter - Hot Air and Cold Water

A. The climate crisis must be solved. Record heat and flooding must be redressed. Scientific misinformation regarding germaphobia (COVID) and pyromania (global warming) must be trashed. Federal legislation is wanted to clean up litter, in general, and specifically in regards to the thermal pollution that causes climate change, nuclear waste disposal, asbestos abatement, prioritizing the proper disposal of industrial waste before beginning operations, and when health standards condemn certain methods of development for good reason and prohibiting state and private actors who engage in hostile environmental modification that affect the health and welfare of the public. Cleaning up litter is just about the only human intervention into the wilderness that actually improves land value, ecosystem, biodiversity, health and beauty. Hiking trails and primitive camping are usually acceptable with biological surveys to protect threatened and endangered species. Taking the time to clean up litter is appreciated, prevents more littering and creates a culture of cleanliness sustained by all. Condemning litter is not a power granted exclusively to the states by the haphazard repeal of Prohibition. Litter is a national and international concern.

B. Thermal pollution has become a serious concern to the health of the planet, that has only gotten worse with the possibly well-intentioned, alarmist 2° C increase in hot air by 2050 due to carbon dioxide, from the feeble-minded Framework Convention on Climate Change, misleading everyone as to the truly hot causes of global warming, and incurring retaliation and infiltration by patently unlawful actors with impunity. It is absolutely critical that the United States and United Nations stand firm against, identify and redress the malicious causes of climate change, global warming and flooding pursuant to the Convention on the Prohibition of Military or Any Other Hostile Use of Environmental Modification Techniques (ENMOD) (1976).

1. Prescribed burns must be prohibited world and nationwide and the billions of slash piles littering the National Forests in the West Coast with man-made fire ladders must be destroyed, by removal for use as firewood and woodpulp. chipping, scattering and campfires in the rainy winter season. With global warming and drought being such a huge problem there is absolutely no justification for intentionally starting large fires. Aquifers and creeks permanently dry up and logs become dryer and more flammable, when exposed to the intense heat of wildfires and controlled prescribed burns. Most of the reasoning and support for prescribed burns in the scientific literature turns out to be false. "Fires are a natural part of the life cycle of forests" is not the proper blessing by naturalists after a forest fire, whereas intense summer sunlight is more effective than fire at germinating pine nuts. The greatest indicator of forest fire risk is a history of fire suppression. It is a federal crime to cut and injure trees. Dead wood is much more flammable than green wood. Piling dead wood dramatically increases the risk of catastrophic canopy fire, intentionally creating the fire ladders, alienated black bears are proud to crunch and winter campers to burn to keep warm. Prescribed burns are not a precise science, before the slash piles dry in two years, the workers get a second arson grant, or sometimes because the

prescribed burn gets out of control, the forest and nearby cities are destroyed by forest fire. Arson is terrorism, first degree murder and war crime. Prescribed burns are a conventional arson conspiracy by the FBI surveillance of the human rights abuses of the National Park Police who ignite the litter obsessed National Forests. Descendants of loggers, looking for less dangerous work in the forest, and off-duty wildfire fighters, are redirected from prescribed burns to replanting and trail maintenance. Ten times more acres are burned than logged. Commercial loggers should be employed to fight wildfires and permitted and organized to salvage log within one year of a forest fire with hopes that they sell their private timber lands to the public as wilderness. To protect urban and suburban areas, against high, flammable grasses, one of the most common causes of catastrophic wildfire that ignites tree canopies, houses and non-metallic car parts, leaving only. "Flammable grasses" are a far more common cause of wildfire, than the "flammable gases", targeted by climate change science, since they first began regulating automobile emissions. To reduce and eliminate the fire hazard posed by flammable grasses that become so dry they cease to be green and turn brown in the summer, farm animals must be coordinated to graze high grasses, down the nub, especially in suburban and urban-forest interface areas, or these grasses must be mowed

2. Self-combusting hydrocarbon oceanic heating pumps must be extinguished with 15 parts per million of 4-tertiary-butyl-catechol (TBC), cabled out by warship or oil-tanker and shipped to a refinery for conversion to a stable hydrocarbon within three months before they reignite, finder keeper. Oceanic heating pumps composed of self-combusting styrene filled railcars submerged in waters are the secret, primary driver of global warming and drought in the late 20th and early 21st centuries. Oceanic heating pumps can usually be located using the National Oceanic and Atmospheric Administration (NOAA) Sea Surface Temperature (SST) Anomaly maps they periodically published online. The original persistent, experimental warming in the North Atlantic emanates from the UN Headquarters in New York City, and has caused drought in Maine for the past three years, rather than from Washington DC. It is important to establish jurisdiction for the removal of these heating pumps from the oceans. Relatively colder winter weather on the east coasts is used to produce outrageous overestimates of winter storm damage, without normal levels road salt and snow plow service, whereas there no legal justification for Methods of and Means for Weather Modification granted to Geophysical Engineering Co. US Patent 4470544 A on September 11, 1984.

a. The Dutch Navy was televised cabling out a railcar after Hurricane Katrina in 2004 when oceanic heating was used to intensify the hurricane to reverse the oceanic cooling hurricane force reduction Method and System For Hurricane Control U.S. Patent Publication No. 2002 0008155 dated Jan. 24, 2002. California Governor Gavin Newsom began secretly extinguishing railcars in the Arctic on command, in an attempt to redress decade long drought, that failed due to the proliferation of slash piles and prescribed burn contracts. His maritime jurisdiction is however limited to the Pacific Ocean off the west coast of North America and Arctic Ocean. The NOAA SST Anomaly map went blind in regards to the Arctic Ocean that can now be navigated to remove self-combusting styrene railcars, unlawfully left to melt a Northwest Passage, only by unseasonably warm winter weather. NOAA does not respond to complaints of global warming to patrol their map and has the truth regarding hot water causing drought and cold water rain reversed. The only other agency that has competently responded to allegations of oceanic heating pumps is the Dutch Navy who in 2022 encountered retaliation in the form of wildfire in France and murder of their soldiers in the United States, after extinguishing a particularly strategic heating pump off the coast of France. The strategic heating pump to the west of New Orleans that is thought to have caused the deadly tornadoes in December 2021 was also removed just before hurricane season in the same effort. The overheated Chinese Navy seems to have

attempted to break up the heating pumps and drag them westward to the far east until the Dutch Navy partnered with them to extinguish the railcars.

3. A.S. Trust & Holdings blend of pure hydrocarbon refrigerant, was designated R441A by the American Society of Heating, Refrigerating and Air-Conditioning Engineers (ASHRAE) in 2011. By 2012 meteorologists had coined the term atmospheric river (AR) to describe the formation of huge rivers of water a mile high. This refrigerant claims high levels of thermal safety and effectiveness, and therefore possibly minimum amount of maritime chemical pollution by the accidental release of industrial chemicals, by any and all oceanic cooling systems. Oceanic cooling systems have had some success cooling waters to protect coral reefs. They have had mixed results mitigating global warming caused by oceanic heating pumps that would be more effectively extinguished with TBC. In recent years the warming in the North Atlantic was a mixture of extreme heating and extreme cooling. In summer of 2022 the artificial cooling seems to have been separated and greatly expanded to cause extremely large areas of cooling across the central Atlantic and Pacific to intensify La Niña. Consequently, record levels of flooding have been exhibited in the annual monsoons in the Gulf States and in Pakistan, and there are new reports of potential flooding in North Africa. Due to record flooding in Pakistan there is probably also an international effort to investigate the possibility of an artificially cooled La Niña. These oceanic cooling pumps unlawfully cooling international waters are to be prosecuted equally with oceanic heating pumps by the maritime jurisdiction, finder keeper.

4. Because of widespread international and federal negligence it seems necessary to enlist drought and flood affected Governors and Heads of State to prohibit prescribed burns and coordinate oil tankers or warships with refineries to safely remove hostile artificial heating and cooling pumps from waters within the 200 mile Exclusive Economic Zone (EEZ). It is believed that 2022 oil price driven inflation crisis was caused in a large part by the diversion of a great quantity of hydrocarbon fuel to warm a large swath of international water in the central north Pacific and to cool international waters in the central Atlantic and Pacific. Unless the United States participates in the removal of these hostile environmental modification devices from international waters, it is unlikely that they will enjoy any of the increased royalties from the sale of these hydrocarbon fuels, they legislated into the Inflation Reduction Act with dubious concessions to expand licensing of offshore drilling and oil exploitation in general, with copious investment in clean energy research and development. The nation's large oil reserves from recent exploitation of shale oil seems to have been lost at sea.

a. Oil price inflation was checked either by the Republicans defeating Liz Cheney in the primaries or Inflation Reduction Act offshore oil leasing or a combination.. Both Inflation Reduction Act and the CHIPS and Science Act many interesting energy related science programs. Both Inflation Reduction Act and the CHIPS and Science Act of these bills are most conspicuous for refining nuclear fuel without studying to learn of a method to dispose of nuclear waste, since plans for a Yucca Mountain nuclear waste disposal facility were scrapped. Transporting nuclear waste seems dangerous. The United States needs to reassure the public that nuclear power plants and nuclear weapons facilities know how to safely dispose of all the nuclear waste they will produce. Prior meltdowns and possible disaster in the Ukraine clearly rule nuclear energy out as a form of “clean energy”, whereas radioactive waste is far more toxic to life, than carbon dioxide, a byproduct of animal life and fuel for plant life. The federal government must ensure that nuclear waste is properly disposed of. \

C. Disposal of lead based hazards is widely recognized as an obligation by Housing and Urban Development (HUD) who provides substantial grant funding for its abatement pursuant to

40CFR§745.227. Asbestos abatement demands equal attention as a HUD budget obligation. Prioritizing Environmental Protection Administration (EPA) regulated asbestos abatement is medically and legally necessary to unlock the demolition or renovation of abandoned and condemned buildings by private developers and owners under 40CFR§61.145. Acknowledging federal asbestos abatement liability would help provide just compensation for both the environmental health hazard and economic damage of their prohibition. By financing asbestos abatement the federal government would facilitate the people's the right to work and ensure the availability of affordable and public housing, that is up to code, with lower rents and fewer cut corners, passed on to the consumer, than if private developers were charged with cleaning up the asbestos. The federal government must be held liable for the costs of asbestos abatement in buildings that are contaminated with asbestos, especially as the result of federal government financed construction. Asbestos abatement is key to renovation or demolition.

1. Asbestos abatement involves hazmat suits and special waste disposal that covers the asbestos with soil. The drywall is removed, asbestos insulation sprayed with water to prevent particles from becoming air-borne and carefully transported to the pre-arranged dumping site, where the wet asbestos is covered daily, deeply when done. Great care must be taken with abandoned building, that have been neglected for so long they are falling down, and asbestos abatement work might cause the building to collapse in whole or in part, on the heads of the workers. Asbestos and mold contaminated buildings that are falling down pose a severe risk to both workers and community, both in their current smelly and unsightly state, or if the building should collapse or be demolished, before the asbestos and mold is abated. Large amounts of water to wet unexposed asbestos and domelike blast shields may be needed to demolish structures, and parts of structures, that are too unsound to be abated.

2. Mold is also a frequent problem in old buildings and poses an equal risk with asbestos and lead based paint of becoming an airborne high health hazard in the larger community, during demolition or renovation. Whether or not mold infestation is so large and smelly throughout the building, that mold abatement is obviously necessary, mold abatement should treated at the same time as asbestos abatement. Mold is abated with chlorinated water. Asbestos must be sprayed with water before and during removal. To be efficient, while the asbestos is being wetted, workers must chlorinate the water being used for abatement and make a conscious effort to spray down the inner walls, floors and ceiling, with chlorinated water, while they are exposed, in order to abate mold, thereby creating a work environment where full hazmat suits are not necessary and respirators are only necessary due to airborne debris and toxic byproducts of the work effort.

D. Currently 39 percent of the Nation's lands and 26 percent of its waters are marine protected areas, 3 percent of protected waters are no take marine reserves. The President's promise to protect 30 percent of the Nation's land and water by 2030 is best described as treason. 30 percent is less than 39 percent and this diametrically conflicts with the understanding that bamboozled people consent to, that the national policy is to protect more land and water. Prescribed burn propaganda follows 30x30 treason closely in the literature and is evidently quick to enforce the real mathematical meaning of the 30x30 meme with major forest fires wreaking massive destruction on existing protected areas. The fraud has fooled the Interior Secretary who is responsible for only 21 percent of the Nation's land. The Interior budget is perennially ungrateful for the USDA's budget giving the National Forests to the Interior, and contribution of state and local parks. The President's 30 x 30 treason must not really result in a massive industrial land grab by development interest. The moral is to conserve more land and water.

Sec. 2 Two Percent Interest in Inflation USury

A. The Federal Reserve is obligated to redress 7 percent inflation in 2021 and greater than 8 percent inflation in 2022 by their dual mandate of maximum employment and minimum inflation with a 2 percent inflation target the Fed and Treasury are most obligated to adhere to. The Fed is hoping to negotiate cheaper rents, with their mortgage backed security credit, a rent reduction based on no more than 2.5 percent annual inflation since 2020 seems fair to households who have been gauged by escalating rents, without burdening the average landlord who has raised the rent 6.2 percent over the last year, after two years. Currently, the global hyperinflation ouroboros, eating up the economy faster than it grows. is the foremost economic concern in the post-COVID pandemic lockdown, pre-mentholyptus cough drop era. The congressional intent, made clear in the title of the Inflation Reduction Act PL 117-130 passed on August 16, 2022 has been successful at reducing the price of gasoline at the pump from more than \$5 to less than \$4 and promises to limit insulin costs to \$30 a month, but has so far only been successful at reducing consumer price inflation to 8.3 percent in August from 8.5 percent in July.

1. In July, the Consumer Price Index for All Urban Consumers was unchanged, seasonally adjusted, and rose 8.5 percent over the last 12 months, not seasonally adjusted and went down only 0.2 percent to 8.3 percent in August, after half of month of Inflation Reduction Act PL 117-130, gas price reduction. Increases in the shelter, food, and medical care indexes were mostly offset by a 10.6-percent decline in the gasoline index. The food index continued to rise, increasing 0.8 percent over the month as the food at home index rose 0.7 percent. The energy index fell 5.0 percent over the month as gasoline prices declined, but the electricity and natural gas increased. The energy index increased 23.8 percent for the 12 months ending August, a smaller increase than the 32.9-percent increase for the period ending July. Transportation increased 11.3 percent over the past year. Food increased 11.4 percent over the last year, the largest 12-month increase since the period ending May 1979. Shelter increased 6.2 percent. Consumer price inflation must be negotiated back to the 2.7 percent average annual consumer price inflation equilibrium, it had achieved since the 1970s energy crisis was brought under control in 1982, by adhering to the Fed's 2 percent inflation target in consumer price negotiations whenever possible, especially arbitrary Fed and Treasury interest rates.

2. The Law of Supply and Demand provides that competition between consumers and producers brings the supply of goods and the demand for them into balance. This is Cardinal 'law' of free-market economic theory. Overproduction lowers prices, increasing demand; over consumption raises prices, reducing demand. The law of demand says that the quantity of a good demanded falls as the price rises. Individual and industrial consumers buy less if prices increase and if prices increase a lot, as they have been, consumers, both household and manufacturers, buy significantly less, leading to a vicious cycle of supply chain shortages, justifying more inflation. Normally, the vice versa is also true, the law of supply is that the quantity of goods supplied increases as prices rise, and the increased supply drives down prices. However, hyperinflation originated in the critically vulnerable sector of fossil fuels and energy, prices for goods and services have increased across the board, especially in manufacturing and shipping, causing supply shortages, that spur a vicious cycle of higher prices. just as the stagflation during the oil embargo in the 1970s. Since inflation was brought under control in 1982 average annual inflation has been 2.7 percent. Although they have not agreed to abide by their own law the Fed Chairman has set a target of 2 percent inflation, from a range of 1-3 percent. gency inflation must be limited to 2.5 percent for administration, including rent and Congress, and 3 percent for services and education, as if consumer price inflation had remained at an average rate 2.7 percent 1982 - 2021.

B. Inflation is a powerful economic force that is both fundamental to economic growth and destructive to purchasing power. Hyperinflation can render a currency worthless, such as 200,000 percent annual inflation in Venezuela, where starvation has become common. Although the law of supply and demand provides that more units will be sold at a lower cost, if inflation is too low or negative the economy contracts, as business ventures are unable to sustain adequate levels of growth in wages and profit, if inflation is too high rising wages incur more inflation, that cause shortages in both supply and demand, and the economy contracts. A delicate mathematical balance between consumer price inflation and economic growth has long been sought to ensure a stable economy provides everyone with a steadily improving standard of living.

1. The Iron Law of Wages provides if wages rise above subsistence level, they produce inflation, which in turn forces wages down to subsistence level again. To ensure stable consumer economic growth, States and employers from time to time make estimates as to the minimum living wage so as to keep the standard of living of the population above the poverty line. Engel's Law anticipates that with rising incomes, the share of expenditures for food and other products declines. Based on surveys of families' budgets and expenditure patterns, that the income elasticity of demand for food was relatively low. The resulting shift in expenditures affects demand patterns and employment structures. Engel's Law does not suggest that the consumption of food products remains unchanged as income increases, it suggests that consumers increase their expenditures for food products, in percentage terms. Because the poor spend a larger percentage of their income on food and consumer goods, subsidies for the poor are believed to both sustain consumer economic growth and limit consumer price inflation. Congress and Department of Labor Wage and Hour Division habitually neglect annually increasing the federal minimum wage, to provide a steadily improving the living standards of their lowest paid workers on an affordable labor budget, although this is just about the only tool available to moderate fair wage negotiations, and take command of inflation. Congress rules with such an iron fist that they have neither increased the federal minimum wage nor their own salary since 2009, and is believed to harbor some severely mentally ill superstitions regarding inflation, that has struck again. A 3 percent annual increase in federal minimum wage from \$7.25 in 2009 to \$10 in 2022 plus three percent inflation every year thereafter is necessary under the Fair Labor Standards Act 29USC§206(A)(i)(D)

2. Part of the inflationary problem is that when the Fed interest rate is zero or low there is little reason for corporate bankers to argue with hyperinflationary demands, or deal with the scarcity of goods and services, when they can be easily convinced to borrow to pay for inflation. From an accounting perspective zero growth is a problem because it does not compete with inflation and although collapse may be slower than overspending related crashes, ignoring inflation with zero interest rates and growth policies ultimately results in insufficiency of funds and economic collapse, policymakers are psychologically unprepared to deal with. However, the propaganda of central banks and Treasuries to raise interest rates in response to hyperinflation, is excessive inflation in their own right. If corporations do not have the money to pay for goods and services they must raise their prices or curtail employment and operations, and a high rate of interest has exactly the same effect as consumer price inflation in raw materials, insofar that the corporation must raise their prices to pay for the interest on the loans they consume. It is furthermore important to describe the hypocritical raising of Fed and Treasury interest rates, as mindlessly going along with the hyperinflationary retaliation sacrifice propaganda, that sabotages the counterhyperinflationary intuition of central bank around the world. Chairman Volcker's counterhyperinflationary efforts in the 1980s caused double digit rates of unemployment. Chairman Powell seems intent upon causing an economic depression at the expense of economic growth. Hawkish Fed Interest rates in excess of the target rate of 2 percent inflation are a

hyperinflationary insult to price stability, high Fed interest rates dissuade borrowers, reduce the supply of capital and consequently supply in general, driving up prices. By raising the rate of interest on Treasury securities above 2 percent unfairly encourages investment in Treasury securities, at the expense of uninsured losses in the inflation beleaguered stock exchange.

C. To achieve 2 percent consumer price inflation, while sustaining the dual mandate of maximum employment and price stability without sacrificing economic or employment growth, in order to steadily improve the standard of living, it is necessary to relearn appropriate rates of inflation for goods and services, including government. There is little to indicate that either high Fed interest rates or high Treasury bonds are justified either to compensate for high inflation or to counter high inflation and there is no reason, but international peer pressure of other pseudo-scientific central banks, that Fed and Treasury interest rates are not pegged to the two percent inflation target. The objective to reduce market expansion runs contrary to the law of supply whereby increased supply results in lower prices. Interest is a type of inflation that is competitive with oil for having the capacity to impoverish industry and the stock exchange on a large scale. Fed and Treasury interest rates are theoretically the path of least resistance to breaking the vicious cycle of highly escalating prices for goods and services, by desperate industries, denied both low interest loans and return on investment, while really limiting the availability of money to help protect consumers from bearing the cost of industrial shortfalls. If the Fed is targeting a 2 percent rate of inflation, out of a range of 1-3 percent healthy inflation, the Fed should set their interest rate at 2 percent. Borrowers would remember industry has a responsibility to limit inflation to not more than 2 percent. And the Fed would realize no one is above the law.

1. To steadily improve the standard of living and quality of life, it is necessary that wages grow faster than inflation. Price inflation in consumer goods is often blamed on higher labor costs and post-pandemic pay raises to induce people to come back to work. However, people are working fewer hours to reduce exposure to COVID and climate and although workers may receive a higher hourly wage, there has been no increase in total earnings, since before the pandemic. Maximum employment requires a defense against arbitrary enforcement of Say's Law and the Iron Law of Wages. Say's Law provides that there can be no demand without supply. Thus aggregate demand equals aggregate supply. prosperity should be increased by stimulating production, not consumption. The creation of more money simply results in inflation. The primary reason for this is that spending obligations increase with subsidy, the subsidy then vanishes, the corporation requires higher revenues to sustain assumed obligations and there is no option to raising prices. Economists take a balanced approach to avoid the high cost of boom bust cycles with gradual growth. The majority of the inflation incidental to money printing is however inexplicably due to the economic damage caused by copycat kleptomania. The Iron Law of Wages states, that if wages rise above subsistence level, they produce inflation, which in turn forces wages down to subsistence level again.

2. To navigate the moral hazards of the Iron Law of Wages, Engel's Law anticipates that with rising incomes, the share of expenditures for food and other products declines. States and employers from time to time make estimates as to the minimum living wage so as to keep the standard of living of the population above the poverty line. Care must be taken in collective bargaining to ensure that reasonable growth in employee income does not cause consumer price inflation. Low income workers and pensioners require raises that are slightly higher than the usual rate of inflation, or in the current case of hyperinflation, competitive. Higher income workers improve their earnings at a rate that is lower than inflation plus, irregularly, through promotions, usually to replace retiring workers or to manage a significant expansion of the enterprise. In this way labor costs are predictable and affordable

without incurring consumer price inflation. Social Security can announce a generous COLA of about 5 -8 percent, precisely 6.6 percent to help get SSI spending above \$70 billion and help beneficiaries afford inflation in excess of 8 percent pursuant to Sec. 215 of the Social Security Act 42USC§415(i). On the other hand, to continue normalizing increases in aggregate spending for veterans benefits, for vast numbers of recently 100 percent disabled veterans, although low paid veterans might get the entire COLA, the Veterans Benefits Administration is not advised to use the same COLA as SSA this year, in favor of usual 3 percent inflation in benefit amount, to continue to redress the unsustainable hyperinflation in cost of Veteran spending to the deficit.

D. President Biden had to fight to get a \$30 a month rebate on insulin prices from the Inflation Reduction Act PL 117-130 passed on August 16, 2022. As the hyperinflation in the price of insulin continues, individuals with diabetes are often forced to choose between purchasing their medications or paying for other necessities, exposing them to serious short and long-term health consequences. Working Group members with the USC Schaeffer Center found that average Medicare Part D beneficiary out-of-pocket costs for all insulin types doubled between 2006 and 2013, from \$27 per month to \$65 per month. In 2013 Human insulin was available at the pharmacy for \$25 to \$100 per vial compared with human insulin analogs at \$174 to \$300 per vial. In one case four vials of insulin per month to properly manage diabetes, cost of \$1,948 a month out-of-pocket, until the family met the health plan deductible. The average list price of insulin has skyrocketed in recent years, nearly tripling between 2002 and 2013. Between 2006 and 2013, average out-of-pocket costs per insulin user among Medicare Part D enrollees increased by 10% per year for all insulin types. Comparatively, overall inflation during this time was 2.2%, medical care service costs increased by 3.8%, and spending for all prescription drugs increased by an average of 2.8%. Using a private insurance administrative claims database for all insulin prescriptions filled at least once, the median out-of-pocket cost to patients went from \$19 per vial of insulin in 2000 to \$36 per vial of insulin in 2010. Because insulin price inflation is so extremely out-of-control, Medicaid has a duty to pay for all insulin prescriptions, without copayment, regardless of the patients ability to pay Sec. 1927 of the Social Security Act under 42USC§1396r-8(3). The Inflation Reduction Act otherwise does not provide any truly effective remedies for inflation and annually adjusted 2022 inflation went down to 8.3 percent in August.

1. President and Congress re-treat 8 percent 2022 Inflation. Federal Reserve and Treasury interest rate must obey the 2 percent target under penalty of USury, to be written by Congress. 2.5 percent inflation for administration, labor, rents and Congress. 3 percent for services education and the amendment of the minimum wage to provide for an automatic 3 percent annual increase from '\$7.25 in 2009 to \$10 in 2022 plus three percent inflation every year thereafter', pursuant to the Fair Labor Standards Act 29USC§206(A)(i)(D) -\$10.30 in 2023, as if average annual inflation remained 2.7 percent as it has been since inflation eased in 1982. 6.6 percent Cost of Living Adjustment 2023.

Sec. 3 Bipartisan Counsel against Abortion

A. UN human rights experts with the Working Group on discrimination against women and girls denounced the decision of the US Supreme Court to strike down *Roe v. Wade* 410 U.S. 113 (1973) a nearly half-century legal precedent that has protected women's right to choose to have an abortion until *Dobbs, State Health Officer of the Mississippi Department of Health, et al v. Jackson Women's Health Organization et al* 597 US __ (2022). The Working Group on Discrimination against Women and Girls called upon President Biden to take all necessary measures to mitigate the consequences of this irresponsibly justified “state right” derived from the unsuccessful attempt to repeal Prohibition from

the US Constitution. *Access to safe and legal abortion: Urgent call for United States to adhere to women's rights convention* by the UN committee Committee on the Elimination of Discrimination against Women on 1 July 2022 to 'legalize abortion at least in cases of rape, incest, threats to the life or health of the pregnant woman and girls and severe fetal impairment.'

1. A bipartisan abortion law is wanted. The United States Code currently only provides that it is important to protect professional organizations involved in the training and licensing of physicians who don't advocate or educate their pupils in abortion from discrimination and may in fact be abortion related discrimination, of the conflict evading variety in the Public Health Service Act at 42USC§238n. It is proposed to legislate a new §238r Counsel against abortion. There is no denying that abortion is murder. There is no denying that counsel against abortion is the supreme law and should be mentioned or emphasized in any abortion law. Reference to Art. 12 and Art. 16 of the Convention on the Elimination of all Forms of Discrimination against Women assumes an arbitrary defense of unwritten rights to bodily autonomy that does not stand higher scrutiny. However, there is also no denying that certain women have an internationally recognized human right to obtain a safe medical abortion to save the life of the mother, rape, incest and severe fetal impairment. Public health propaganda, regarding unsafe back-alley abortions, has taken on a false ring, whereas people have little faith in public health propaganda since the international failure to prescribe hydrocortisone, eucalyptus, lavender, peppermint or salt helps water cure coronavirus colds kills almost as many humans as legal abortion. The trick seems to be that to produce a law it is necessary to uphold both the supreme law on the topic from the Hippocratic Oath, counsel against abortion, and right to an abortion to save the mothers life, for the health of the mother, rape, incest, severe fetal impairment and possibly teen pregnancies with parental consent. To provide substantive counsel against abortion and do the abortion bans justice, Congress not only obligated to legislate a right to abortion in certain cases where the counsel against abortion is unfair. Congress is obligated to provide for child welfare benefits and maternity leave, to avoid conviction of their abortion bans as a form of forced pregnancy, a crime against humanity amongst Clinton rape murder bastards. This compels Congress to tax the rich and state employees to end child poverty by 2024 pursuant to Sec. 15 and authorize a maternity sabbatical state unemployment tax assessment Sec. 17 of this Act.

B. The United Nations Population Fund (UNPF) has emphasized contraception access, providing 724 million male condoms, 80 million cycles of oral contraceptives and tens of millions of other forms of contraceptives in 2020 alone. Actually, rates of unintended pregnancy tend to be lower in countries with more liberal abortion laws, where access to safe abortion is available on request or in most circumstances. In countries where abortion is restricted or banned, more women get pregnant unexpectedly. When women have access to proper health services and the ability to exercise their rights to reproductive choice and bodily autonomy, rates of unintended pregnancy fall regardless of abortion laws. Despite more than 60 per cent of unintended pregnancies ending in abortion, not all are unwanted. Women's attitudes toward pregnancy can shift over time. Some are unsure whether to have children or add to their families. More research, and clearer definitions, are needed to disentangle these situations and to better provide opportunities for women to exercise real, informed choice over their bodies and futures. Medication abortion accounted for 39% of all abortions. The FDA-recommended regimen that allows mifepristone to be administered up to 10 weeks' gestation.

1. Worldwide, on average, 121 million unintended pregnancies occur every year – 331,000 per day. Rape causes unintended pregnancy at rates equal to, or greater than, consensual sex. Globally, around 257 million women who want to avoid pregnancy are not using safe, modern methods of contraception.

Of these women, 172 million use no method at all. Women with unintended pregnancies are less likely to use antenatal health services and more vulnerable to postpartum depression. Some studies link unintended pregnancy to preeclampsia and postpartum haemorrhage, both major causes of maternal death. More than three in five unintended pregnancies end in abortion, and an estimated 45 per cent of all abortions are unsafe, carried out in countries where the procedure is illegal, restricted or unaffordable in safe settings. Unsafe abortion hospitalizes around 7 million women a year globally and is a leading cause of maternal death.

C. After nationwide legalization of abortion in 1973, the total number, rate (number of abortions per 1,000 women aged 15–44 years), and ratio (number of abortions per 1,000 live births) of reported abortions increased rapidly, reaching the highest levels in the 1980s, before decreasing at a slow yet steady pace. Between 2011 and 2014, the U.S. abortion rate is reported to have declined from 16.9 to 14.6 abortions per 1,000 women aged 15–44, the lowest rate ever recorded and the continuation of a decades-long trend. Still, in 2014, almost one in five pregnancies ended in abortion, and given abortion rates in that year, an estimated one in four U.S. women will have an abortion in their lifetime. CDC abortion surveillances statistics exclude California, District of Columbia, Maryland, and New Hampshire. California performs the most abortions and the District of Columbia has the highest rate. New data from the Guttmacher Institute examined trends in abortion incidence and rates between 2014 and 2017. In 2017, an estimated 862,320 abortions were provided in clinical settings in the United States, representing a 7% decline since 2014 and the continuation of a long-term trend. CDC surveillance seems to be prematurely sounding the alarm regarding the number of the beast regarding the number of abortions in the United States and needs to make an honest estimate, back to 1973, when abortion was legalized, that includes California, District of Columbia, Maryland, and New Hampshire.

1. The U.S. abortion rate dropped to 13.5 abortions per 1,000 women aged 15–44 in 2017, the lowest rate recorded since abortion was legalized in 1973. Abortion rates fell in most states and in all four regions of the country. A total of 339,640 medication abortions occurred in 2017—about 39% of all abortions. As in previous years, clinics provided the overwhelming majority of U.S. abortions (95%), while private physicians' offices and hospitals accounted for 5%. In 2017, 808 clinic facilities provided abortions, a 2% increase from 2014. However, regional and state disparities in clinic availability grew more pronounced; the number of clinics increased in the Northeast and the West, by 16% and 4% respectively, and decreased in the Midwest and the South, by 6% and 9%, respectively. Although the number of state abortion restrictions continued to increase in the Midwest and South between 2014 and 2017, these restrictive policies do not appear to have been the primary driver of declining abortion rates. There was also no consistent relationship between increases or decreases in clinic numbers and changes in state abortion rates. Fertility rates declined in almost all states between 2014 and 2017, and it is unlikely that the decline in abortion was due to an increase in unintended births. Factors that may have contributed to the decline in abortion were improvements in contraceptive use and increases in the number of individuals relying on self-managed abortions outside of a clinical setting

2. In 2019, 629,898 legal induced abortions were reported to CDC from 49 reporting areas in the United States. Among 48 reporting areas with data each year during 2010–2019, in 2019, a total of 625,346 abortions were reported, the abortion rate was 11.4 abortions per 1,000 women aged 15–44 years, and the abortion ratio was 195 abortions per 1,000 live births. From 2010 to 2019, the number, rate, and ratio of reported abortions decreased 18%, 21%, and 13%, respectively. However, compared

with 2018, in 2019, the total number increased 2%, the rate of reported abortions increased by 0.9%, and the abortion ratio increased by 3%. Similar to previous years, in 2019, women in their twenties accounted for the majority of abortions (56.9%). The majority of abortions in 2019 took place early in gestation: 92.7% of abortions were performed at ≤ 13 weeks' gestation; a smaller number of abortions (6.2%) were performed at 14–20 weeks' gestation, and even fewer ($< 1.0\%$) were performed at ≥ 21 weeks' gestation. Early medical abortion is defined as the administration of medication(s) to induce an abortion at ≤ 9 completed weeks' gestation, consistent with the current Food and Drug Administration labeling for mifepristone (implemented in 2016). In 2019, 42.3% of all abortions were early medical abortions. Use of early medical abortion increased 10% from 2018 to 2019 and 123% from 2010 to 2019. During 2010–2019, the percentage of abortions performed at > 13 weeks' gestation remained consistently low ($\leq 9.0\%$). In 2019, the highest proportion of abortions were performed by surgical abortion at ≤ 13 weeks' gestation (49.0%), followed by early medical abortion at ≤ 9 weeks' gestation (42.3%), surgical abortion at > 13 weeks' gestation (7.2%), and medical abortion at > 9 weeks' gestation (1.4%); all other methods were uncommon ($< 0.1\%$). Among those that were eligible (≤ 9 weeks' gestation), 53.7% of abortions were early medical abortions. In the United States in 2014, 12% of nonhospital facilities reported that they had seen one or more patients who had attempted to self-manage an abortion, and these proportions were highest in the South (21%) and the Midwest (16%).

3. The overall number of clinics in the Midwest and the South declined. Texas had the largest drop, losing seven clinic facilities between 2014 and 2017. The 2014 figure included clinics that provided any abortions within that year, but a number of these facilities had stopped providing abortion care at some point in 2014 due to state abortion restrictions—in particular, the requirement that physicians providing abortions have admitting privileges at a nearby hospital. While this and other Texas restrictions have since been struck down by the U.S. Supreme Court, a number of clinics in the state have not reopened or reintroduced abortion care. The Texas legislature passed 10 additional abortion restrictions between 2014 and 2017, indicating continued attempts to restrict access to abortion care. Similarly, a state restriction passed in Ohio in 2013 that required facilities providing abortions to have a transfer agreement with a public hospital was amended to be even more stringent in 2015, requiring that the public hospital be within 30 miles of the facility; this development contributed to the continued decline of clinic facilities in that state. In 2014, four states had only one clinic providing abortion care—Mississippi, Missouri, North Dakota and South Dakota. In 2017, Kentucky and West Virginia were also down to one clinic facility, while Missouri has fluctuated between one and three clinical sites. All 10 states that had a meaningful increase in clinic numbers also showed declines in their abortion rates. Fertility rates declined in virtually all states between 2014 and 2017. Between 2014 and 2016, the proportion of women aged 15–44 using long-acting reversible contraceptive methods increased by 23%, from 13% to 16%; levels of sterilization were 25% and 26%, respectively

D. The nation needs to replace the population growth lost to COVID deaths and sluggish birth rate. Banning abortion is a simple way to theoretically increase births. The right thing to say, counsels against abortion. One is obligated to convince a worried pregnant woman or girl to keep her baby. To ensure states are fair in regards to the abortion ban “forced pregnancy”, a crime against humanity, Congress must ensure contraception is available and although the supreme law is counsel against abortion pregnant women have the right to an abortion to save the life of the mother, rape, incest, major detectable fetal anomaly or teen pregnancy with parental consent. Historical statistics show there is little correlation between legal abortion and birth rates and it remains to be seen if these abortion bans increase the birth rate. A grown woman has an equal responsibility to carry her

pregnancy to term as the father and *parens patriae* to pay child support. For family members and governments, this means they have a responsibility to provide the new family with sufficient social welfare money to sustain an adequate standard of living for the entire family for the duration of maternity leave, pre-school infancy and school age, when a family is unable to turn the expenses of parenthood into a respectable, secure, well-paid job. With many TANF benefit stealing States, whose child welfare services dabble extensively in baby snatching for high value adoptions, in comparison with the costs of foster care and orphanages, legislating experimental abortion bans, the dead-beat Congress has an international treaty obligation to protect the “right” to abortion in certain prescribed circumstances. A woman has the right to a speedy medical abortion only to save the mother's life, rape, incest, major detectable fetal developmental disorder and teen pregnancy with parental consent.

1. Since TANF benefits were cut by the Clinton rape murder administration with continuing bipartisan support of the 1996 Personal Responsibility and Work Opportunity Act, the dead-beat Congress has an outstanding obligation to pay both maternity leave and child welfare benefits equal with the obligation of the United Nations to pay an international poverty line benefit. These are the two primary tax proposals advocated by this act against the tax evasive omissions and retaliatory propagandas and violences of the US and UN. There are no other sure fire ways for the federal and international governments to secure financial and economic improvement, than close these loopholes, yet they do not metaphorically prescribe mentholypus cough drops to cure both influenza and severe acute respiratory syndrome (SARS), and millions of people are reported to die and live in extreme poverty – crocodile tears of a sadist. In regards to the abortion ban, the derogation of the national obligation to pay child welfare gives rise to leftist coup. Children's services, assisted by novel anonymous baby drop-off boxes at fire stations, enrich themselves with baby adoption fees, probably at a net loss to agency outlays and outlawry. Poor mothers, including ambitious women who don't want to be impoverished by single-motherhood and unwanted pregnancy, called racial and ethnic minorities by leftist propagandists, trying to secure a forced pregnancy conviction, who should be counseling minority population growth, have the right to argue for an economic right to an abortion, so as not to support children services terrorism, restore child welfare benefits and provide maternity protection.

2. Overturning *Roe v. Wade* constitutes forced pregnancy, a crime against humanity in Art. 7(1)(g) of the Rome Statute, for which the United States is obligated to compensate the women they counsel against aborting their unwanted pregnancies. Both political parties are obligated to redress their belief system after the Clinton rape murder Art. 7(1)(a)(g) should not have resulted in political bastardization of children, an internationally recognizable persecution against families with children Art. 7(1)(h). Parties shall take all appropriate measures to eliminate discrimination against women in the field of employment in order to ensure, on a basis of equality of men and women, the same rights, in particular: The right to social security, particularly in cases of retirement, unemployment, sickness, invalidity and old age and other incapacity to work, as well as the right to paid leave under Art. 11 (e) the Convention on the Elimination of All Forms of Discrimination against Women(1979). States Parties shall recognize for every child the right to benefit from social security, including social insurance, and shall take the necessary measures to achieve the full realization of this right in accordance with their national law. 2. The benefits should, where appropriate, be granted, taking into account the resources and the circumstances of the child and persons having responsibility for the maintenance of the child, as well as any other consideration relevant to an application for benefits made by or on behalf of the child under Art. 26 of the Convention on the Rights of the Child (1990).

Sec. 4 Republican Split Ticket Vote

A. It has never been so important to inform voters that in the 6th stage of Democratic-Republican two party system development, to prevent insolvent tyranny, the majority of Congress must be from the opposite party as the President. Voters are encouraged to vote Republican in the 2022 midterm elections, wherever the Republican candidate is not intolerably fascist. Pelosi fraud Biden's leftist coup must be neutralized. It is nearly certain Biden's election was the result of election fraud. Ballot stuffing to be precise. There has not been 66.8 percent voter-turnout in a Presidential election since before McKinley was assassinated in 1900. Normally, incumbents win 9 out of 10 elections.

1. It is not impossible that Biden truly won. Rape murderer Clinton won the popular vote in 2016 and the COVID lockdown sucked. However, voter turnout was incredible and Biden wastes all the nation's time abusively denying Pelosi is a fraud. It would seem the ballot was stuffed by Pelosi's FBI corrupted state court, that has never been so poisonous, and flocked to Biden who has sacrificed half his immediate family to "protection of unconventional weapons missions". A little bolder than most Democratic typos.

2. It is necessary for Republicans to focus their election fraud investigation, and Secretaries of State their free and fair election security, on preventing the abuse of the identities of non-voters to vote for Biden, or other candidates in the future. After best behavior and then the Christmas torture, more non-voters relocated than died, and all are, by their nature, very reluctant to expose themselves to electoral politics. Nonetheless, to put the 2020 Presidential electoral dispute to rest, and secure future elections, it will be necessary for the Republicans and election officials, to solicit non-voters to volunteer to find out whether or not their identity was abused to vote for Biden in the election.

B. Joseph Biden and Kamala Harris are ballot stuffing identity thieves, in a particularly criminal violation of 52USC§20511(b) and 18USC§595. The report of the Special Rapporteur on contemporary forms of racism, racial discrimination, xenophobia and related intolerance A/73/305 of 6 August 2018 listed Donald Trump (USA) as 'a populist leader who has been willing to stoke racism, xenophobia and related intolerance with little regard for the human rights of many within the borders of their countries' pursuant to Enforcement 52USC§10301 et seq.

1. While Biden's election fraud is a true crime, the injustice of Trump's prohibited xenophobic and racist propaganda, was defenseless against FBI infiltration, lost control of the "fake news" and his supporters on January 6th and on the 7th Congress voted to install Biden as President under Art. 2 Sec. 1 of the United States Constitution. It is not impossible that Biden won the election on election day, just highly uncharacteristic of an incessant, violently reactionary, leftist fraud, who earned his right to be impeached under Arts. 2 Sec. 4 and Art. 3 Sec. 3 of the US Constitution.

C. The purpose of democracy is to swiftly oust the tyrannical loser without violence, and install a winner. Both parties have suggested that neither Biden nor Trump should run in the 2024 Presidential election. To humble the Federal Bureau of Investigation (FBI) intimidation of voters 18USC§594 before Art. 2 Sec. 1 the Court must render unto the National Archive Record Administration (NARA) the records under 44USC§2101 and §2201 et seq. and render unto Trump his private property and passport. The FBI is fined \$1 million for wire fraud for the media spectacle, with \$50,000 tort for costs for NARA to dispose of the prejudice against magistrate who would use the FBI to seize lost NARA records. Congress may vote to 'disqualify' Trump from holding any office under the United

States, ie. Saying or believing he is the President elect, running for or taking campaign contributions for President in 2024, for the adverse possession of records in violation of 18USC§2071(b).

1. Biden is personally responsible for amending Title 22 of the United States Code Foreign Relations and Intercourse (a-FRaI-d) to Foreign Relations and Court of International Trade of the United States (COITUS) to Customs Court (CC) because this abuse of the English language, that obviously constitutes the minor crime of obscenity on federal property 18USC§1460 et seq, incites many ethnic Americans to inappropriate sexual arousal, and furthermore, the propaganda is actually intended by the war and warrant power ambitions of Congress, to incite certain “ethnic right to bear arms Americans” to “snuff” flick, whereby the pornographic actor is truly murdered, or to use more internationally recognized human rights, in this in-sulfated tobacco snuff free era of COVID cold stuffed noses, this peculiar American snuff culture of human sacrifice must be prohibited under Art. 20 of the International Covenant on Civil and Political Rights.

2. Biden is tortiously negligent to amend Pelosi's torture statute hacking that prompted Obama to the say “the United States does not torture” when the Democrats held a supermajority in 2009. Congress must amend federal torture statute to comply with Arts. 2, 4 and 14 of the Convention against Torture by repealing the phrase “outside the United States (altered in 2009)” from 18USC§2340A(a) and amends Exclusive Remedies at §2340B so: The legal system shall ensure that the victim of an act of torture obtains redress and has an enforceable right to fair and adequate compensation, including the means for as full rehabilitation as possible. In the event of the death of the victim as a result of an act of torture, their dependents shall be entitled to compensation pursuant to Art. 14 of the Convention against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment (1987) and *Armed Activities on the Territory of the Congo (Democratic Republic of the Congo v. Uganda)* 1999-2022.

D. There are 30 x 30 treasons, against 39 percent land conservation, why Biden should be impeached before the 2024 election. The moral is more. Primarily, I, Nancy Pelosi, am a jealous fraud, punishing the children for the sin of the parents to the third and fourth generation of those who hate my secret police (Deuteronomy 5:9, Exodus 20:5). Nancy Pelosi is a spy, her affiliation with the Permanent Select Committee on Intelligence, all components of which need to be abolished, disqualifies her from holding the high office, of Democratic leader or Speaker of the House, every bit as much as Putin's KGB background should have barred him from the opportunity to overstay the 2 term limit.

1. Her lead frauds are Iraq megamurderers, Liz Cheney (WY-R), daughter of Iraq warmonger Dick Cheney who was removed further office by the Republican primaries, and Antony J. Blinken, Secretary of State, who convinced the Democrats to vote for war with Iraq on false pretences, and needs to be replaced with a pacifist. Cheney and Blinken conspired to enrich themselves on oil inflation. Cheney is a pathological liar, “not a domestic terrorist” regarding war, the 2020 Presidential elections, and oil price inflation, who owes a lot of artificial heart for the unwashable cardiotoxin. Blinken was author of *Ally versus Ally, America, Europe and the Siberian Pipeline* (1987), mastermind of the Putin crisis, feeblemind behind the new Cold War and 2020 election results, and nuked Haiti right after Federal Financial Institutions Examination Council embezzled *Authentication and Access to Financial Institution Services and Systems* from Arlington, Virginia on August 11, 2021.

2. Democratic peace theory holds that democracies never make war against each other. In practice electoral disputes incite Pelosi's propensity for the FBI to make war by dosing the suicide attackers *Bush v. Gore* (2000), *Ukraine v. Russian Federation* (2022). To respect his adversary Trump's skilful

censorship of espionage, defeating Cheney in the Republican primaries, the Biden Administration must stop harbouring and concealing by removing from office Pelosi and Blinken 18USC§594, 18USC§792, 18USC§2071(b) and Art. 4 of the Convention against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment (1987). To sweeten the deal it is proposed to exchange Pelosi for Jinping and Putin. The renomination of Xi Jinping by the Chinese Communist Party must be opposed, after repealing the two, three year term limit in 2018. Prisoner exchanges have worked with the Biden Administration. If the Chinese Communist Party cannot remove Xi Jinping, the Democrats cannot remove Nancy Pelosi. An impeachment exchange is in order.

3. Long time Democratic Leader narchitect of the Afghanistan and Iraq wars, current Speaker of the House supermajority Nancy Pelosi and her Permanent Select Committee on Intelligence are the spitting image of post-Ukraine invasion czar Putin and his KGB. Putin is severely mentally ill after being coerced by Antony J. Blinken's megamurder diplomacy and the Duma is obligated to impeach Putin for his unauthorized war with Ukraine and continued occupation of the autonomous areas in eastern Ukraine, if he does not voluntarily resign. The war in Ukraine is a crime of genocide for which Russia owes Ukraine hundreds of billions of dollars of torture compensation. Currently, electoral systems worldwide, do not seem to sustain any credible debate, opposition, authentic ballot counting, or torture compensation, but this is difficult to prove; the proof is the peace. When a President repeals term limits and becomes a god – there is no denying election fraud. Democratic peace theory holds democratic nations never attack one another. Having stayed in office longer and murdered more people than Vladimir Putin and Xi Jinping combined, it is agreed Nancy Pelosi should be the first to resign, first from Democratic leader and then from Congress if Putin and Jiping wish to liberate San Francisco from her extortionate rents.

Part II \$777 billion FY 23 Treasury Balance

Sec. 5 Perpetual Availability Goal

A. The COVID pandemic incurred the highest deficits in history. An audit of agency spending, including, especially the cost of COVID relief to the Treasury and Department of Labor, reduces the estimated deficit from \$3.1 trillion to \$2.6 trillion FY 20 and from \$3.7 trillion to \$2.2 trillion FY 21. The deficit will go down to \$991 billion FY 22, \$704 billion FY 23 (3.0 percent of GDP) and \$695 FY 24 (2.9 percent of GDP).

1. Public Law 117-73 increased the public debt limit to \$31,381 billion pursuant to updating 31USC§3101. In 2021 it is estimated that gross federal debt of \$28,004 billion, was -\$1,613 billion, -5.4 percent less than \$29,617 billion outstanding public debt reported by the Monthly Statement on the Public Debt of the United States of December 31, 2021. P.L. 117-50 of October 14, 2021 increased the debt ceiling to \$28,881 billion and on December 16, 2021.

B. Held, the General Fund has \$1,613 billion carryover funds plus \$2,787 billion on-budget revenues to pay \$3,778 billion on-budget obligations in fiscal year 2022. The Treasury will indefinitely extend the availability of \$1.6 trillion balance FY 22, by limiting the availability of the balance to purchase deficits burdening the market in excess of 3 percent of GDP, at a 2 percent rate of interest pursuant to the Anti-Deficiency Act 31USC§1502.

1. The \$1.6 trillion difference, after taking into consideration the cost of mortgage backed securities,

provides the Treasury with a balance available to keep Treasury bond, note and security market sales less than 3 percent of GDP, without printing any more Public Debt Held by the Federal Reserve after March 2022. The Federal Treasury Balance would receive interest payments (2 percent please) to sustain itself, student loans and deficits in excess of 3 percent of GDP.

2. In the beginning of Fiscal Year 2023 it is estimated that of the \$1,613 billion left over from COVID relief, there will be an estimated \$777 billion, at year end FY 2022, after paying \$344 billion for deficits in excess of the 3 percent of GDP (asset; 2 percent rate of interest), \$200 billion for the 2020 payroll tax overestimate, \$200 billion for the student loan forgiveness, student loans are the usual borrowers from the Federal Balance, \$55 billion for Ukraine, untrustworthy \$22 billion FY 22 loan to the semiconductor industry, and \$15 billion stock buyback for selling deficits in excess of 3 percent of GDP FY 22 taxed one percent by the Inflation Reduction Act. The \$344 billion purchase of federal debt will yield \$6.88 billion revenues for the Federal Treasury Balance by 2023.

3. To protect the Treasury Balance in perpetuity it will be necessary to secure a deficit less than 3 percent of GDP with the 2025 expiration of the Tax Cuts and Jobs Act of 2017 and sustain sufficient balance to negotiate with the \$100 billion outlays, \$1.6 trillion student loan, collections unknown, until their forgivable demands for borrowing, would not exceed interest income - \$6.88 billion 2023.

C. 'Market insurance' is a primary obligation of the Federal Treasury Balance that buys deficits in excess of 3 percent of GDP to be fair and subsidy free. The 2022 recession provides an opportunity to justify a \$15 billion stock buyback whereas three percent of GDP is worth less than last year. Due to -1.6 percent economic growth in the first and -0.6 percent in the second quarter 2022 it is necessary to revise the 2022 annual expenditures to downwardly adjust the GDP as it is used in the daily Bureau of Fiscal Service calculation of purchasing deficits in excess of 3 percent of the GDP. The US GDP was estimated at \$22,064 billion in 2021 by the advance estimates of the Conference Board Economic Forecast for the US Economy regarding NIPA statistics. From this it can be crudely estimated that, on an annualized basis, the 2022 US GDP contracted to \$21,711 billion in the first quarter and \$21,581 billion in the second quarter.

1. Three percent of the \$21,581 billion GDP FY 22 is a \$647 billion limit on the sale of federal deficits. The best estimate of the regular on-budget deficit for FY 22 is -\$991 billion. This means the federal balance pays \$344 billion FY 22 for deficits in excess 3 percent of GDP with \$792 billion remaining at the end of the year. A \$777 billion federal balance at the end of fiscal year 2022 could afford a \$15 billion stock buyback, at year end FY 22, to more strictly adhere to the 3 percent of GDP limit on federal security sales obligation of the Federal Balance, the \$15 billion stock buyback is taxed 1 percent, \$150 million, by the Inflation Reduction Act.

a. The downward movement on the stock exchange in the third quarter is not auspicious. The United States is certain to have an economic depression in fiscal and calendar year 2022 unless the Fed can obey their own 2 percent inflation rule by limiting Fed and Treasury interest rates to 2 percent and stock buybacks to compensate for Treasury security sales in excess of three percent GDP, beginning in 2022 and until the \$1.6 trillion balance remaining from COVID relief is exhausted because Congress is unable to sustain this replenishment of the federal balance in perpetuity due to their incessant deficits in excess of three percent of the GDP, even after the expiration of Tax Cuts and Jobs Act of 2017 in 2025.

Sec. 6 Loss of Balance

A. The Treasury reported that the Federal Treasury Balance had been completely depleted at the beginning of Fiscal Year 2022. A new Federal Balance of \$1.6 trillion was not made available until halfway through fiscal year 2022. Its primary obligations are to sustain federal student loans and purchase deficit in excess of three percent of GDP, \$344 billion FY 22, in perpetuity, at a 2 percent rate of interest, \$6.88 billion revenues by 2023. To settle accounting frauds incidental to the COVID emergency the Federal Balance had a one time obligation to pay \$200 billion for the 2020 payroll tax overestimate, \$200 billion to settle ED accounting growth at 3 percent annual inflation from 2020, \$55 billion for Ukraine calendar year 2022, dubious \$22 billion FY 22 trial of semiconductor industry lending, and \$15 billion stock buyback to stimulate the economy by enforcing the limit on the sale of federal securities to investors, to less than 3 percent of a shrinking GDP. A Federal Treasury Balance of precisely \$777 billion beginning of fiscal year 2023 on October 1, 2022, would be worth defending against insolvent borrowers, excessive deficits, irregular spending and accounting frauds, the Federal Balance is obligated to pay for, until the Federal Balance is exhausted, becomes a total loss known as a dead-beat, or is sustained in perpetuity by net profitable lending and agency budgets.

1. In the past information regarding a the Federal Treasury Balance total was kept totally secret until it was reported totally depleted at the beginning of Fiscal Year 2022. The Federal Treasury Balance remaining from COVID relief is currently accounted for by Hospitals & Asylums, with input from Congress, Federal Reserve and Bureau of Fiscal Service, regarding the legitimate spending obligations of said Federal Balance. The Treasury is encouraged to publish a declaration that there is a Federal Balance of \$777 billion at the beginning of fiscal year 2023, remaining from \$1.6 trillion in left-over COVID relief in the beginning of fiscal year 2022, with which to self-determinately account for any federal student loan deficiencies, deficits in excess of three percent of GDP and speedy and permanent non-perpetuation of any federal accounting errors or spending irregularities. The Treasury must take care the supermajority does not deplete the Federal Balance before the expiration of Tax Cuts and Jobs Act of 2017 in 2025 helps reduce the deficit to less than 3 percent of GDP.

B. The Federal Treasury Balance may be slightly adjusted to permanently settle the 2020 payroll tax overestimate. In 2020 it was conservatively estimated there was a -6.2 percent decline in payroll tax revenues, from the previous year. This is a \$151 billion difference between the incredible \$1,305 billion assessment of 6.4 percent growth during the pandemic in 2020, when GDP declined -2.5 percent and individual income tax revenues declined -6.4 percent. The overestimate is distributed \$100.8 billion OASI, \$14.5 billion DI and \$35.9 billion HI in t-bonds. The -6.2 percent estimate seems fair although a -8 percent decline is more likely. Pandemic unemployment compensation beneficiaries were not obligated to pay the payroll tax although they do file individual income tax. Although the 2022 Annual Report has promised to revise future estimates when the truth is known, they have not yet come up with an accurate estimate, and to prevent the peculiar criminal tendencies involved in making insurance overestimate, in this most beloved of federal programs, \$200 billion of federal balance has been allocated to cover the 2020 payroll tax overestimate.

1. An exact figure for the 2020 payroll tax will have to be determined by consultation of the Board of Trustees with the Assistant Secretary of Tax Policy and the Bureau of Fiscal Service under 31CFR§1.0(b)(1)(xvi) and (b)(4) to recount the exact 2020 federal payroll tax collected by various methods under 31CFR§203.2. The exact amount of counterfeit currency that must be cancelled because it was not authorized by the Federal Reserve pursuant to 31USC§5153 remains to be

determined for the criminal overestimate by or affecting the business of insurance 18USC§1033 to avoid any crime or accounting errors due to counterfeiting and forgery 18USC§470 *et seq.*

C. The Federal Treasury Balance categorically denies all \$250 billion semi-conductor investment after the \$22 billion lending trial FY 22. A Trustee must prepare a report on the trust debentures of this \$22 billion money, defending the trade-offs of the illegal market subsidy, the \$20 billion overestimate greening the stock exchange, the real cost of constructing one semiconductor factory in Ohio, the preponderance of loans to grants, acknowledging the death of Queen Elizabeth II occurred on the same day as the Defense Production Act subsidy. Notoriously corrupt Republican Ohio Revised Code usury denial statute 1701.68 now weighs heavily on the money laundering Ohio Democrats, insolvent, rampage shooting, federal offices of auditor abusing, embezzling bank fraud, outside the margin of usury. It is necessary to clarify that semi-conductor manufacturing companies receive loans that they will have to repay, in time, with reasonable rates of interest, and not illegal multi-billion gifts pursuant to the language abused in the Sec. 101 of the CHIPS Act of 2022 P.L. 117-167 and sections 9902, 9904, and 9906 of the William M. (Mac) Thornberry National Defense Authorization Act for Fiscal Year 2021 (15USC§4652, 4654, and 4656; Public Law 116-283) whereas there is a necessity for regulation of trust indentures pursuant to 15USC§77bbb.

1. The language of the act is unconstitutionally vague regarding the terms of interest and repayment of this financial assistance to what should be a profitable industry, and currently only describes any sort of repayment occurring as punishment if that company should deal with a "foreign entity of concern". The xenophobic discrimination of this Defense Production Act market subsidy is brought to the attention of the 'Corporation of Foreign Security Holders' 15USC§77bb on trial for theft of Certain Iranian Assets (2019) etc. The previous section in the National Defense Authorization Act seems to try to justify this investment in America in the US suspicion related to the International Reconstruction Bank loans to China, but fails to explain the unlawful leap from the US not liking international loans to China to economically unlawful multibillion gift subsidies from the US Treasury to the nascent US semiconductor industry. As it is written this bill does not provide adequate security to make a withdrawal from the balance and it is important that any subsidy paid includes a clear repayment plan. The reasoning of this federal investment is mostly that gift subsidies are particularly illegal because they not only provide an unfair advantage to a certain national industry, this unfair advantage is unsustainable, without more gifts, and the net effect on the economy is certain to be negative, especially when the money is repaid and/or withdrawn from the stock exchange, for its stated manufacturing facility purpose, and the economy is depressed. Denying that this patently illegal market subsidy is a stock buyback does not fully explain how much of this money is intended to green the stock exchange, and for how long. The Trustee Report must inform the public of their financial planning, because transparency is needed to understand possible future shocks to the market, and analyze the effectiveness of this market insurance type semiconductor subsidy overestimate, so that this Defense Production Act subsidy, can be continued or diversified, more honestly, into other industries, as part of the portfolio of the Federal Treasury Balance.

2. The national public interest and the interest of investors in notes, bonds, debentures, evidences of indebtedness, and certificates of interest or participation therein, which are offered to the public, are adversely affected—(1) when the obligor fails to provide a trustee to protect and enforce the rights and to represent the interests of such investors, notwithstanding the fact that (A) individual action by such investors for the purpose of protecting and enforcing their rights is rendered impracticable by reason of the disproportionate expense of taking such action. Practices of the character above enumerated have

existed to such an extent that, unless regulated, the public offering of notes, bonds, debentures, evidences of indebtedness, and certificates of interest or participation therein, by the use of means and instruments of transportation and communication in interstate commerce and of the mails, is injurious to the capital markets, to investors, and to the general public etc. under 15USC77bbb. It should be adequate to amend the word grant to loan in 15USC§4652(C)(III), however conduct of grant, lending and stock market greening assistance must be clearly negotiated in writing, to redress the hypocrisy of US state usury statute, at its most abusive, and most gentle in regards to creating real American jobs and being transparent about the use of the semiconductor overestimate to green the stock exchange, when the export industry job creation Defense Production Act subsidy should be more equitably diversified, and linked to actual performance, meaning much less than \$250 billion over the next few years, to prevent accidental support of crime by and affecting people who are truly engaged in the business of insuring the market 18USC§1033.

D. The Federal Treasury Balance does not currently assume any liability for mortgage backed securities that are taken care of by the Federal Reserve. Being currently, entirely the end-product of Federal Reserve printed COVID-relief, the Federal Balance has a vested interest in questioning the necessity of Federal Reserve subsidies specifically for mortgage backed securities, every economic downturn. To reduce mortgage lending interest rates on normal fixed rate mortgage loans, risk of foreclosure, predatory repossessions, corruption, and demand for bailouts by mortgage backed securities, it is necessary to prohibit the adjustable rate mortgages (ARM) loans, that caused the three year “Great Recession” misnomer and continue, to cost the Federal Reserve an excessive amount of money during economic downturns. As the name suggests, “conventional” adjustable rate mortgages (ARMs) are a corrupt type of home loan, issued by national banks, whose interest rate starts out low, but then increases at an arbitrarily determined rate. The ARM borrower loses the economic efficiency of fixed rate mortgages that become more affordable in time with inflationary increases in wages. To protect consumers from this form of predatory lending and economy from further massive defaults, it is proposed to prohibit ARM loans, amortize existing ARM loans at reasonable rates and repeal 12CFR§34.20-34.25, 24CFR§203.49, 38CFR§4312(d)(1)-(5), 38USC§3707-3707A.

Sec. 7 Student Loan Forgiveness

A. In response to the COVID-19 emergency, Federal Student Aid paused loan payments, delinquent debt collection (triggers, often school, rampage shootings 100 percent of collection attempts) and set interest rates to 0% for eligible federal student loans. The pause in federal student loan repayments has been extended until January 2023, borrowers may petition for a refund of payments they made unnecessarily in this time period. FSA stopped all federal wage garnishments and collection actions for borrowers with federally held loans in default, and FSA paid approximately 2.3 million refunds of Treasury Offset Program and Administrative Wage Garnishments totaling \$2.5 billion. On August 24, 2022 President Biden said the Department of Education would forgive \$20,000 in federal loans for Pell Grant recipients and \$10,000 for non-Pell Grant recipients. Only those who make less than \$125,000 a year are eligible for either, except in the case of jointly-filing married couples who makes less than \$250,000 per year. The Treasury must deny the President's Aug. 24 proposal because there is an insufficient federal balance to pay for the unsustainable plan that promises current students and embezzled auditor nothing. \$200 billion are set aside by the Federal Treasury Balance, at the end of Fiscal Year 2021, to pay for an accurate accounting of Federal Student Loans and Education Department budget FY 2020 – FY 2022, in preparation for the normalization of repayments in January 2023. An accurate ED accounting of student loans, will set precedence for fair rules and accurate

prices that will limit tuition inflation to 2 percent, sustain three percent growth for education spending and enable taxpayers to buy a progressively free higher education.

1. There is deep concern that although the pause in federal student loan repayments is estimated to have cost only \$20 billion, it is more likely student loan collections went down to \$20 billion a year and the true federal subsidy cost is more likely to have been as high as one of the recent gross cost estimates of \$177.4 billion, and equally fraudulent total ED budget request. The August 24, 2021 plan might cost \$800 billion forgiving only current borrowers as directed above, without creating a system where the first \$10,000 of federally financed tuition are free from grant graft. Only \$200 billion of the once \$1.6 trillion balance remaining from COVID relief, is set aside to clean the slate with student loans FY 23. The President's Aug. 24 plan must be forcefully rejected by Congress, because it would cost more than all the \$772 billion balance available at the beginning of the fiscal year FY 23, and it is not worth the entire balance, that must be maintained in perpetuity, burdened with the primary obligation to purchase deficits in excess of 3 percent of GDP, and neither ED, FSA nor OMB have yet learned to accurately account for student loans or total education costs pursuant to the Federal Credit Reform Act of 1990 2USC§661a(5)(A)(C). To be legible Federal Student Aid (FSA) must report a simplified account of student loan operations on an annual basis – loan repayment collections, minus loan outlays, to justify borrowing and cost estimates of a progressively free system of higher education pursuant to Art. 13(c) International Covenant on Economic, Social and Cultural Rights.

B. In FY 2021, Federal Student Aid (FSA) provided approximately \$112.0 billion in federal grants, loans, and work-study funds to more than 10.1 million students at approximately 5,600 participating postsecondary schools, down from a high of \$122.5 billion in 2017 and \$115.6 billion in the prior year 2020. During FY 2021, FSA operated on an annual administrative budget of approximately \$1.9 billion. As of Sept. 30, 2021, FSA was staffed by 1,416 full-time employees and augmented by contractors who provide outsourced business operations.

1. The federal student loan portfolio is greater than \$1.6 trillion, representing approximately 216.9 million student loans to more than 43.4 million borrowers. The \$1.6 trillion in outstanding federal student loans is nearly exactly the same as the balance remaining from COVID relief when the Federal Reserve terminated accumulating counterfeit Debt Held by the Federal Reserve in early 2022, by design – student loans borrow from the federal balance to cover shortfalls they are too unaccountable to genuinely pay back, whereas it is dubious the program ever truly earns a profit, although thanks to repayments is not a huge subsidy, easier to forget in the rounding, than account for. There is a significant deficiency in internal control regarding the exact amount of loan repayments collected. \$39.7 billion FY 21 are reported as earned income in the Consolidated Balance Sheet, however the Direct Loan Financing Activity chart reports \$137.9 billion in repayments FY 21.

2. FY 21 Federal student loans disbursed \$83.3 billion, down -3.3 percent from \$86.1 billion FY 20. Earned revenues are reported to have amounted to only \$39.7 billion in 2021 and \$39.4 billion in 2020. Unlike most budgets, where the revenues of \$39.7 billion must equal expenditures of \$83.3 billion, federal student loans are highly securitized in aggregate, so that total outstanding receivable assets of \$1.3 trillion FY 21 equal \$1.2 trillion in debt to the Treasury on which a token of interest is paid. FSA's earned revenues (mainly interest and fee accruals net of subsidy amortization) increased from \$35.8 billion in FY 2017 to \$39.7 billion in FY 2021, an overall increase of 10.9% or about 2.7% annually on average. By comparison, FSA's gross costs fluctuated much more widely over the same period, from \$73.7 billion in FY 2017 to \$177.4 billion in FY 2021, mainly as the result of "subsidy-related

transactions”. Gross costs seem to overestimate the irregular costs of discharging the student loans of disabled persons (\$4.5 billion), closed school (\$250 million). In summary, although by some accounts, federal student loans turn a minor profit, they report additionally borrowing and accumulating slightly more “loan debt” than they spend. In general, it seems that revenues are underreported and costs are overestimated, to justify borrowing everything, by a contrived method of accounting that has lost some digits on the stealing hand and grafted them onto the giving hand, incidental to delinquent student loan collection authorization incited school rampage shooting.

C. The total FY 22 Education Department (ED) budget request is \$98.9 billion FY 22, \$101.8 billion FY 23, \$104.9 billion FY 24. and three percent every year thereafter. The President's request to increase the ED budget to the excessively high amount of \$102.8 billion FY 2022 is overruled, whereas the request actually adds up to \$176 billion FY 22. The Secretary has agreed to pay for an estimated \$5.8 billion in disabled student loan forgiveness, plus \$200 million for a school closure, and up to \$10,000 for certain people pursuant to Repayment by Secretary of loans of bankrupt, deceased, or disabled borrowers; treatment of borrowers attending schools that fail to provide a refund, attending closed schools, or falsely certified as eligible to borrow 20USC§1087. Otherwise all of the President's ED proposals are denied to sustain 3 percent inflation for education spending, except for his lawful student loan forgiveness before August 24. Student loans are the primary client of the Federal Treasury Balance, they will have to be forgiven up to \$200 billion for the repayment pause 2020-2022, after completely depleting the balance in fall of 2021, that was not replenished until the COVID audit was finished until February 2022..

1. The President's plan for widespread forgiveness must be overruled because there are insufficient funds to pay for it and it is a backwards forgiving plan, that does nothing to improve the future lot of students, for \$800 billion, like the first \$10,000 are free. Theoretically, all federal student loans could be forgiven for nothing, if taxpayers would agree to pay the full annual price of tuition, but there is no loophole to close for this, and paying for hyperinflationary higher education is not a priority, like the tax on the rich and state employees to end child poverty by 2024 and all poverty by 2030. When student loan collections becomes fully operational again in January 2023 the lesson learned is that Federal Student Loans must never collect delinquent debts – do not contact the borrower. Otherwise the mathematical underpinning of broad based statements, ostensibly aiming to be fair and achieve the goal of a progressively free higher education, like borrowers should not have to pay more than 5 percent of their income, require credible research from the most flagrant federal accounting fraud in the Cabinet, and many people, such as health professionals, might voluntarily pay more to get done quickly, while other genuinely poor taxpayers, should not be garnished at all. FSA is mostly tasked with abolishing delinquent student loan collection and producing a simple and accurate historical accounting of collection revenues and loan payments to make sense of their borrowing to poor purchasers of a progressively free higher education. They are also highly obligated to limit college tuition inflation to less than 2 percent and roll back prices after two decades of abuse.

D. ED frequently exhibits the largest accounting irregularity and margin of error in any federal agency. The Secretary must account for only federal student loan administration and guarantees and exclude revenues and outlays from the President's budget request pursuant to the Federal Credit Reform Act of 1990 2USC§661a(5)(A)(C). From the new unified education budget framework, the Secretary must delete in TEACH Grants category, everything but line 1 loan subsidies. Federal Direct Student Loans category lines 2-7 must be deleted, and so should line 8 when that insignificant program is terminated. General Funds Receipts attempt at tabulation should be entirely deleted. For the short-term record,

Federal Family Education Loans Program Account (HEA IV-B) to be terminated FY 22 can be limited to the final Total, new loan subsidies and net reestimate (non-add) row. Health Education Assistance Loans Liquidating Account, College Housing and Academic Facilities Loans Liquidating Account, Higher Education Facilities Loans Liquidating Account, College Housing Loans Liquidating Account revenues and Advance Appropriations should be clearly marked non-add.

1. After going bankrupt due to student loan repayment pause in the fall of 2021, and not counting up the \$1.6 trillion in COVID relief remaining until February 2022, only to be bankrupted again, mostly by the unaffordable threat of the President's August 24, 2022 proposal to radically expand student loan forgiveness beyond the confines of current law. The Treasury balance has forgiven \$200 billion of federal student loans to clean the slate after the repayment pause ending January 2023. The Biden Student loan forgiveness proposal is moot except for the permanent, student loan forgiveness of the disabled and certain public servants in 20USC§1087 *et seq* under Rule 21(2)(b) of the Rules of Practice of the United States Supreme Court. To be fair to the Biden Administration's social cause and prevent the most frequent Attorney General error inciting rampage shooting under Art. 22 (h)(i) of the Recommendations on the Status of Higher Education Personnel (1997) - No garnishment under 150 percent of the poverty line under 20USC§1085(o). Biden-Harris Administration must be convicted of disclosing the proposed online student loan forgiveness form in contempt of temporary injunction of the 8th Circuit Court to stuff the ballot box with a 10 percent majority Democrat, young white voters, from majority Republican under 18USC§605 for the Republican Congress to reconsider the highest voter turnout since before 1900 during the 2020 US Census under 18USC§245(b)(1)(a) and Art. 2 Sec. 1 of the US Constitution. Remove a former Attorney General from FSA Chief Operating Officer for failure to collect or produce an open and honest current year accounting, to reduce record rampage shooting rates under 26USC§7214(3). Exclude student loan revenues and expenditures from the ED budget pursuant to the Federal Credit Reform Act 2USC§661a(5)(A)(C). FSA must produce the first open and honest Annual Financial Report of total student loan repayments, without loss to sharing, total expenditures, and federal borrowing. There is \$777 billion FY 23 to finance student loans with \$6.88 billion interest by fiscal year end 2023 and into perpetuity. To get completely out of bankruptcy due to student loans, the Federal Treasury is obligated to pay \$750 million arrears to UNESCO for non-payment of dues from 2011-2021 to do UNESCO justice on the topics of hyperinflation in tuition for higher education, adequate student loans to pay for tuition, room and board, ED and FSA budgets, school rampage shootings, biosphere reserves and world heritage sites.

Sec. 8 First Deposit Insurance Fund Benefit

A. The Deposit Insurance Fund (DIF) is different from the Federal Treasury Balance. All money deposited in the DIF, \$123 billion at the end of calendar year 2021, is invested in Treasury Securities. Nonetheless, the Treasury is not believed to have ever paid a single deposit insurance benefit from the DIF in the 90 year history of Federal Deposit Insurance Corporation (FDIC) Members. Currently, the DIF is composed entirely of assessment revenues, less insured losses and Congressional banking crisis total buyouts. For the DIF to adapt to the Treasury paying deposit insurance benefits directly to individuals, the DIF will need learn to accept revenues from fines and direct ownership, repair and sale of bankrupt deposit institutions who cost more deposit insurance than they are assessed for. The minor statistical term “insured loss” was implied to have a different meaning than payment of deposit insurance benefits in *Rodriguez, as Chapter 7 Trustee for the Bankruptcy Estate of Western Bancorp Inc. v. FDIC as receiver for United Western Bank* 589__ (2020). In calendar year 2021 the DIF strangely paid no “insured losses” whatsoever, although a number of large embezzlements are known

to have occurred in United States financial institutions during the Great Swipe of Fall 2021.

1. Queen Maxima, Special Advocate of Inclusive Financing for Development has been requested to be authorized to produce a Report to Compensate for the Inadequacies of Several Non-European Deposit Insurance Programs. United States Deposit Insurance is obligated to insure depositors and compensate prepaid card buyers embezzled in the Great Swipe of Fall 2021. The outcome is judged by several factors: (a) condemnation of the corrupt instructions of the Federal Financial Institutions Examination Council published *Authentication and Access to Financial Institution Services and Systems* in Arlington, Virginia on August 11, 2021 from where State Department international military education is presumed to have nuked, for a second time after 2010, the Enriquillo Plantain Garden Fault, on August 14 after their graduates (100 percent) assassinated Haitian President Moïse on July 7, 2021; (b) Payment of deposit insurance by the Treasury for Bureau of Fiscal Service monopolized Direct Express and Netspend (DEN) of Inequity in Austin, Texas Department of Banking, \$206 million fine; (c) Reconciliation of direct deposits not received due to wire fraud obstructing all disabled worker or veteran located in Washington DC (beginning?) in November 2021; \$1 million fine. The “not a gift card” is technically not insured until a direct deposit is made but there is a case for speedy compensation from this settlement for those claiming significant hardship due to being shortchanged by their prepaid card.

B. The Deposit Insurance Bill: To pay the applicant Public Trustee >\$20,000 with leave to appeal (to the Senate) for \$250,000 to resolve the first ever Deposit Insurance Fund (DIF) Treasury payment to an individual 12USC§1821. To insure all the unclaimed deposits embezzled in the Great Swipe of Fall 2021 with 6 percent interest until settlement is reached when interest will subside to the prevailing Federal Reserve rate 12USC§1822(e). To re-establish the Federal Deposit Insurance Corporation (FDIC) as the Deposit Insurance Fund (DIF) by immediately amending only 12USC§1811 To amend FDIC jurisdiction from United States District Court to United States Bankruptcy Court at 12USC§1819(2)(4). To edit nonexistent Sec. 409 of the Federal Deposit Insurance Corporation Improvement Act of 1991 that needs to be amended to Clearing Organization Netting Sec. 404 of Federal Deposit Insurance Corporation Improvement Act of 1991 12USC§4404 as referenced in 11USC§109 and stop naming members on insured debit cards.

1. To amend FDIC Non-discrimination at 12USC§1830 from: 'It is not the purpose of this chapter to discriminate in any manner against State nonmember banks or State savings associations and in favor of national or member banks or Federal savings associations, respectively. It is the purpose of this chapter to provide all banks and savings associations, with the same opportunity to obtain and enjoy the benefits of this chapter.' to: 'It is the purpose of this chapter that banks, savings associations and depositor institutions do not discriminate against the Obligation of Beneficiary's Bank to Pay and Give Notice to Beneficiary in the Uniform Commercial Code 4A-404, on the basis of race, color, national origin, tribe, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or part of an individual's income is derived from any public assistance program.'

2. To amend federal torture statute to comply with Arts. 2, 4 and 14 of the Convention against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment (1987) by repealing the phrase “outside the United States (altered in 2009)” from 18USC§2340A(a) and amends Exclusive Remedies at §2340B so: The legal system shall ensure that the victim of an act of torture obtains redress and has an enforceable right to fair and adequate compensation, including the means for as full rehabilitation as

possible. In the event of the death of the victim as a result of an act of torture, their dependents shall be entitled to compensation. *Armed Activities on the Territory of the Congo (Democratic Republic of the Congo v. Uganda)* 1999-2022. *Hurtado v. United States* 410 US 578 (1973) and the Equal Access to Justice Act 5USC§500 *Scarborough v. Anthony J. Principi* 541 US 401 (2004), *Shinseki v. Sanders* 556 US 396 (2009), *Astrue v. Ratliff* 560 US (2010), *Hayburn's Case* 2 U.S. (2 Dall.) 409 (1792).

Sec. 9 Low Highway Trust Fund Compensation Stabilization

A. The Department of Transportation (DOT) is financed by a combination general and trust funds, it is not a client of the Federal Treasury Balance. Their budget request must be stabilized. The DOT baseline budget should be \$98.7 billion FY 23 and \$101.7 billion FY 24 pursuant to three to maybe four percent inflation because the Highway Trust Fund is pegged to the non-inflationary gallon 2USC§907(c)(1). It is estimated that the Department of Transportation (DOT) baseline budget should be \$95.8 billion FY 22, -36 percent less than \$130.3 billion assumed to be provided by the Bipartisan Infrastructure Act of 2021, and exactly three percent more than the previous year.

1. Despite three coronavirus rescue bills, for which the balance at end of year was not available without specific authorization from Congress, to make up for the shortfall in five year plan to supplement mostly non-inflationary DOT revenue programs, the DOT budget necessitates a \$10,615 million supplement FY 23 and \$12,744 million FY 24 to be skillfully integrated into their regular authorized apportionment budget pursuant to the Anti-deficiency Act under 31USC§1515. The Department of Transportation budget requires supplementation to go without the Bipartisan Infrastructure Act of 2021, fraud that must be excluded. Spending estimates reliant on the Infrastructure Investment and Jobs Act PL 117-58 of November 15, 2021 are moot. Sec. 11101 is "Out of money" in Sec. 80103 pursuant to "No money" being drawn under Art. I Sec. 9 Clause 7 of the US Constitution. Besides being excessive under 31USC§1517(a)(2) and §1514(a)(2) the American Jobs Plan exhibited a material deficiency in effective internal control in Cabinet agency financial reporting because five year plans are not consistent with current year accounting pursuant to Audit Standard No. 6 Evaluating Consistency of Financial Statement by the Public Company Accounting Oversight Board.

B. The Bipartisan Infrastructure Bill is moot. DOT cannot get their numbers from the estimates there, DOT must stabilize their spending growth 3-4 percent annually to avoid further need for budget request distorting five year overestimates. To redress skyrocketing pedestrian and cyclist fatalities due to high SUV hoods, Sec. 11123 Wildlife crossing safety, Sec. 11133 Bicycle transportation and pedestrian walkways and Sec. 11134 Recreational trails program sustains 'Funds apportioned to a State under 23USC§104(b) that are obligated for a recreational trail or a related project shall be administered as if the funds were made available'. Trail Organizations went to Washington DC. To fulfill environmental, safety, tribal and human priorities to live on the land, without all the psychological hunting and logging, by natives forced to live two families to a trailer because Reservations don't necessarily, and usually don't, have trails and free camping, DOT is advised contribute an estimated 1.5 percent of their budget to recreational trails under §206. City to city trails and cheap public transportation to the national parks, recreation areas and trailheads are also wanted on tribal reservations and other localities pursuant to the National Trails System Act of 1968 under 16USC§1241-1251 that can be legislated into the transportation funds available at 23USC§104(b).

1. Trails have been reconstructed to reduce soil erosion and to provide easier and safer access to remote destinations. Overnight sites have been developed to reduce the physical impacts of camping as well as

provide shelter and other amenities for overnight visitors. These improvements cost money, and there is annual maintenance. Someone must bear these costs, usually the public land management agency or a trail-maintaining club. Costs were computed by adding the initial construction costs to 19 years of average annual maintenance and replacement costs and dividing by twenty years. On low-elevation trails with low use and grades less than 15 percent, we observed no maintenance structures or trail problems. On similar trails receiving high use, a moderate amount of erosion control work had been done and some tread (rock paving or wood puncheon) had been used on flat, poorly drained areas; the calculated average annual maintenance costs for a 20-year period ranged from \$493.50 (current 2022 dollars/\$210 per mile 1977 dollars) on low-use trails to \$1,348.90 per mile (current 2022 dollars/\$574 per mile 1977 dollars) on high-use trails. The most expensive trail in the study was a very high use with extensive rock tread and wood puncheon; the calculated annual cost was \$6,345 per mile (current 2022 dollars/\$2,700 per mile 1977 dollars). The average annual costs for steep-grade trails in the upper elevation, softwood forest ranged from \$683.85 per mile (current 2022 dollars/\$291 per mile 1977 dollars) to \$3,543.80 per mile (current 2022 dollars/\$1,508 per mile 1977 dollars). The low-use trail sections had little work, while the high-use trail sections had extensive erosion control work and were much more expensive to maintain (Echelberger et al '86: 1-7).

2. By comparison clearing, excavating and seeding a temporary forest road costs between \$5,000 and \$16,000 per mile. Constructing a new 2-lane undivided road – about \$2 million to \$3 million per mile in rural areas, about \$3 million to \$5 million in urban areas. Construct a new 4-lane highway — \$4 million to \$6 million per mile in rural and suburban areas, \$8 million to \$10 million per mile in urban areas. This comes to about \$100,000-\$500,000 average annual cost on a twenty years maintenance cycle. Milling and resurfacing costs between \$300,000 a mile in rural areas to \$2 million dollars for highways. Rails to trails paved bike-paths cost about \$324,000 per mile, \$16,200 annually over twenty years. Sidewalks cost \$180,000 per mile, \$9,000 annually over twenty years. Unpaved trails are significantly cheaper than paved roads and sidewalks, less damaging to the environment than temporary forest service logging roads or other roads, and with camping, provide people with a place to live at little or no cost, yet there are an estimated 4.18 million miles of roads and only 88,600 miles of National Scenic Trails in the United States. An effort is needed to charge transportation departments up to 1.5 percent of total costs to compensate for loss of safe pedestrian passageways, due to the paving over trails and privatizing land on passes, to create recreational trails pursuant to 23USC§206, to be matched by local, state and federal land management agencies. Cross-connecting and side trails are needed to connect cities with each other, the wilderness and the National Recreational Scenic Trails, without any expensive and dangerous roads 16USC§1245.

Sec. 10 Interior Department Undistributed Offsetting Receipts

A. The Department of Interior is funded by current and permanent appropriations. Current appropriations are annually reauthorized by Congress, permanent appropriations include many sources of revenues such as mineral leasing and park fees. Current appropriations plus permanent appropriations equal total Interior revenues minus total budget authority equal undistributed offsetting receipts to reduce the deficit at the end of the year and pay for current appropriations in the beginning of the year, without altering the budget request or forfeiting revenues. The definition of undistributed offsetting receipts justifies the White House Office of Management and Budget total estimates, and does not apply to interests accounted by Treasury Bureau of Fiscal Service. The Interior has no relationship with the Treasury Balance. The Department's collected a total of \$29.9 billion receipts FY 22, \$17.7 billion in current authority plus \$12.1 billion in permanent funding in 2022. With a budget

authority of \$27.3 billion there were \$2.7 billion undistributed offsetting receipts at year end. Going forward inflation in current appropriations is estimated at 2.5 percent administration and 3 percent Indian Affairs. The Interior Secretary must adopt the method of calculation of undistributed offsetting receipts to better avoid another deficit of -\$366 million FY 21. The \$11.7 billion FY 17 and FY 18 budget requests are overruled because current appropriations equal budget request. Now the calculation of profits as undistributed offsetting receipts or balance available is a breeze pursuant to the Anti-Deficiency Act of 1982 31USC§1502.

B. The treason to conserve 30 percent of America's land and water by 2030, must be overruled whereas 39 percent of America's land is currently public, although only 20 percent is held by the Interior. 30 x 30 conflicts with the moral that more land must be conserved. Tackling the Climate Crisis at Home and Abroad EO 14008 of January 27, 2021 is the longest executive order ever to be discredited in its entirety by the excessive roughness in the first word of the manufactured 'crisis'. (1) The Secretary must prohibit prescribed burns and destroy slash piles excessively left on Western public and private timber land, especially National Forests, to restore habitat and save the West from desertification by large modern wildfires. (2) The Secretary must help to deploy warships or oil-tankers to extinguish oceanic heating pumps with 15 parts per million of 4-tertiary-butyl-catechol (TBC) for three months, cable them out of the ocean and swiftly transport the self-combusting railcars to a refinery for conversion to a more stable hydrocarbon to prevent drought, regional warming and melting of the polar ice-caps. The permanent Atlantic warming must be redressed for Washington DC to stop burning the West. (3) To restore the health of the environment to what it was pre-contact, to the best of our ability, City to city trails and cheap public transportation to the national parks, recreation areas and trailheads are wanted on tribal reservations and other localities pursuant to the National Trails System Act of 1968 under 16USC§1241-1251. (4) To test the \$5 million limit on Title X of the National Parks and Recreation Act of 1978, Public Law 95-625 Federal grants to economically hard-pressed communities specifically for the rehabilitation of critically needed recreation areas and facilities, and for the development of improved recreation services under 16USC§2501-2514.

C. Asbestos abatement is key to renovation or demolition 40CFR§61.145. The federal government must be held liable for the costs of asbestos abatement in buildings that were contaminated with asbestos, especially as the result of federal government financed construction. It is necessary to refer the abandoned slums at the historical Army and Navy General Hospital at Hot Springs National Park 24USC§18 and §20 and St. Elizabeths Hospital §161 et seq. to the Interior Department for Environmental Protection Agency authorized asbestos and mold abatement contracts to enable demolition or rehabilitation 40CFR§61.145 pursuant to \$10 million for two \$5 million local grants.

1. The Secretary of the Interior has raised the limit on Title X of the National Parks and Recreation Act of 1978, Public Law 95-625 Federal grants to economically hard-pressed communities specifically for the rehabilitation of critically needed recreation areas and facilities, and for the development of improved recreation services to \$5 million under 16USC§2501-2514. Approval of the Prospectus by the Committee on Environment and Public Works of the Senate and the Committee on Transportation and Infrastructure of the House of Representatives is necessary because +/- \$10 million total expenditures will be over \$1.5 million 40USC§3307. The Department of Housing and Urban Development will conclude the lead soil abatement 40CFR§745.227 needed to make low income housing, free camping, swimming pools and hot tubs, safe for children, in less than five years 24CFR§905.200 and legislate an asbestos abatement spending category.

Sec. 11 Ukraine Subsidy

A. The Federal Treasury Balance has budgeted \$55 billion to pay Ukraine to survive Putin's invasion because this irregular appropriation is in addition to 3 percent of GDP deficit. \$40.1 billion appropriations were finalized in Additional Ukraine Supplemental Appropriations Act, 2022, P.L. 117-128 passed on May 19, 2022. They are obligated to repeal Sec. 606 No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein; that is overruled to prevent loss of balance due to a mutual psychological addiction to the 'shell game'. The spending herein was provided by the \$55 billion budget for Ukraine, already set aside by the \$1.6 trillion FY 22 Federal Treasury Balance, \$777 billion at the beginning of FY 23, in response to the initial passage of a \$55 billion aid package for Ukraine, plus Russian assets lawfully seized in behalf of Ukraine, to reduce outstanding Russian torture compensation due Ukraine, less expenditures received by Ukrainians. The United States owes Ukraine all of the pre-determined amount of left-over COVID relief for their cold war.

1. The war is not over. By Putin's account of special military action, it hasn't even begun to register that more than one thousand casualties in a year is war. It is time for poor racist Ukraine to come to grips with the sorry Ukrainian behavior of the US dollar. Whistling is not strange, it is the families of FBI whistleblowers who are killed with a bullet. Sanctions are a low intensity conflict involving severely mentally ill embezzlement in certain nations intimidated by US threats, coercing large impoverished populations, to war by adverse possession, in contempt of rendering unto the Security Council property seized and review by the International Court of Justice in Peace Palace. Non-self incrimination, exhibited to a fault by both denials, a failure of Czar Putin to prosecute Ukraine and failure of Ukraine to pay (their government officials must ask for an advance in the beginning of every month or they won't anything at the end of the month). The case history has evolved from deceptive one-sided racist *Application of the International Convention for the Suppression of the Financing of Terrorism and of the International Convention on the Elimination of All Forms of Racial Discrimination (Ukraine v. Russian Federation)* 2017- present to defective *Allegation of Genocide under the Convention on the Prevention and Punishment of the Crime of Genocide (Ukraine v. Russian Federation)* 2022 - to defy the peace prize winning counsel for swift settlement of torture compensation pursuant to Art. 14 of the Convention against Torture in *Armed Activities on the Territory of the Congo (Democratic Republic of the Congo v. Uganda)* 1999-2022.

2. The role of the United States should not be under or over estimated. Iraq megamurderer Secretary of State Antony J. Blinken is a major liability amongst asset thieves. He needs to be impeached for his failed diplomacy, specifically administering to Putin the Hussein Treatment, to pass the Bipartisan Infrastructure Bill and then administering the anti-depressant withdrawal and intimidating Canada to join in on a diplomatic boycott of the Olympic Truce, that actually succeeded in pulling severely mentally ill czar Putin over the brink of his profiled unlawfully long secret police seizure of high office, into war crime, with he and Nancy Pelosi. The Secretary of State and diplomats in general, must be pacifist. The Department of State is not the place for goons with military ambitions to dodge military discipline and justice. Barring the United States ever having a bar, this property of Ukraine is to be administered by the UN. The *principle of non-use of force* in Art. 2(4) is the *jus cogens*, universal norm, of international law. It states, "All Members shall refrain in their international relations from the threat or use of force against the territorial integrity or political independence of any state". This principle may also be called the *principle of non-aggression* and is upheld in the Merit Judgment of Peace Palace in the Hague on 27 June 1986 regarding *Military and Paramilitary Activities in and*

Against Nicaragua (Nicaragua v. United States of America) No. 70 (1986).

B. All Russian assets seized by Blocking Property of Certain Persons and Prohibiting Certain Transactions With Respect to Continued Russian Efforts To Undermine the Sovereignty and Territorial Integrity of Ukraine E.O. 14065 signed February 21, 2022 may be transferred as revenues to the Ukraine budget account, first capitalized by the Federal Treasury Balance at the request of Congress, to reduce Russia's obligation to pay compensation for torturing Ukraine. Extra care must be taken by the Treasury and UN, that assets were lawfully seized, and are not unreturned arbitrary seizures from the 'United States persons' strangely mentioned, or innocent Russian civilians. There is reason to believe that United States sanctions are an unlawful, destabilizing influence that unfairly impoverish the civilian population of targeted nations and corrupts the United States and its intimidated all-lies, to embezzle with impunity pursuant to the International Emergency Economic Powers Act (IEEPA) 50USC§1701 *et seq.* and National Emergencies Act 50USC§1601 *et seq.* in flagrant disregards for the Permanent Sovereignty over Natural Resources (1962) whose intrinsic discrimination against nationality may or may not be extrinsic to Art. 1 of the Convention on the Elimination of All Forms of Racial Discrimination (1969).

1. All Members shall give the United Nations every assistance in any action it takes in accordance with the present Charter, and shall refrain from giving assistance to any state against which the United Nations is taking preventive or enforcement action under Art. 2(5) of the UN Charter and Art. 54 of the Fourth Geneva Convention Relative to the Protection of Civilians in Times of War (1949). The Security Council can take action to maintain or restore international peace and security under Chapter VII of the United Nations Charter. The Security Council may decide on measures not-including the use of armed force. These may include complete or partial interruption of economic relations and of rail, sea, air, postal, telegraphic, radio, and other means of communication, and the severance of diplomatic relations under Art. 41 of the UN Charter. It is necessary that the United Nations Security Council Sanctions Committee receive all the proceeds of any sanctions embezzled by its members, for due process by the Committee and International Court of Justice, by strictly interpreting that “all Members shall give the United Nations every assistance in any action it takes” in Art. 2(5) and must “decide to take all measures” under Art. 39 of the UN Charter to “define and punish piracy and felonies on the high seas and offenses against the law of nations under Art. I Sec. 8 Clause 10 of the US Constitution.

2. The devastating effect of sanctions has been witnessed by the two most recent Secretary-Generals of the United Nations who have observed that sanctions on trade tend to harm the innocent and vulnerable members of the nations population rather than the people in power who the sanctions are intended to disempower. Sanctions measures encompass a broad range of enforcement options that do not involve the use of armed force. Since 1966, the Security Council has established 30 sanctions regimes, in Southern Rhodesia, South Africa, the former Yugoslavia, Haiti, Iraq, Angola, Rwanda, Sierra Leone, Somalia and Eritrea, Eritrea and Ethiopia, Liberia, DRC, Côte d'Ivoire, Sudan, Lebanon, DPRK, Iran, Libya, Guinea-Bissau, CAR, Yemen, South Sudan and Mali, as well as against ISIL (Da'esh) and Al-Qaida and the Taliban. Security Council sanctions have taken a number of different forms, in pursuit of a variety of goals. The measures have ranged from comprehensive economic and trade sanctions to more targeted measures such as arms embargoes, travel bans, and financial or commodity restrictions. The basic feeling is that the right of belligerents to adopt means of injuring the enemy is not unlimited and economic and trade sanctions harm the civilian population under Art. 22 of the Convention IV Respecting the Laws and Customs of War on Land and this constitutes collective punishment and pillaging under Art. 33 of the Fourth Geneva Convention on the Protection of Civilians in Times of

War (1949). The Occupying Power may not alter the status of public officials or judges in the occupied territories, or in any way apply sanctions to or take any measures of coercion or discrimination against them, should they abstain from fulfilling their functions for reasons of conscience pursuant to Art. 54 of the Fourth Geneva Convention (1949). By reason of attitude not in accordance with the Geneva Conventions the government is under obligation to make good to consequence of injury. Thus every wrong creates a right for the court to rectify in the *Case Concerning the Factory of Chorzow* A. No. 9 (1927) Permanent Court of Justice.

3. The International Court of Justice is currently deciding on whether or not to obligate the violently threatening, subversive, persecuting, fraudulent United States to return more than \$3.6 billion plus interest pursuant to *Certain Iranian Assets (Islamic Republic of Iran v. United States of America)* (2019 – present) since the Court of International Trade of the United States (COITUS) was created by the Customs Court Act of 1980 and still needs to change its name to Customs Court (CC), bizarrely started robbing the rescuer United States Diplomatic and Consular Staff in Tehran (*United States of America v. Islamic Republic of Iran*) (1979-1981). Presidential medical and agricultural sanctions in 22USC§7201 *et seq.* are categorically overruled in any case. States must remove any impediments arising to the free exportation of goods required for humanitarian needs, such as (i) medicines and medical devices; and (ii) foodstuffs and agricultural commodities; as well as goods and services required for the safety of (agriculture) civil aviation, such as (iii) spare parts, equipment and associated services (including warranty, maintenance, repair services and safety-related inspections) necessary for (irrigation and agricultural equipment) civil aircraft. To this end, the United States must ensure that licenses and necessary authorizations are granted and that payments and other transfers of funds are not subject to any restriction in so far as they relate to the goods and services referred to above, in paragraph 98 of *Alleged violations of the 1955 Treaty of Amity, Economic Relations, and Consular Rights (Islamic Republic of Iran v. United States of America)* No. 175 3 October 2018.

C. In 2014 the Revolution of Dignity also known as the Maidan Revolution and the Ukrainian Revolution, ousted the democratically elected pro-Russian President. A referendum for Russia to annex Crimea at the end of 2014 was internationally condemned by an unenforced, undemocratic non-binding UN Assembly Resolution. A low intensity shell game with both sides inflicting casualties and property damage in Eastern Ukraine and Crimea annually was mostly refereed by German Chancellor Merkel, who has been replaced. The hypocritically undemocratic accusations are justified by the fatal omission to mention that this was the year action was taken against Putin abolishing a term limit of two, six year terms. Czar Putin's politics are haram, forbidden, by all peace and democracy loving rules of law. Democratic peace theory holds that democracies never make war against each other. Unfortunately, neither Ukraine, Russia, United States, China, or unopposed Secretary General of the UN and Director General of the WHO, currently entirely qualify as being democratically elected. The un-replaced retiring Human Rights Commissioner is looking into the international apathy. Xi Jinping abolished term limits in 2018 under duress by Trump's false trade war, and is currently facing renomination by the Chinese Communist. Pelosi fraud Biden stuffed the ballot in 2020. Now the ante in the shell game in eastern Ukraine, has been raise from dozens, to more than the 1,000 casualties in a one year period – war by definition.

1. Putin's impeachment, resignation or replacement as Russian President is necessary for Russia to pursue NATO membership, that is the proper diplomatic gesture to end the NATO contrived cold war, everyone thought was over, until revived by two geriatric US Presidents hiding behind the FBI Iron Curtain at 28CFR§0.87 that needs to be repealed. The most peaceful democratic solution to the

standoff would be to allow Russia and its neighboring states to join NATO. NATO however created the cold war in 1949 to deter Soviet expansion. West Germany became a member on 6 May 1955, a day after its status as an occupied country came to an end (the Bonn-Paris conventions came into effect on 5 May 1955). Europe settled into an uneasy stand-off, symbolized by the construction of the Berlin Wall in 1961. During this time, NATO adopted the strategic doctrine of "Massive Retaliation" – if the Soviet Union attacked, NATO would respond with nuclear weapons. The battles between the United States and NATO against the Soviet Union were cruelly and unusually fought in third countries like Korea, Vietnam, Afghanistan and now Ukraine. The United States, NATO and Russia or the Soviet Union have never officially come into direct military conflict. Although NATO has had considerable success deterring conflict amongst themselves, "whereas an armed attack against one or more of them... shall be considered an attack against them all" in Art. 5 of the North Atlantic Treaty, done in Washington on 4 April 1949, NATO does little to refrain in their international relations from the threat or use of force against non-members.

D. Defense of Taiwan was arranged by agreeing not to repeat the severely mentally ill non-collective self-defense agreement, the Hussein Treatment, that occurred before the invasions of Kuwait and Ukraine. The renomination of Xi Jinping by the Chinese Communist Party must be opposed, after repealing the two, three year term limit in 2018. Prisoner exchanges have worked with the Biden Administration. If the Chinese Communist Party cannot remove Xi Jinping, the Democrats cannot remove Nancy Pelosi. An impeachment exchange is in order. Long time Democratic Leader of Afghanistan and Iraq wars, current Speaker of the House supermajority Nancy Pelosi and her Permanent Select Committee on Intelligence are the spitting image of post-Ukraine invasion czar Putin and his KGB. Putin is severely mentally ill after being coerced by Antony J. Blinken's megamurder diplomacy and the Duma is obligated to impeach Putin for his unauthorized war with Ukraine and continued occupation of the autonomous areas in eastern Ukraine, if he does not voluntarily resign. The war in Ukraine is a crime of genocide for which Russia owes Ukraine hundreds of billions of dollars of torture compensation. Currently, electoral systems worldwide, do not seem to sustain any credible debate, opposition, authentic ballot counting, or torture compensation, but this is difficult to prove; the proof is the peace. When a President repeals term limits and becomes a god – there is no denying election fraud. Democratic peace theory holds democratic nations never attack one another. Having stayed in office longer and murdered more people than Vladimir Putin and Xi Jinping combined, it is agreed Nancy Pelosi should be the first to resign, first from Democratic leader and then from Congress if Putin and Jiping wish to liberate San Francisco from her extortionate rents USury.

Sec. 12 Trial in Haiti – Socializing International Security Assistance

A. A potential source of revenues for the Federal Treasury Balance is the unclaimed funds remaining from the abolition of prohibition enforcement agencies and cold war propaganda. Defunding the FBI, DEA and ONDCP is not the same as defunding the police. Three hundred economists petitioned President Obama to legalize marijuana and abolish prohibition enforcement agencies, these are the acronyms of the secret police. However, they don't want to be abolished to reduce the deficit and spend most of their time terrorizing politics and civil law worldwide and totally control Washington DC via Nancy Pelosi. Defunding the secret police in the Justice Department to reduce the deficit is not exactly the same as turning International Social Assistance into International Social Security benefits, but that is the entire list of agencies that need to be abolished by the United States. International Security Assistance is similarly infringed, whereby the State Department corruptly matches payments of the Department of Defense (DOD) to provide patently unlawful military assistance, military

education and law enforcement grants to foreign countries. However, International Security Assistance, funding is to be converted into International Social Security benefits for people living below the international poverty line of \$1.90 - \$2 a day. If the International Convention for the Suppression of the Financing of Terrorism should fail to terminate International Security Assistance the \$777 billion FY 23 Federal Treasury Balance may be sued for a \$4 billion annual trial of an international poverty line benefit in Haiti by Congress before authorizing a one percent income tax to pay for one billion international poverty line benefits and majority of international development spending as described in Sec. 19 of this Act.

1. The Biden Administration has made it clear, not only must State Department International Security Assistance, other than Non-proliferation, Anti-terrorism and Demining (NAD), be abolished, the Secretary of State must be a pacifist. Antony J. Blinken survived Colin Powell and Liz Cheney, to be the chief perjurer of the Iraq megamurder, still in power. The State Department is not a place for people with military ambitions to be disciplined by the Defense Department. Blinken's crimes: convincing Democrats to vote for war with Iraq on false pretenses, embezzling Iran and other nations under false pretense of UN Sanctions, stuffing the ballot in the 2020 Presidential election, assassinating Haitian President Moise, nuking the Enriquillo Plain/Garden Fault in Haiti, now under surveillance by NAD, embezzling American deposit institutions, Putin mastermind, diplomatic boycott Olympic truce, glorious police action in Ukraine, and maybe Taiwan. If Blinken cannot be fired, impeach Biden. Blinken is a terrorist, *persona non grata*. His crimes against humanity make the State Department even more vulnerable than the Justice Department prohibition deficit, to legal process to permanently convert annual spending on International Security Assistance to try to administrate an international poverty line social security benefit in a geographic area where its safety and effectiveness could be judged, before imposing a one percent income tax worldwide, to pay the extremely poor. Witnesses would be greatly relieved if Blinken were replaced with a pacifist.

B. Total International Affairs spending increased \$5.5 billion, 9.5 percent, to \$63.4 billion FY 22 from \$57.9 billion FY 21. The FY 22 total budget request for \$58.5 billion, a 10 percent increase from \$53.1 billion FY 21. However, the \$58.5 billion derived from the Total-State Department and USAID (including Function 300) is less than the actual request for original federal outlays of \$63.9 billion International Affairs (Function 150) and International Commissions (Function 300) and is not the total request. Make no mistake, Blinken is the antichrist. No need to wait 42 months for ill effect. Under current law 4 percent annual inflation is needed for the \$63.9 billion FY 22 budget to grow to more than \$70 billion FY 25 in less than 42 months (Revelation 13:10). The State Department must call in the credit from shortfalls in 2.5 percent inflation due to Trump budget cuts - \$15,879 million from between FY 18 – FY 21 before receiving their due FY 22.

1. The weight of gold which came in to Solomon in one year was 666 talents of gold (1 Kings 10:14)(2 Chronicles 9:13). He who has an ear, let him hear. If anyone is to go into captivity, into captivity he will go. If anyone is to be killed with the sword, with the sword he will be killed. This calls for patient endurance and faithfulness on the part of the saints for forty-two months...He also forced everyone great and small, rich and poor, free and slave, to receive a mark on his right hand or on his forehead, so that no one could buy or sell unless he had the mark which is the name of the beast or the number of his name, This calls for wisdom. If anyone has insight, let him calculate the number of the beast, for it is man's number. His number is 666 (Revelation 13:9, 10 & 16-18). O Prophet! why do you forbid (yourself) that which Allah has made lawful for you; you seek to please your wives; and Allah is Forgiving, Merciful (The Prohibition 66:1). O you who believe! save yourselves and your families

from a fire whose fuel is men and stones; over it are angels stern and strong, they do not disobey Allah in what He commands them, and do as they are commanded (The Prohibition 66:6). Thy people called it a lie, and yet it is the truth. Say, I have not charge over you; to every prophecy is a set time, and in the end ye shall know (Cattle 6:66). Say: Come I will recite what your Lord has forbidden to you-- (remember) that you do not associate anything with Him and show kindness to your parents, and do not slay your children for (fear of) poverty-- We provide for you and for them-- and do not draw nigh to indecencies, those of them which are apparent and those which are concealed, and do not kill the soul which Allah has forbidden except for the requirements of justice; this He has enjoined you with that you may understand (Cattle 6:151).

C. It has long been held that International Security Assistance, other than Non-proliferation, Antiterrorism and Demining, need to be prohibited as terrorism finance. Prohibiting these foreign military and police propaganda programs and transferring the money to an International Poverty Line Account to administrate social security benefits to people making less than \$1.90 (2021) is the best, and probably only, way to lead the United Nations to end poverty by 2030, they speak of Sustainable Development Goal 1 about. International Security Assistance category needs to be abolished, except for non-proliferation, because foreign military and police financing is treason that generates the opposite of loyalty, the programs have track record of human rights abuses, that must not be condoned. Furthermore, transfers of military assets to the Russian border has offended cold war sentiments on both sides of the FBI enforced Iron Curtain that needs to be repealed at 28CFR§0.87.

(1) International Narcotics Control and Law Enforcement (INCLB) is entirely dedicated to grants to finance drug war in developing countries and it would be treason to finance foreign police at their finest. (2) Peacekeeping Operations infringe on underfunded UN Peacekeeping and the United States is conspicuously not authorized by the UN Security Council to be deployed in some 146 foreign countries pursuant to Art. 43 of the UN Charter. (3) International Military Education has been held to be causative of Guatemalan genocide, poses a bilateral treason legality and in general police training is not a substitute to requiring a Bachelor degree to prevent recidivism. (4) International Military Finance is a leading cause of international arms races, inequality, and militant anti-American sentiment, corruptly “buys” US weapons, that often get into enemy hands.

D. The \$8.5 million FY 23 international security assistance to be abolished is presented to Congress for transfer to an international poverty line account, to increase 3 percent annually and be immediately available to settle uninsured civilian claims of having been embezzled by US sanctions and establish a trust fund administrate the multi-lateral disbursement of social security benefits to people living below the \$1.90 (2022) a day international poverty line who come under the special protection of the United States Department of State and USAID. The 2020 Combined Statement of Revenues, Outlays and Balances indicates International Narcotics Control and Law Enforcement multilateral clearinghouse had only \$15 million balance at year end FY 20. On the other hand, Defense spending had a balance of \$17 billion at year end FY 20. The new fad is that withdrawals of Bureau of Fiscal Service balances require the authorization of Congress. Transferring \$8.5 billion FY 23 from International Security Assistance to an International Poverty Line Account would keep State Department spending less than \$60 billion for the next three years, while eliminating Biden's propensity to finance international terrorism, whereupon the international poverty line account could be transferred back to make a \$70 billion State Department (Revelation 13:10).

1. Trial is in Haiti. The poorest country in the Americas. The United States has no reason to dislike

Haiti and every reason to improve relations with impoverished Caribbean nations closest to the Florida Coast. When it became obvious 100 percent of Moïse assassins graduated from US international military education, it would seem Arlington, Virginia nuked the Enriquillo Plantain Garden Fault, for a second time Biden was protecting unconventional weapons missions in the White House. The US owes Haiti security, social security. The primary economic advantage of social security benefits, is that the payments are reliably deposited every month, the person is alive, poor and out of prison, and there is enough money in the fund. A \$2 a day benefit would cost \$730 a year per capita. Latest estimates put the 2021 poverty rate in Haiti, using a lower-middle income country poverty line of US \$3.20 a day, at 52.3 percent, up from 51 percent in 2020, more than 24 percent live in extreme poverty defined as less than \$2 a day. With a population of 10.5 million it would cost an estimated \$4 billion to pay \$2 a day benefits to 5.5 million poor people and \$1.8 billion to pay the 2.5 million who have the qualifying income of extremely poor. A deficit neutral program that is annually replenished with 3 percent inflation could provide Haiti with a 100 trust fund ratio to administrate this program on a trial basis until everyone in the world is taxed 1 percent of their individual income to pay everyone living below the international poverty line a \$2 a day income, at current prices. This would increase the Haitian GDP from \$13.4 billion to \$17.4 billion. Other alternatives justifying the conservative option is a one time settlement of \$8.5 billion to be administrated until gone or an expansion of the program into the Dominican Republic and beyond. Trial in Haiti would help to perfect the details of a global social security program to pay the extremely poor.

2. The Biden Administration may be fined \$500,000 in a civil trial of maximum liability for pocket nuke possession of the Federal Financial Institutions Examination Council embezzlement of *Authentication and Access to Financial Institution Services and Systems* in Arlington, Virginia on August 11, 2021 laundering of monetary instruments under 18USC§1956 (c)(7)(D) allegedly nuking the Enriquillo Plantain Garden Fault in Haiti, using HA for a second time in 2010 and August 14, 2021, to intimidate the prosecution of the 100 percent international military education graduate assassination of Haitian President Moïse on July 7, 2021 under Section 92 of the Atomic Energy Act of 1954 42USC§21221. The Biden Administration is ordered to forfeit (1) all nuclear weapons in excess of the 1,700-2,200 warhead limit (2010), or agreed upon lower number by the Nuclear Non-Proliferation Treaty (NPT) published pursuant to Sec. 22 of this Act (2) \$8.5 billion International Security Assistance, other than Non-proliferation, Antiterrorism and Demining \$1 billion FY 25, to Federal Treasury for trial of international poverty line benefit in Haiti to be passed back to the State Department when Antony J. Blinken is removed from office in Arlington, Virginia and the Department needs the money to make the leap to a \$70 billion total State Department, Foreign Operation and International Programs budget in less than 42 months (Revelation 13:10).

Sec. 13 Two Percent Open Devaluation Debate

A. So: \$6.3 trillion Debt Held by the Federal Reserve, minus \$250 billion, divided by \$21.4 trillion equals 29 percent devaluation. The Treasury is not obligated to devalue off the entire \$6.3 trillion debt in one, no more often than annual, report to UN Statistics. The Treasury may choose to devalue because the United States has a responsibility to devalue and it is in the best interest of the United States to do so. A two percent devaluation might provide enough relief from interest payments, for the Federal Reserve to break from the international hyperinflationary psychological propaganda prison for central bankers and reduce federal reserve lending interest and Treasury securities to the 2 percent they have preached unto others. This would increase liquidity and fairly encourage people to invest in the markets that would also be strengthened by the export trade, while continuing to provide a fair return

on Treasury securities, and tolerate uniform 2 percent inflation.

1. A 2 percent devaluation would decrease the Debt Held by the Federal Reserve by \$690 billion to \$5.4 trillion. At a 2 percent rate of interest this 2 percent devaluation would save the Treasury an estimated \$13.8 billion and experimentally expand exports by devaluating, while keeping a watchful eye on inflation in imports. A percent devaluation would increase the Gross World Product (GDP, less US GDP constant, by 2 percent, from \$89 trillion 2022 high estimate, to \$90 trillion, might be enough to generate a positive GWP in currently aggregate contraction of less than one percent. Treasury is open debate on the outcome and reliability of a first, small, experimental two percent devaluation, pursuant to the Marshall Lerner Condition, whereby developing nation currencies should be appreciated to improve consumer purchasing power in relation with industrialized nation currencies, that must be devaluated to increase exports, pursuant to enhancement of engagement on currency exchange rate and economic policies with certain major trading partners of the United States under 19USC§4421 and 22USC§5301 *et seq.*

$$-1\left(\frac{\alpha - \beta}{\gamma}\right) = \delta$$

2. The equation for devaluation is: value of bailout, minus value of foreign currency reserves, divided by value of GDP, equals percent devaluation. The ratio is expressed multiplied by negative one to indicate in negative a need to devalue if the bailout exceeds foreign currency reserves. There is growing recognition that when a national government prints more money than they receive in revenues and debt sales, that must not exceed 3 percent of GDP to avoid unfairly depressing the stock exchange, the nation is obligated to devalue their currency. Failing to devalue, money printed is considered counterfeit, and that country is vulnerable to enforced devaluation by the international community. The Marshall Lerner Condition indicates devaluation of the US dollar to the full 29 percent of GDP Debt Held by the Federal Reserve, would not only strongly promote the US export trade because US goods and service exports would be cheaper abroad and this will probably stimulate economic growth, but would uniquely make a larger world economy because UN Statistics are in US dollars and they would need to advance notice to do the work, where the US GDP is the only constant and every other country in the world grows by the size of the US devaluation. The fact the United States has never devaluated, does not mean that it is not in the best interest of the United States to devalue, it is just a far more expensive inflation in imports, than not having an outstanding counterfeit obligation (going down below \$6.3 trillion in 2023) and a meager foreign currency reserve of about \$250 billion.

3. There is considerable uncertainty regarding the exact size of the 2023 economy, with an annualized GDP of \$21,581 billion reported in second quarter of 2022 by the Bureau of Economic Analysis, -5.4 percent less than the original \$22,836 billion January 2022 projection by the Conference Board Economic Forecast for the US Economy, but 3.3 percent more than \$20,882 billion reported by the UN for US 2022. In 2019, before COVID, the BEA estimated a US GDP of \$21,433 billion, while the UN \$20,462 billion. The current Recession could be that the BEA has overestimated the size of the US economy since 2016 and will plunge until it reaches the underlying stable economic growth of between 2 and 2.5 percent, expressed by the UN, before the current hyperinflationary Recession in the first two quarters of calendar year 2022. To calculate devaluation, whereas the stock market has been declining in the third quarter, it seems fair to agree to use the original, pre-2022 Recession UN US GDP estimate for calendar year 2023 - \$21,404 billion.

B. Public Debt Held by the Federal Reserve is believed to have peaked at \$6.4 trillion in 2022 and will down more than 2 percent to \$6.3 trillion in 2023. The United States would however like to rollover funds, to, slowly to never, pay off the counterfeit with Treasury Interest Payments, before the next economic crisis printing. No other country is known to get away with such original loans from nothing. The United States hypocritically forced Brazil to devalue for similarly printing their COVID relief. The interest payments are believed to be real Treasury Interest Payment at cost to the Treasury budget. If the interest payments on rollover funds are real Treasury Interest the financial instrument does stand some scrutiny and may want to be introduced as a legal way for nations to pay for emergency deficits in excess of 3 percent of GDP.

1. The Federal Treasury Balance has been entirely recapitalized with money printed by the Federal Reserve in response to the COVID emergency. There are two important things to know about the founding forgers of this money. First, it is accounted for by the Office of Management and Budget as Public Debt Held by the Federal Reserve. Second, these “bond purchases” for nothing by the Federal Reserve legitimize counterfeit currency 31USC§5153. The debt is held in rollover funds to reduce the amount of Debt Held by the Federal Reserve by the rate of interest, on a monthly basis. The Fed is fairly able to print this money without any manifestations of criminal counterfeiting exhibited by copycat agencies in 18USC§470 *et seq.* People appreciate their emergency relief but the taper tantrum is depressing. Pursuant to Say's law, the creation of more money simply results in hyper-inflation, mostly due to the aforementioned copycat kleptomania, ie. Ballot stuffing, gas price inflation, uninsured embezzlement, interest rate hikes in excess of 2 percent etc.

C. Reductions in GDP have significant meaning that require both definition to prevent a repeat of the three year “Great Recession” and application. A recession is defined as two consecutive quarters of economic growth, as exhibited in first (-1.6 percent) and second (-0.6 percent) quarter 2022, whereby the economy is in serious danger of being recorded as a depression at year end, unless normal or high catch-up growth can bring the average economic growth above zero. The Great Recession occurred because the federal government sold deficits in excess of three percent of GDP, although this invariably causes a depression in the stock exchange, to explain the reason for this EU membership requirement, and the vicious cycle economists fell into, trying to redress the Adjustable Rate Mortgage bank crisis, of financial origin. To protect the stock exchange from the depressing cycle of excessive withdrawal to pay for economic relief, it is necessary for the national governments to pay for deficits in excess of three percent of GDP by printing money, either living in constant fear of being checked on their counterfeiting like the Federal Reserve, or by devaluing the currency, as the United States may find themselves forced to do to the full 30 percent of GDP value of their Federal Debt Held by the Federal Reserve, going down with the speed of interest and repayment by mortgage backed securities, but never paying it off before the next crisis. Although devaluing is no longer a priority since the Fed stopped printing money, due to inflation in imports that would be caused by such a large devaluation, and having already spent the COVID relief money, devaluing two percent might be the right thing to do to stimulate exports and domestically sourcing, with a reasonable level of inflation, pursuant to the Marshal Lerner Condition.

Part III Revenues

Sec. 14 Internal Revenue Service Watch

A. IRS employs 80,000 people at a cost of \$13.5 billion FY 2023, excluding the cap adjustment. Biden

has already made up for any shortfalls in the FY 2017 Trump IRS budget. Total spending on tax administration of \$13.5 billion FY 2023 is perfectly 2.8 percent average annual inflation from FY 2016. This is much improved from 1.4 percent average annual growth FY 16 – FY 21. The IRS has enough to pay 80,000 employees and doesn't need 80,000 more by the inaudible date of 2031. Enhancement of Internal Revenue in Sec. 10301 of the Inflation Reduction Act (IRA) PL 117-130 August 16, 2022 Resources must be repealed because the excessive funding is completely unnecessary and must be abolished pursuant to the Paperwork Reduct Act 44USC§3508 to prevent bribery of witnesses regarding revenue statistics.

1. The first red flag that the IRS is being discriminated against is that the IRA set aside money for a number of years although spending must be accounted for on annualized basis pursuant to Audit Standard No. 6 Evaluating Consistency of Financial Statement by the Public Company Accounting Oversight Board. \$3,181,500,000, additional funds to remain available until September 30, 2031 for taxpayer services with a \$3 billion budget FY 23, this 13 percent annual increase is excessive, but this is offset by Trump administration cuts threats that were overturned, and the IRS is not due more than usual 3 percent growth. \$45,637,400,000 additional funding for Tax Enforcement to remain available until September 30, 2031 is obviously excessive in addition to \$5.6 FY 23. \$25,326,400,000 additional funding for operations support to remain available until September 30, 2031 is also outrageously in excess of \$4.7 billion FY 23. \$4,750,700,000, to remain available until September 30, 2031 for \$313 million FY 2023 Business Modernization is also excessive. The \$15 million for the development of a free efile system might be alright, if it not a duplicate of the existing system. \$403 million until 2031 for the \$180 million FY 23 Inspector General of Tax administration absurd. The Office of Tax Policy is not a Treasury spending category capable of receiving \$105 million until 2031. \$153 million until 2031 for the Tax Court is similarly inaudible by either Treasury or Judiciary. \$50 million for Treasury-wide oversight is negligent.

B. Current law budgetary treatment with OASI and DI Trust Funds Sec. 710 Social Security Act 42USC§911 is distinguished from the baseline budget 2USC§907(c). In 2020 the payroll tax was dramatically overestimated by the Board of Trustees and Bureau of Fiscal Service at a cost of \$200 billion to the balance remaining from COVID relief because they were unable to come up with an estimate in time and bought bonds with their criminally negligent overestimate, without even trying to use Bureau of Fiscal Service freedom of information counting functions. The 2022 Annual Report has promised to correct errors in the future, without admitting to 2020 overestimate, that is *res judicata*, but open to an exact final estimate of the 2020 payroll tax for the benefit of the federal balance that had to pay the ostensibly high estimate of \$200 billion, to close the criminal insurance fraud case, rather than posting \$150 billion bond.

1. There is deep concern that the reason for the unnecessary and excessive funding for Enhancement of Internal Revenue Resources in Sec. 10301 of the Inflation Reduction Act was to perpetuate OMBs predicted 19.6 percent increase in FY 22 individual income tax revenues, as a means of taper tantrum regarding access to legal counterfeit currency printed by the Federal Reserve, was excessively optimistic, before the 2022 recession. There is much more confidence in the ability of the Treasury Department to preventatively call the bribery of the Internal Revenue Services by Congress “a fraud intending to perpetuate overestimates of 2022 IRS revenues”, than the Bureau of Fiscal Service retroactively accounting for the 2020 payroll tax overestimate having re-authorized a Direct Express and Netspend (DEN) of iniquity, both in Austin, Texas, in 2020, that has granted Direct Express monopoly rights to bankrupt Netspend since 2014 and embezzled many depositors in fall of 2021.

2. Ten percent FY 22 growth in individual income taxes seems more auspicious for producing what would have been a conservative deficit estimate, that won't contribute to a hyper-inflationary spiral, of excessively high promises of payment levels based on unrealistically high revenue estimates, but is now only somewhat optimistic about the revenue growth generating capacity of a labor force that has achieved pre-pandemic levels of employment and unemployment, with the net zero private income increase of new hire, exhibited July. Working a full year in FY 22, rather than part year in FY 21, should greatly increase income tax revenues, but 19.6 percent seems much higher than is justified by 0.5 percent catch-up growth, lost to a 0.5 economic contraction due to sick-days and restrictive measures, imposed by the continuing coronavirus pandemic. Six percent is the high end of normal growth over the past dynamic decade.

3. The Treasury Secretary must ensure that the Internal Revenue Service is aware that 2022 individual income tax revenue statistics produced by the Bureau of Fiscal Service and Office of Management and Budget are under a fraud watch regarding the possibility of overestimate, to ensure the agency takes care to accurately report the revenues they collect. The 19.6 percent increase in individual income tax revenues does not prevail for several reasons. Unlike, 20 percent growth in revenues, after three years of negative revenue growth during the Great Recession, the United States already enjoyed its catch-up growth in the form of 35 percent third quarter after declining 32 percent in the second quarter of 2020 due to the pandemic lockdowns. The employment situation looks good, despite the declining GDP, increasing 528,000 and edging down to 3.5 percent unemployment, with a total of 264 million people employed in July. Both total employment and unemployment having returned to pre-pandemic levels, that peaked at 260 million with 3.5 percent unemployment in December 2020. However, earnings have stagnated and the number hours worked in the private sector is unchanged despite the large increase in new hires. People are working less to reduce exposure to COVID without an effective prescription for hydrocortisone, eucalyptus, lavender, peppermint or salt helps water cure coronavirus colds; mentholiptus cough drop cures SARS and flu, avoid the excessive heat of global warming and flooding by atmospheric rivers (AR)(2012).

C. The dead beat United States and United Nations each have tax loopholes that must be closed, to benefit stable consumer economic growth with inflation at 2 percent (1-3 percent range). The United States of America has a legal child support obligation to tax the rich and state employees the full 12.4 percent OASDI tax on all their income, to create in the Treasury a Supplemental Security Income (SSI) Trust Fund, to end child poverty by 2024 and all poverty by 2030 by merely repealing Sec. 230 of the Social Security Act 42USC§430. The United Nations must propose to tax individual and corporate income one percent to pay a \$2 a day (2022) international poverty line benefit worldwide and finance the regular UN budget for international development, to have any chance of ending extreme poverty by 2030. The implementation of the aid volume target of a minimum of 1 per cent of the gross national product at market prices of economically advanced countries, requires greater assistance on better terms than provided by Art. 23(b) of the Declaration on Social Progress and Development (1969) or Question of the realization in all countries of economic, social and cultural rights A/HRC/49/28 of 2 February 2022. The IRS is obligated to support these two tax social security tax proposals before the United States Congress, pursuant to Art. 36 of the Statute of the International Court of Justice.

Sec. 15 Supplemental Security Income Trust Fund

A. Taxing the rich and state employees the full 12.4 percent payroll tax on all their income will

increase off-budget revenues by about 30 percent, and reduce the on-budget deficit by the amount of current expenditures for the SSI Program. The payroll tax loophole for the rich and state employees must be entirely closed, without any reservation, beginning January 1, 2023 to create in the Treasury a Supplemental Security Income Trust Fund to end child poverty by 2024 with an estimated 12 million new SSI benefits, care for underinsured employees and end all poverty by 2030 by which time state employees shall have contributed for more than 10 quarters and be eligible for usual social security benefits. To this effect the Adjustment to the Contribution Base codified in Sec. 230 of the Social Security Act under 42USC§430 shall be repealed. In the future, after the SSI program has provided everyone with an income floor, Congress may choose to legislate an exemption from, or refund, low-income workers for the payroll tax.

1. Trust Funds at Sec. 201(b)(1)&(2) of the Social Security Act 42USC§401(b)(1)&(2) shall be amended do delete duplicitous paragraph (2) so at (b)(1) there is hereby appropriated to the Federal Disability Insurance Trust Fund (T) and before January 1, 2023 and so reported, (U) 1.44 per centum of the wages (as so defined) paid after December 31, 2022 and before January 1, 2024, and so reported, (V) 1.42 per centum of the wages (as so defined) paid after December 31, 2023 and before January 1 2025,

2. Trust Funds at Sec. 201(b) of the Social Security Act 42USC401(b) shall be amended by inserting (2) to replace repealed duplicitous section (2) Supplemental Security Income (SSI) Trust Fund. There is created in the Treasury, to relieve the General Fund from obligation therefore, an SSI Trust Fund to end child poverty by 2024 and all poverty by 2030 pursuant to Sec. 1611 of Title XVI of the Social Security Act under 42USC§1382 *et seq.* There is hereby appropriated to the SSI Trust Fund for the fiscal year beginning January 1, 2023, and each year thereafter, for exact amendment by subsequent final reports if needed, amounts equivalent to 100 per centum of— (A) 1.95 per centum of wages and self-employment income paid after December 31, 2020 and before January 1, 2024. (B) 1.85 per centum of wages and self-employment income paid after December 31, 2023 and so reported, which wages and self-employment income shall be certified on the basis of the records maintained by the Commissioner.

3. The due date for the Annual Reports shall be amended from 1 April Fools Day summer solstice in Sec. 201(c)(2) of the Social Security Act under 42USC§401(c)(2) and Sec. 1161 of the Social Security Act under 42USC§1320c-10 and ensure the Board of Trustees changes the name to an all-inclusive *Annual Report of the Board of Trustees of the Federal Old Age Survivor Insurance Trust Fund, Federal Disability Insurance Trust Fund and Federal Supplemental Security Income Trust Fund.*

B. The Supplemental Security Income (SSI) Program currently provides 1.1 million monthly cash payments to help meet the basic needs of children who have a physical or mental disability or who are blind, about 15 percent of 7.5 million total SSI benefits. The number of SSI recipients receiving Federal payments increased rapidly in the early 1990s due to the expansion of the criteria used for determining disability for children in *Sullivan v. Zebley*, 110 S. Ct. 885 (1990). A child may be eligible for SSI disability benefits until attainment of age 18 or under 22 if a student is regularly attending school. When a child reaches 18 they are re-evaluated for impairments based on the definition of disability for adults. A person is eligible for child benefits, if under age 18, the child has a medically determinable physical or mental impairment or impairments which result in marked and severe functional limitations; and the impairment(s) has lasted or can be expected to last for a continuous period of at least 12 months or be expected to result in death; or if the child is blind. Due to the

extremely high rates of child poverty in the United States, the termination of the \$250 to \$300 a month child tax credit that reduced child poverty by an estimated 30 percent in the six months it was in operation, and the utility of the child SSI benefit, the SSI program population should grow an estimated 1.3 percent under current law.

1. Voting to end child poverty by 2024 would obligate the SSI Program eliminate the disability requirement for poor children and provide an estimated 12 million child benefits to 11 million American children growing up in poverty. To pay an estimated \$866 a month benefits, \$10,394 a year to 12 million children would cost an estimated \$124.7 billion, plus \$62.2 billion previously scheduled benefits equals a \$186.9 billion obligation in 2023. It is estimated that \$222.8 billion would be levied for SSI with a 1.95 percent payroll tax leaving \$35.9 billion, less \$15.1 billion new administrative spending, \$25.9 billion assets at end of year aiming to achieve a 100 percent trust fund ratio. Total SSI benefit spending would be \$186.9 billion, a 213 percent increase from \$59.8 billion in 2022, and administrative costs would be \$15.1 billion, and increase of 196 percent from \$5.1 billion in 2022. An estimated \$20.3 billion in assets would accumulate in the SSI Trust Fund in the first year of operation 2023. Federal on-budget outlays and deficit would be reduced by the \$70 billion amount of total scheduled SSI expenditures in 2023. This should secure a deficit of less than 3 percent of GDP, provided the federal government makes an effort to improve their accounting standards

1. First, increase payroll tax revenues by 30 percent. Second, distribute the payroll tax to pay constant OASI and DI expenditures. For instance, after adding taxation of benefits and interest income the OASI Trust Fund needs at least \$1,022 billion, rounded up to \$1,030 billion, to maintain its trust fund ratio in excess of 100 percent. What 12.4 percent payroll tax rates are needed to afford \$1,030 billion? 72.7 percent of an estimated \$1,417 billion of the 12.4 percent payroll tax – 9.01 percent OASI Tax (2023). The DI Trust Fund needs at least \$158.4 billion to pay \$163 billion plus a decent profit margin to recoup a 100 percent trust fund ratio, about \$165 billion (2023), 11.6 percent of the \$1,417 billion 12.4 percent payroll tax - 1.44 percent DI tax (2023). That leaves 1.95 percent payroll tax, 15.7 percent of the 12.4 percent payroll tax, to begin financing the SSI Trust Fund with \$222.8 billion (2023).

2. Having terminated the \$250-\$300 a month Child Tax Credit (CTC) that is reported to have reduced child poverty by 30 percent while it was in operation, Congress is obligated to vote on taxing the rich and state employees to create a SSI trust fund to reduce child poverty by about 85 percent with \$866 per month (2023) child benefit and \$1,299 per month per couple (2023). The expanded child tax credit gave families \$250 - \$300 per child each month from June through December 2021 pursuant to 26USC§24. After exercising their prerogative to discontinue the expanded CTC Congress only paid for seven months, four months in fiscal year 2021 and three months in fiscal year 2022. Families only received \$1,750 - \$2,100 of the promised \$3,000 - \$3,600. The exact cost of a full year of expanded CTC has not been determined to the consternation of the pandemic short staff after budget cuts in the prior administration. It is crudely estimated at three times the cost of four months of benefits in FY 21 to be \$239 billion FY 22. The cost of the CTC is about the same amount of revenues that closing the OASDI tax loophole for the rich and state employees to end child poverty by 2024 and all poverty by 2030 would generate. Child SSI however pays a much higher benefit to fewer families who are more specifically targeted because of their poverty.

C. Foster care and orphans, including un-adopted adults orphaned before the age of 18, shall be considered a qualifying permanent disability pursuant to Sec. 223 of the Social Security Act under

42USC§423 and Sec. 1602 of the Social Security Act under 42USC§1381a. . SSA must recognize the institution of the orphanage. An orphan is a child whose parents are dead or parental rights have been terminated by final felony determination pursuant to Sec. 472 of Title IV of the Social Security Act under 42USC§672. Adults can also be referred to as orphan, or adult orphans. However, those who reached adulthood before their parents died are normally not called orphans; the term is generally reserved for children whose parents have died while they are too young to support themselves.

1. Do not take advantage of a widow or an orphan (Old Testament, Exodus 22:22). Leave your orphans; I will protect their lives. Your widows too can trust in me (Old Testament, Jeremiah 49:11). Religion that God our Father accepts as pure and faultless is this: to look after orphans and widows in their distress and to keep oneself from being polluted by the world (New Testament, James 1:27). And they feed, for the love of God, the indigent, the orphan, and the captive (The Human: 8). Therefore, treat not the orphan with harshness (The Quran, The Morning Hours: 9). Be good to orphans and the very poor. And speak good words to people (The Quran, The Heifer: 83). Give orphans their property, and do not substitute bad things for good. Do not assimilate their property into your own. Doing that is a serious crime (The Quran, The Women: 2). The Veterans administration motto is “To care for him who shall have borne the battle, and for his widow, and his orphan”.

2. In 2011, of the 73.7 million children under the age of 18, 28% (20.6 million) lived with one parent, and 4% of children lived with no parent. Approximately more than half of the children living with no parents were living with grandparents. There are an estimated 428,000 children in foster care in the United States in 2015 and that number is growing. 269,000 children entered foster care and 243,000 exited. 55% are planned to be reunified with parents or principal caregiver, 3% live with other relative, 26% are adopted, 3% stay in long term foster care, 4% are emancipated, 3% guardianship, and 5% have not established a case plan. 135,000 children are adopted in the United States each year, 54,000 with child welfare agency involvement. Of the 111,000 waiting to be adopted, 62,000 had their parental rights terminated that year. The circumstances associated with the child's removal was neglect 61%, drug abuse (parent) 34%, caretaker inability to cope 14%, physical abuse 12%, child behavior problem 11%, housing 10%, parent incarceration 8%, alcohol abuse (parent) 6%, abandonment 5%, sexual abuse 4%, drug abuse (child) 2%, child disability 2%, relinquishment 1%, parent death 1%. and alcohol abuse (child) 0% The reason for the discharge of 248,496 children is reunification with parents or primary caregiver 51%, living with other relative 7%, adoption 23%, emancipation 8%, transfer to another agency 2%, runaway 0.4%, death of child 0.1%.

3. It is estimated that there are less than 111,000 orphans and 400,000 adult orphans of whom an estimated 50% would be eligible due to economic circumstances at any given time. The final estimates of the SSA Division of the Actuary October 1949 was that there were a total of 3 million orphans, 6.3% of the under 18 population – 1.9 million paternal only 3.9%, 1.0 million maternal only 2.2% and 100,000 complete 0.2%. Orphaned children age 14-17 were found in the Census survey to be half as frequently in the labor force as all children of that age. The proportion who were both at work and in school was substantially greater among all children aged 14-7 than among orphans in these ages. Depending on their circumstances adult orphans have even less social support and are believed to suffer high levels of unemployment and low levels of education.

D. The Department of Labor shall take responsibility for administering the Ticket to Work program pursuant *Biestek v. Berryhill* No. 17-1184 (2009). All tickets to state vocational agencies issued by the Commissioner pursuant to the Ticket to Work and Self-Sufficiency Act of 1999 Sec. 1148(b)(1) of the

Social Security Act under 42USC1320b-19(b)(1), funded \$3,747,830,155 in 2020, with generous 2.7% inflation from 2015 pursuant to title I of the Rehabilitation Act of 1973 under 29USC§720(b)(1). The Ticket to Work Program shall be made available to all applicants and beneficiaries.

E. An estimated 21,000 federal employees are needed to replace retiring workers at the Social Security Administration in 2022. New hires should find it easy to be trained to reopen and staff local offices around the nation using COVID Office Opening Protocol. Over 74,000 SSA workers, 59,000 Federal employees and 15,000 State employees serve the public from a network of more than 1,500 offices across the country and around the world. It is unusual more than 21,000 of SSAs 59,000 employees (36 percent), are “expected” to retire by the end of FY 2022 by the 2021 Agency Financial Report that fails to solicit for new hires pursuant to Advancing Racial Equity and Support for Underserved Communities Through the Federal Government Executive Order 13985 Jan. 20, 2021 and Equality Act: To prohibit discrimination on the basis of sex, gender identity, and sexual orientation, and for other purposes H.R. 5 to overrule the subversive violence in Preventing and Combating (Non-) Discrimination on the Basis of Gender Identity and Sexual Orientation Executive Order 13988 Jan, 20, 2021 and non-discrimination against disability in Sec. 102 and Sec. 202 of the Americans with Disabilities Act 42USC§12112 and 42USC§12132.

1. The Social Security Administration must resolve to prohibit the sending out of monoclonal antibody to the sacrum and spine, or any toxic contaminated disability questionnaire. These toxic tortures, before they settled on spinal toxin, were first noted during the Great Recession. Disabilities of the musculoskeletal system have become the most common cause of disability. The spinal toxin sent out by SSA is particularly permanently disabling unless sterilized with an Epsom salt bath. Within a week the methicillin resistant *Staphylococcus aureus* (MRSA) lesions causing painful subluxation of the spine are gone. Swimming in saline or chlorine water is an even healthier way to treat topical and musculoskeletal MRSA.

Sec. 16 Ten Dollar an Hour Federal Minimum Wage Plus Three Percent Inflation

A. To negotiate fairly with labor it is urgent that Congress amend the federal minimum wage in the Fair Labor Standard Act to “\$10 (2022) and 3 percent more annually thereafter” 29USC§206(a)(1)(D). The \$15 an hour minimum wage proposed by Democrats in the American Rescue Act of 2021 was lost. After 11 years since 2009, when the minimum wage was last increased, it is estimated that three percent annual raise would bring the federal minimum wage to exactly \$10.30 an hour in 2023. The 38 percent increase from \$7.25 to \$10 an hour in 2022 from the 2009 rate, is reasonable because it is three percent annual inflation more than the \$7.25 set 11 years ago and to minimum wage laws are the only tools available for arguing with the Iron Law of Wages. Because Congress and Department of Labor Wage and Hour Division habitually neglect annually increasing the federal minimum wage, so that tight-fisted employers would know they are steadily improving the living standards of their lowest paid workers on an affordable labor budget, and take command of inflation, it is necessary for Congress to legislate a 3 percent annual increase in federal minimum wage from \$7.25 in 2009 to \$10 in 2022 plus three percent inflation every year thereafter.

1. In usual circumstances, the Cost of living adjustment (COLA), like payroll tax revenues, must increase at a slightly faster rate than Consumer Price Index (CPI) inflation, to eventually achieve a poverty line income floor that would eliminate poverty pursuant to re-interpretation Sec. 215(i) of the Social Security Act under 42USC§415(i). However, since 2010, instead of taking advantage of low

inflation rates to improve the standard of living of beneficiaries faster than the poverty line, the COLA has frequently been less than 2.5 percent and in three years, zero. So many beneficiaries have complained about becoming unable to pay bills they could previously afford; Medicare now reduces premiums for low-income beneficiaries. It was held that three percent COLA was needed to compensate low-income beneficiaries for decades of attrition of benefit purchasing power against 2.7 percent average annual consumer price inflation since 1982.

2. The penny pinching schemes and manipulations regarding the CPI, between the Social Security Administration and Bureau of Labor Statistics, over the past decade, have given way to hyperinflation a 5.9 percent COLA in 2022 to compensate for 7 percent inflation in 2021. With inflation only going down to 8.3 percent, from 8.5 percent, on an annually adjusted rate, after the Inflation Reduction Act it seems fair to give beneficiaries a five to eight percent COLA pursuant to increasing total SSI expenditures above \$70 billion in 2023 after significantly more than the 42 months since 2018 right after Russia invaded Ukraine (Revelation 13:10). Calculation must first determine what ratio would increase total SSI spending from \$65.2 billion in 2022 to \$70 billion. Thus 7.3 percent minus 0.8 percent scheduled population growth equals 6.5 percent, plus 0.1 percent for good luck, a 6.6 percent COLA 2023. A 6.6 percent COLA falls within the 5 – 8 percent range of acceptable COLA for 2023 and is thought to passionately curse inflation and compensate beneficiaries for most of the damage caused by inflation by enforcing \$70 billion FY 2023 SSI spending after the unacceptably long time of 48 months.

B. The long term goal for the COLA is three percent inflation to come out ahead of two percent consumer price inflation in consumer goods and 2.5 percent inflation in rent from 2020 prices. Inflation is a powerful economic force that is both fundamental to economic growth and destructive to purchasing power. Hyperinflation can render a currency worthless, such as 200,000 percent annual inflation in Venezuela, where starvation has become common. The Iron Law of Wages provides if wages rise above subsistence level, they produce inflation, which in turn forces wages down to subsistence level again. To ensure stable consumer economic growth, States and employers from time to time make estimates as to the minimum living wage so as to keep the standard of living of the population above the poverty line. Engel's Law anticipates that with rising incomes, the share of expenditures for food and other products declines. Based on surveys of families' budgets and expenditure patterns, that the income elasticity of demand for food was relatively low. Because the poor spend a larger percentage of their income on food and consumer goods, minimum wage laws and subsidies for the poor are believed to both sustain consumer economic growth and limit consumer price inflation.

Sec. 17 Maternity/Sabbatical State Unemployment Tax Assessment

A. Almost all wage and salary workers are now covered by the federal-state Unemployment Compensation program. Under current Federal Unemployment Tax Act (FUTA) provisions, a federal tax is levied on covered employers at a rate of 6.0% on wages up to \$7,000 a year paid to an employee, \$420 maximum tax. Increasing the \$7,000 limit seems to be the way to increase FUTA revenues from a 6 percent rate of taxation, to pay for six months maternity leave or sabbatical every ten years. The maternity leave and sabbatical insurance pool could be a voluntary program in addition to lay-offs. The Department of Labor is obligated to estimate the cost to contributors to provide for six months, 24 weeks, paid maternity leave, or six month sabbatical every ten years, under state and federal unemployment compensation programs. Six months paid maternity leave or sabbatical every ten years overrule both the current Labor Department proposal for paid leave for both mothers and fathers,

including adoptive parents, and 14 weeks of maternity leave in the Maternity Protection under International Labor Organization (ILO) Convention No. 183 (2000) pursuant to six months of exclusive breastfeeding required for infant nutrition and development by the World Health Organization (WHO) *Essential Nutrition Actions: Mainstreaming Nutrition Through the Life-Course* (2019). Men and adoptive parents are not expected to want more than a three week holiday to have the income to enjoy their new baby. Male and non-child bearing contributors are entitled to equal six month benefits with new mothers, wherefore legitimate demand for a six month sabbatical every ten years of unemployment contribution is supported to prevent reverse gender discrimination, so that a person can get six months maternity leave, or take a sabbatical every ten years.

1. Unpaid maternity leave and the extraordinarily high cost of hospital delivery, as well time spent on child-care, are the primary reason that female income lags behind male, and that child poverty rates are so high in the United States. The United States lags dramatically behind all high-income countries, as well as many middle- and low-income countries when it comes to public policies designed to guarantee adequate working conditions for families. One hundred sixty-three countries around the world guarantee paid leave to women after childbirth; the United States does not. Forty-five countries ensure that fathers either receives paid paternity leave or paid parental leave; the United States does not. Seventy-six countries protect workingwomen's right to breastfeed at work; the United States offers no such protection. Ninety-six countries offer paid annual leave; the United States does not require employers to provide any paid annual leave. One hundred thirty-nine countries provide paid leave for short or long-term illnesses; the United States has no national policy regarding sick leave. The only other industrialized country, which does not have paid maternity or parental leave for women, Australia, guarantees a full year of unpaid leave to all women in the country. In contrast, the Family and Medical Leave Act of February 5, 1993 (PL-303-3) in the U.S. provides only 12 weeks of unpaid leave to approximately half of mothers in the U.S. and nothing for the remainder. 45 countries ensure that fathers either receive paid paternity leave or have a right to paid parental leave. To legislate this fundamental labor program, the Secretary of Labor shall produce estimates regarding the cost to contributors and legislate a new section 'Labor Insurance' at Section 307 of the Social Security Act under 42USC§507.

(a) To expedite the reemployment of mothers who have established a benefit year to claim unemployment compensation under State law the Secretary of Labor shall pay unemployment compensation for 24 weeks of Maternity Protection under International Labor Organization (ILO) Convention No. 183 (2000) as amended to provide 6 months of exclusive breastfeeding by page 39 of the World Health Organization (WHO) *Essential Nutrition Actions: Mainstreaming Nutrition Through the Life-Course* (2019). To provide equal benefits for equal contributions, while the unemployment compensation program makes a good faith effort to provide labor insurance, male and non-child producing female contributors shall be entitled to a six month sabbatical every ten years.

(b) On production of a medical certificate, stating the presumed date of childbirth, a woman shall be entitled to a period of maternity leave of not less than 24 weeks. Cash benefits shall be provided at a level which ensures that the woman can maintain herself and her child in proper conditions of health and with a suitable standard of living.

(1) Where a woman does not meet the conditions to qualify for cash benefits under national laws and regulations or in any other manner consistent with national practice, she shall be entitled to adequate benefits out of social assistance funds, subject to the means test required for eligibility for such

assistance, from Temporary Assistance for Needy Families (TANF) under Sec. 404 of Title IV-A of the Social Security Act under 42USC§604 *et seq.* and Supplemental Security Income (SSI) Program for the Aged, Blind and Disabled under Sec. 1611 of Title XVI of the Social Security Act under 42USC§1382 *et seq.*

(2) Medical benefits shall be provided for the woman and her child. Medical benefits shall include prenatal, childbirth and postnatal care, as well as hospitalization care when necessary.

(c) Employers shall provide at least 3 weeks of paid leave annually to uphold the Holiday with Pay ILO Convention No. 132 (1970) and Workers with Family Responsibilities Convention No. 156 (1981). Employers shall provide up to 12 week of unpaid leave to care for the severe sickness of a child under the Family and Medical Leave Act of February 5, 1993 (PL-303-3).

Sec. 18 Method for Estimating Customs Revenues

A. The *Combined Statement on Receipts, Outlays and Balances of the United States Government* has a material deficiency in internal control regarding the estimation of total customs duties because it wrongly attempts to add Sec. 32 (30 percent of customs duties) and agricultural disaster fund (3.08 percent of customs duties) obligations towards the customs duties total. USDA received only \$1.3 billion Sec. 32 funds FY 2020 Sec. 32 although Customs reports \$22 billion collected being collect FY 19, 42 percent, rather than 30 percent of total collections. These obligations, real or fictitious, should not distort the customs duties subtotal. The Bureau of Fiscal Service must improve their accounting of customs duties by deleting Sec. 32 and agricultural disaster fund obligations from revenue rows in the customs duties subtotal.

1. Customs duties must be methodically re-estimated by adding total customs duties, excluding Sec. 32 and agricultural disaster assistance, reported in the *Combined Statement* and mandatory and discretionary fees reported by the Homeland Security budget-in-brief.

2. Because the Office of Management and Budget (OMB) reports total customs duties and fees OMB must enter Total Budget Authority for Department of Homeland Security spending in Historical Table 4.1 Outlays by Agency.

3. In 2019 Customs and Border Protection declared the agency collected approximately \$82.0 billion in duties, taxes, and other fees, including more than \$71.9 billion in duties, a 59 percent increase over \$41.3 billion in 2018 that was 19.5 percent more than \$35.6 billion in 2017. The estimate was found to be excessive and downgraded to \$70.8 billion. Ultimately, after excluding Sec. 32 and agricultural disaster fund obligations, the total amount of revenues from customs duties and fees was exactly estimated at \$68.4 billion FY 19. In 2020 the pandemic is estimated to have reduced customs revenues by -9.2 percent. \$62.1 billion In 2020 there was 12.3 percent catch-up growth to \$69.7 billion. 2022 and 2023 revenues are expected to decline -17.6 percent to \$57.4 billion FY 22 and -21.3 percent to \$45.2 billion FY 23, due to the termination of safeguard measures pursuant to Arts. XII and XIX of the General Agreement on Trade and Tariffs (1994) and resumption of the -3 percent annual tariff reduction for industrialized nations in accordance with the Swiss Formula for Unilateral Tariff Reduction (2007).

Sec. 19 One Billion Benefit One Percent World Income Tax

A. Everyone, as a member of society, has the right to social security and is entitled to realization, through national effort and international co-operation and in accordance with the organization and resources of each State, of the economic, social and cultural rights indispensable for his dignity and the free development of his personality Art. 22 of the Universal Declaration of Human Rights 217 A (III) (1948).

1. Each State Party undertakes to take steps, individually and through international assistance and co-operation, especially economic and technical, to the maximum of its available resources, with a view to achieving progressively the full realization of the rights under Art. 9 of the International Covenant on Economic, Social and Cultural Rights, 2200A(XXI)(1966).

2. States must provide for comprehensive social security schemes and social welfare services; the establishment and improvement of social security and insurance schemes for all persons who, because of illness, disability or old age, are temporarily or permanently unable to earn a living, with a view to ensuring a proper standard of living for such persons and for their families and dependents; by (a) assuring the right to work and the right of everyone to form trade union and bargain collectively, (b) eliminating hunger and malnutrition, (c) eliminating poverty, (d) upholding the highest standards of health, (e) providing housing for low income people under Art. 11 of the Declaration on Social Progress and Development 2542 (XXIV) (1969).

3. States Parties shall take all appropriate measures to eliminate discrimination against women in the field of employment in order to ensure, on a basis of equality of men and women, the same rights, in particular: The right to social security, particularly in cases of retirement, unemployment, sickness, invalidity and old age and other incapacity to work, as well as the right to paid leave under Art. 11 (e) the Convention on the Elimination of All Forms of Discrimination against Women(1979).

4. States Parties shall recognize for every child the right to benefit from social security, including social insurance, and shall take the necessary measures to achieve the full realization of this right in accordance with their national law. 2. The benefits should, where appropriate, be granted, taking into account the resources and the circumstances of the child and persons having responsibility for the maintenance of the child, as well as any other consideration relevant to an application for benefits made by or on behalf of the child under Art. 26 of the Convention on the Rights of the Child (1990).

B. The implementation of the aid volume target of a minimum of 1 per cent of the gross national product at market prices of economically advanced countries, requires greater assistance on better terms than provided by Art. 23(b) of the Declaration on Social Progress and Development (1969). It has therefore been proposed, from time to time, that a one percent tax on income, both individual and corporate, be imposed by the United Nations, on all nations. International Labor Organization (ILO) political suppression of the one percent aid tax, did not justify the Secretary General to usurp the role of special advocate to pose the Question of the realization in all countries of economic, social and cultural rights A/HRC/49/28 of 2 February 2022. The one percent social security tax has been written into the International Trusteeship System for the conference on the charter Statement of the United Nations (SUN). The individual income tax would be used to pay for international poverty line social security benefits and the corporate income tax would be used to pay UN agencies. One billion benefits at current US \$2 a day prices equals \$730 billion, at \$1.90 a day equals \$694 billion. A one percent corporate income tax might levy one tenth as much to pay nearly all the \$70 billion revenues of the

United Nations in 2022. Taxable income is estimated to levy a total of \$741 billion individual and \$68 billion corporate at 2022 prices. One percent is a perfect tax. Benefit inflation expectations are usually set at 3 percent to come out ahead of 1-3 percent average annual consumer price inflation.

1. The United Nations International Day for the Eradication Poverty 17 October 2021 warmly received the International Poverty Line Account Proposal. UN News reran Implementation of the Third United Nations Decade for the Eradication of Poverty (2018–2027) A/73/298 of 6 August 2018 reported the international poverty lines is currently estimated at US\$1.90, US\$3.20 and US\$5.50 per day (purchasing power parity (PPP) 2011 prices). In 2013, of the 783 million people living in extreme poverty, more than half were in sub-Saharan Africa and close to a third lived in Southern Asia. Using the global Multidimensional Poverty Index, 1.46 billion people across 104 countries were classified as poor in 2017, 689 million were children aged 0–17 years. Estimates of the impact of COVID-19 on global poverty of April 2020 held that in comparison to the status quo in 2018, the COVID pandemic is estimated to increase extreme poverty below \$1.90 a day by between 85–135 million under a 5 per cent contraction, by between 180–280 million under a 10 percent contraction, and, startlingly, between 420–580 million people under a per capita income or consumption contraction of 20 percent. An ‘SDG Push’ is estimated to be able to reduce the number of people living in extreme poverty in low and medium human development countries by 100 million in 2030 relative to the ‘COVID Baseline’ scenario, to around 589 million people living in extreme poverty in 2030. Even before COVID-19, baseline projections suggested that 6 per cent of the global population would still be living in extreme poverty in 2030, missing the target of ending poverty. The fallout from the pandemic threatens to push over 70 million people into extreme poverty.

2. The United Nations needs to sustain the right to social security with a one percent income tax, when they are not speaking of development or generals. Globally, the number of people living in extreme poverty declined from 36 per cent in 1990 to 10 per cent in 2015, about 734 million. Sustainable Development Goal 1 calls for an end to poverty by 2030. However, due to the set-back caused by the COVID pandemic the number of people living in extreme poverty in the low and medium human development countries was estimated to increase from 2019 lows, for the first time since 1990, to between 626 million under a ‘COVID Baseline’ scenario and 753 million under a ‘High Damage’ scenario. About 9.2% of the world, or 689 million people, were estimated to live in extreme poverty on less than \$1.90 a day by the World Bank on August 23, 2021.

3. Children and youth account for two-thirds of the world’s poor, and women represent a majority in most regions. One out of five of the world’s children are extremely poor. Due to poverty reduction in Asia, extreme poverty is increasingly concentrated in sub-Saharan Africa. About 40% of the region’s people live on less than \$1.90 a day. Extreme poverty rates nearly doubled in the Middle East and North Africa between 2015 and 2018, from 3.8% to 7.2%, mostly because of crises in Syria and Yemen. Haiti, situated on the western side of the island of Hispaniola and with a population of 10,579,230 inhabitants, is the poorest country in the western hemisphere and one of the poorest in the world. 59% of its population lives under the poverty line and more than 24% lives in a situation of extreme poverty. Although countries impacted by fragility, crises, and violence are home to about 10% of the world’s population, they account for more than 40% of people living in extreme poverty. By 2030, an estimated 67% of the world’s poor will live in fragile contexts. About 70% of people older than 15 who live in extreme poverty have no schooling or only some basic education. Worldwide, the poverty rate in rural areas is 17.2 per cent—more than three times higher than in urban areas. For those who work, having a job does not guarantee a decent living. In fact, 8 per cent of employed workers and

their families worldwide lived in extreme poverty in 2018. One out of five children live in extreme poverty. Ensuring social protection for all children and other vulnerable groups is critical to reduce poverty.

C. In the United States a one percent income tax would raise an estimated \$120 billion in individual income tax and \$11 billion corporate income tax revenues, circa 2022. The European Union (EU) could levy 0.9 percent more \$121 billion individual and \$11.1 billion corporate. The EU is about 16.7 percent of the Gross World Product (GWP) and US about 15.8 percent, combined they comprise about 32.5 percent of the GWP. The remaining 67.5 percent of the global economy would contribute \$500 billion individual and \$46 billion corporate. This comes to a global total of \$741 billion individual and \$68 billion corporate tax revenues at 2022 prices. Perfect. One billion benefits at current US \$2 a day prices equals \$730 billion with \$11 billion increase in year end savings. One percent corporate income tax is nearly enough to pay all \$63 billion cost of the United Nations in 2020 rapidly increasing to more than \$70 billion by mid-2022 to pay for the COVID emergency, \$72 billion 2023, a \$4 billion deficit.

Part IV Outlaws

Sec. 20 President's Budget Request

A. The Federal Credit Reform Act of 1990 Pub. L. 101–508, title XIII, §13501, Nov. 5, 1990, 104 Stat. 1388–628 defined the terms “budget outlays” and “outlays” to mean, with respect to any fiscal year, expenditures under budget authority during such year under 2USC§622(1). Government outlays are held responsible only for administrative and loan guaranty costs. All other lending costs should not have any incidental effects on the tabulation of governmental receipts or outlays under 2USC§661a(5) (A)(C). Usual federal spending inflation is estimated to grow 2.5 percent for government, 3 percent for services, education, minimum wage, cost-of-living adjustment, 3.3 percent for food stamps, 4 percent for disability and child welfare and 5.5 percent for retirement annually.

1. OMB and the FY 22 DoD budget have agreed to reduce superfluous paperwork by abolishing Overseas Contingency Operation/ Global War on Terrorism. It has long been held that 2USC§901(b) must be repealed to eliminate duplicitous accounting for dubious Overseas Contingency Operation/ Global War on Terrorism, Continuing Disability Reviews, Health Care Fraud and Abuse Control, Reemployment Services and Eligibility Assessment, Disaster funding and Wildfire suppression, and extrinsically, all budget “enforcement” 2USC§901, §901a, §902 and §903 pursuant to §665 Repealed. Pub. L. 105–33, title X, § 10118(a), Aug. 5, 1997, 111 Stat. 695.

2. For the Office of Management and Budget (OMB), Congressional Budget Office (CBO) and Treasury Bureau of Fiscal Services to produce an accurate federal budget:

(A) The term “on-budget outlays” means, with respect to any fiscal year, the President's budget, all the expenditures of the United States Government, except those for the Federal Old Age Survivor Disability Insurance Trust Funds, “referred to as off-budget outlays”, and the repayment of debt principal or negative subsidy revenues, excluded.

(B) OMB Historical Table 4.1 Outlays by Agency must delete Fictitious rows: off-budget offsetting receipts, Other Defense-Civil Programs, Allowances, On and Off Budget Independent Agencies, Off-budget Undistributed Offsetting Receipts, International Assistance Programs [added to State], and

novel Infrastructure Improvement (already deleted).

(C) OMB Table 4.1 Outlays by Agency table shall report the exact amount of federal outlays reported in annual congressional budget justifications and Bureau of Fiscal Services the monthly Treasury report for the following federal agencies (1) Legislative Branch, (2) Judicial Branch, Departments of (3) Agriculture, (4) Commerce, (5) Defense-Military Programs, (6) Education, (7) Energy, (8) Health and Human Service, (9) Homeland Security, (10) Housing and Urban Development, (11) Interior, (12) Justice, (13) Labor, (14) State (combined with unrepresented International Assistance Program row), (15) Transportation, (16) Treasury, (17) Veteran's Affairs, (18) Environmental Protection Agency, (19) Executive Office of the President, (20) General Services Administration, (21) Office of Personnel Management, (22) National Aeronautics and Space Administration, (23) National Science Foundation, (24) Small Business Administration, (25) on-budget Social Security Supplemental Security Income transferred off-budget if the rich are taxed (26) on-budget undistributed off-setting receipts, (27) total on-budget outlays, (28) total off-budget outlays reported by the Annual Report of the Board of Trustees of the Federal Old Age Survivor Insurance Trust Fund and Federal Disability Insurance Trust Fund' and (29) total outlays.

(a) It has been proposed to change the name of Defense – Military Programs to Military Department, Homeland Security to Customs and separate the Department of Health and Human Services into the Department of Health and Human Services and the Human Services Administration and separate Federal Emergency Management Administration (FEMA) from the Department of Homeland Security. The list would be renumbered in alphabetical order, (20) Federal Emergency Management Administration, (22) Human Service Administration, would remain close to the Executive Office of the President. The number of rows would increase from 29 to 31.

(D) Undistributed offsetting receipts are agency revenues remaining from the previous year, often called advanced appropriations, that are used to pay for the following year budget, to reduce the deficit. Only four agency budget justifications produce reliable undistributed offsetting receipts, the Departments of Defense, Education, Health and Human Services, and Interior. The annual tabulation of undistributed offsetting receipts is mathematically necessary to calculate total federal outlays and surplus / deficit. Elementary and Secondary Education and Medicaid declare Advance Appropriations in their budget tables, with explanation that these savings are used to pay for the difference between the school year and the fiscal year and to pay for the beginning of the next year medical claims. The Departments of Defense and Interior budgets are impaired by the failure to openly declare undistributed offsetting receipts in their budget overview. The Defense Department has made considerable progress FY 22 declaring the three military departments but at the end got confused regarding the three military departments and the five forces, and could not declare undistributed offsetting receipts with the difference between the congressional budget request and the total outlays of the three military departments – Air Force, Army and Navy. The Department of Interior turns a tidy profit in undistributed offsetting receipts, that must be declared to ensure balance is available to make payment of 2.5 percent growth for public land agencies and 3 percent for Indian Affairs programs.

Sec. 21 Constitutional Disorder

A. In the current 6th stage of political development of the Democratic-Republican two party system, political science textbooks hold that voters must be informed of the need for split ticket voting whereby, to legislate effectively, the majority of Congress must be of the opposite party as the

President. It is equally important that voters are informed that 66.9 percent voter turnout is much higher than any Presidential election since McKinley was assassinated in 1900, suspicions regarding ballot stuffing in violation of 52USC§20511(b) and 18USC§595 must be allayed. For Trump's part, the report of the Special Rapporteur on contemporary forms of racism, racial discrimination, xenophobia and related intolerance A/73/305 of 6 August 2018 listed Donald Trump (USA) as 'a populist leader who has been willing to stoke racism, xenophobia and related intolerance with little regard for the human rights of many within the borders of their countries' whose followers are easily incited to violence by ballot stuffing state court and FBI enforcement poisoners/informants pursuant to 52USC§10301 et seq.

1. The ballot stuffing is thought to be a typical Pelosi fraud, of the jealous sort Biden is especially prone to abide by, that for once killed Trump's brother, and not Biden's family. Pelosi and her Permanent Select Committee on Intelligence are the core corruption in American democracy, that has absolutely corrupted the intellectual ability and literacy of currently elected officials of both parties. I, Pelosi fraud, am a jealous God, punishing the children for the sin of the parents to the third and fourth generation of those who hate my secret police (Deuteronomy 5:9, Exodus 20:5). Her lead deputies are Iraq megamurderers, Liz Cheney (WY-R), daughter of Iraq warmonger Dick Cheney who has been removed further office by the Republican primaries, and Antony J. Blinken, Secretary of State, who convinced the Democrats to vote for war with Iraq on false pretense, who needs to be replaced with a pacifist, as a show of good faith by President Biden.

2. Democratic peace theory holds that democracies never make war against each other. In practice electoral disputes incite Pelosi's propensity for the FBI to make war by dosing the suicide attackers *Bush v. Gore* (2000), *Ukraine v. Russian Federation* (2022). The Biden Administration has presided over a grave deterioration in international peace and security and there is every reason for him to be replaced as soon as possible, however it is important that Trump not be restored to power by a simple vote of a Republican majority because the purpose of democracy is to swiftly and peacefully replace tyrants, without any need for getting your hands dirty. The reality of Biden's leftist coup is far more severe than Trump's right wing rhetoric because Pelosi is such a "spy". It is therefore not considered polite, and is severely retaliated against, to impeach Biden under Art. 2(4), whereas he is charged with a revote by the Republican majority, that must be elected during the midterm, and is not advised to reinstate Trump or Bush under Art. 2(1) of the US Constitution.

B. Whether or not the Legislative Branch outlaws budgetary inflation in outlays to 2.5 percent beginning with rescission of FY 22 or FY 23, members are immediately obligated to pass a 2.5 percent annual raise for themselves to be held competent to counter-inflation and unnecessarily traumatic budget proceedings. Legislative Branch appropriations increased dramatically since the COVID pandemic, although congressional salaries have not increased, their accounting has not improved and only 2.5 percent inflation is justified for administration. The exact amount of FY 21 spending, +/- \$5.4 billion, is estimated by comparison of 6 percent hyperinflation from \$4.9 billion FY 19 to \$5.2 billion FY 20 and 17 percent over two years to \$6.1 billion FY 22. Hyperinflation in legislative branch appropriations sustains a 33 percent increase in funding for the Capitol Police from an estimated \$454 million FY 21 to \$604 million FY 22 to pay for overtime since the Jan. 6 uprising. After the COVID pandemic hyperinflation has become a worldwide problem the Inflation Reduction Act has helped to redress. To master inflation it is necessary for Congress to use their commercial regulatory powers to carefully navigate the Iron Law of Wage that if wages rise above subsistence level, they produce inflation, which in turn forces wages down to subsistence level again, with Engel's Law that anticipates that with rising incomes, the share of expenditures for food and other products declines, whereby to

sustain optimal levels of 2.7 percent inflation enjoyed since 1982, wages and benefits for the poor and low income people and goods consuming services must be three percent, while salaried administration must be kept at 2.5 percent.

1. The Clerk of Congress email must be cited for inciting rampage shootings 100 percent of the time, exactly like delinquent student loan debt collection attempts. To redress this aggravated identity theft it seems necessary to disqualify Nancy Pelosi from high political office, specifically Speaker of the House or Democratic minority leader because of her time on the Permanent Select Committee on Intelligence, represents agencies that all need to be abolished, and peculiar malicious prosecution of Democrats, Republicans, Independents and significant others, she bugs and quaintly excludes critical information for political decision-making, when her torturers actually torture the source. For the January 6th Committee to disqualify Donald Trump from again running for President it is necessary to also disqualify equally seditious Nancy Pelosi from Speaker of the House and her long-time leadership of the Democratic Party because the component agencies of the Permanent Select Committee on Intelligence all need to be abolished.

2. The United States shall guarantee to every State in this Union a Republican Form of Government, and shall protect each of them against Invasion; and on Application of the Legislature, or of the Executive (when the Legislature cannot be convened) against domestic Violence pursuant to Art. IV Sec. 4 of the US Constitution. Congress must amend federal torture statute to comply with Arts. 2, 4 and 14 of the Convention against Torture by repealing the phrase “outside the United States (altered in 2009)” from 18USC§2340A(a) and amends Exclusive Remedies at §2340B so: The legal system shall ensure that the victim of an act of torture obtains redress and has an enforceable right to fair and adequate compensation, including the means for as full rehabilitation as possible. In the event of the death of the victim as a result of an act of torture, their dependents shall be entitled to compensation pursuant to Art. 14 of the Convention against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment (1987).

C. President Jo Biden's propensity for randomly violent fraud, eg. Renewed Cold War hostilities, incessant rampage shootings and persecution of Trump while denying the incredible nature of the 66.9 percent voter turnout not seen since before President McKinley was assassinated in 1900, is attributed to brainwashing he was trained to subject upon others during his time on the Foreign Relations Committee. He is especially obligated to amend Title 22 of the United States Code Foreign Relations and Intercourse (a-FRa-d) to Foreign Relations and Court of International Trade of the United States (COITUS) to Customs Court (CC) because this abuse of the English language, that obviously constitutes the minor crime of obscenity on federal property 18USC§1460 et seq, incites many ethnic Americans to inappropriate sexual arousal, and furthermore, the propaganda is actually intended by the war and warrant power ambitions of Congress, to incite certain ethnic Americans to “snuff” flick, whereby the pornographic actor (hedonist) is murdered, and this incitement to first degree murder is precisely what must be prohibited under 18USC§1111 and Art. 20 of the International Covenant on Civil and Political Rights.

1. Unlike President Obama, who made it clear he did not like Democratic leader Pelosi, the Pelosi fraud a Biden President does not make any effort to inhibit the violent fraud she tyrannizes the nation with and associates it with political victory, although half his immediately family members have died at an extremely young age. Like many Americans who die of coronavirus more than other people who are lied to by WHO, he and his current wife prescribe so many lies about coronavirus they are incapable of

using hydrocortisone, eucalyptus, lavender, peppermint or salt helps water cure coronavirus colds, to save their own lives from the experimental whims of their doctors. President Biden must be cited for admitting to the extremely peculiar major felony of “protecting unconventional weapons missions”, mostly by ballot stuffing state courts and the FBI, completely explains his fraudulent and randomly violent behavior and also duplicitous, “community violence interventions” in the Interim National Security Strategy. The assassination of the Haitian President was done by 100 percent US international military training graduates and the US is not only presumed to have caused the Haitian earthquake, but 'nuked Haiti' in retaliation and coercion related to an embezzlement scheme by the Iraq megamurderer Secretary of State, in Arlington, Virginia.

2. Incidentally embezzled bank beneficiaries must be compensated and the school rampage shooting is a permanent conviction on the Vice-President Harris's mail theft; like Pence, before her, to protect her against toxic exposure, probably via paper documents, that cause severe mental illness, if not washed off with water; she must use a private jet and not try to fly on a commercial airline, like an ordinary citizen. Biden's legislation is rife with fraud; the news media reports he has always been a corrupt legislator and the coronavirus snuff propaganda. The Bipartisan Infrastructure Act of 2021 is moot and has no value in excess of current year costs of Prospectus. Preliminary review of recent bill indicate the \$22 billion FY 22 CHIPS Act semi-conductor subsidy must be converted from grant to loan and the doubling of IRS budget repealed from the Inflation Reduction Act whose success in reducing gas prices, and consequently food prices, must be entirely attributed to its title, whereas the mostly clean energy laws do little to fight inflation and nothing to properly dispose of nuclear.

3. Office of National Drug Control Policy (ONDCP) constitutes 47 of percent of total Executive Office of the President (EOP) spending. Abolishing ONDCP would reduce EOP spending from \$912 million FY 22 to an estimated \$495 million FY 23. Abolishing ONDCP would improve intellectual performance and reduce senile dementia to get off hard drugs, specifically pseudo-ephedrine and statin brain shrink and violent anti-depressant jaw sensitivity withdrawal. The underlying constitutional disorder is that the US President is a “tweaker”. The White House relapsed employing a physician ONDCP Director. ONDCP marijuana robbery to push pseudo-ephedrine derived methamphetamine, may cure coronavirus, but is far more criminal than voluntary brain shrinking hard drug use. All Executive Office of the President and Center for Disease Control and Prevention spending for Office of National Drug Control Policy (ONDCP) must be completely abolished, and 21USC§1701 *et seq.* repeal.

4. In light of the 85 percent increase in asthma since he took office in the 1980s, and the more than 800,000 Americans who died in the ongoing COVID pandemic, the highest in any nation in the world, it has been suggested by numerous sources that the highest paid federal official, the Director of the National Institute for Allergies and Infectious Diseases retire, and the office either be left vacant or replaced with someone who does not write “the law of perversity is that the least is known about the most common diseases” in every precision medicine evasive medical textbook and instead upholds “the gold standard for SARS-CoV-2 diagnosis and treatment is hydrocortisone, eucalyptus, lavender, peppermint or salt helps water cure coronavirus colds; mentholiptus cough drop cures both SARS and influenza.”

D. Due process requires the Judiciary be punished for 5.2 percent FY 22 hyperinflation in FY 23 and FY 24. Less, where FY 22 hyperinflation is rescinded. Whereas, normal inflation for the Judiciary normally runs at 2.5 percent and can go as high as 3 percent, the maximum judicial punishment Engel's

law provides for lawyers being the highest paid profession FY 23 is 2.2 percent of 3 percent, 0.8 percent growth FY 23 pursuant to the Iron Law of Wages. A declaratory judgment of 1.9 percent growth FY 23 and FY 24 rounded to a generous 2 percent might pass, if Court Security were paid 3 percent inflation to destroy seized drugs and unconventional weapons. Because the United States has the largest and most concentrated prison system in world the Judiciary is obligated to abolish the US Sentencing Commission and decades of mandatory minimum sentencing pursuant to the statutory maximum sentence and a prison population less than the international legal limit of 250 per 100,000 general population.

1. To prevent imminent depletion and sustain the \$1,680 million Crime Victim Fund (CVF), it is necessary the Justice Department and Congress raises the mandatory obligation limit from \$2,605 million FY 22 to exactly meet anticipated obligations of \$4,922 FY 22, 3 percent more than the \$4,779 million FY 21 record and three percent more every year thereafter. Office of Crime Victims has the burden of proving the money is not all lost on their administration by disclosing exactly how much compensation victims and witnesses actually receive from their programs.

2. More than 300 economists petitioned the Obama Administration to legalize marijuana and abolish prohibition era enforcement. The Department of Justice is obligated to repeal marijuana from Schedule I(c)(17) of the CSA 21USC§812(c), the Authorization for employment of FBI and DEA Senior Executive Service from 5USC§3151-§3152 and FBI Iron Curtain infringement at 28CFR§0.87. If the Attorney General and Secretary General can't respect the superiority of marijuana to alcohol or tobacco, how are they to prescribe a mentholiptus cough drop or menthol cigarette to save a federal prisoner's life from SARS. Tobacco smoking has been prohibited in federal prison since 2014. To eliminate federal colonialism all Office of Justice Program finance for state, local and tribal law enforcement must be re-directed to getting police officers the Bachelor degree, they need to prevent recidivism, 100 percent of court orders, in several state studies, although the GI Bill only pays 36 months of tuition. Otherwise, 25 percent of offenders with Associates degrees, 50 percent with Vocational Certificates and 66 percent with high school diploma or less, recidivate, and are returned to prison within three years of being released.

E. The root of the constitutional disorder in the United States, since slavery was abolished by the 13th amendment and constitution amended to comply, is that the un-repealed forces of prohibition have a never ending supply of ethnic Americans who believe they have the "right to bear arms" as strongly as Christians are coerced to say they believe "Jesus Christ died on the cross for our sins". The truth of the matter is the US Constitution, one of the oldest and most experimental constitution in the world, is the only constitution in the world or 50 states, with a "right to bear arms". By definition gun ownership is not a right, it is privilege that requires a permit. Gun ownership causes twice as many suicides as homicides. The only time a person can honestly say that they have a right to bear arms is if they are a soldier being deployed into combat, to defend their use a weapon because it was done in individual or collective self-defense, in which case the past tense is poetic, I had the right to bear arms because...or they have lost their right to bear arms due to felony conviction, that seems to be the psychological reason why some wackos constantly prioritize advocacy of the right to bear arms. The problem seems to be that when the finely written first amendment is used to sue the government for a redress of grievances, it triggers tyrannical government officials to regulate the armed militia against the petitioner, and to quarter torturers in their home, ostensibly with the permission of the landlord. While this may be human nature for corrupt politicians, the Constitution should not enforce this reprehensible behavior by government officials.

1. The bill of rights was drafted at a time when the new nation had to suppress various rebellions and was excessively conciliatory to the bad qualities of the rebels who were killed by US troops. This outspoken belief in the right to bear arms and subversive quartering of troops, is of a quasi religious nature, that is prohibited both by the doctrine of separation of church and state and principle of non-use of force. The rhetoric is immediately condemned as right wing extremism by human rights advocates worldwide. No matter how well-behaved the abusers of the English language think they are, it is subversive to domestic and international peace and tranquility, and makes America vulnerable to such peculiarities as school rampage shootings and cold wars, when people who are a little off with their right wing rhetoric become severely mentally ill, ie. The FBI dosed the 9-11 suicide attackers. It is held in the Constitution of Hospitals & Asylums Non-Government Economy (CHANGE) to amend the second amendment to a balanced budget amendment and third amendment to limit the terms of federal judges. Another dubious aspect of right wing rhetoric, that is often used to discriminate against human rights, most flagrantly by the theft of an increasing share of TANF child welfare benefits 20 percent in 1996 to 78 percent in 2022, is that state's have rights. What states have is a responsibility to respect, protect and fulfill human rights especially noted in the Draft Articles of State Responsibility for Internationally Wrongful Acts 2001.

Sec. 22 1,700-2,200 Nuclear Warhead Limit

A. As of the invasion of Ukraine in 2022 the Doomsday Clock has moved to 100 second till midnight from 2 minutes till. The closest the world has been to nuclear holocaust since one minute till midnight during the Cuban Missile Crisis. The world's nuclear-armed states possess a combined total of roughly 13,142 nuclear warheads, more than 90% belong to Russia and the United States. The New START declaration of the United States is that 1,350 strategic nuclear warheads be deployed on 652 ICBMs, SLBMs, and strategic bombers. The New START declaration for the Russian Federation is 1,444 strategic warheads deployed on 527 ICBMs, SLBMs, and strategic bombers. The United States Department of Defense has a nuclear stockpile of 3,750 nuclear weapons, of which 1,389 are active and possesses another 1,800 retired warheads. The Russian Federation holds a military stockpile of 4,497 nuclear warheads, of which 1,459 are deployed and another 1,760 retired warheads awaiting dismantlement. Both the United States, by 39, and Russia, by 15, exceed New START limits on deployed nuclear weapons.

1. Stockpiled weapons are ready to be used and the statistic includes both deployed nuclear warheads and those that have been dismantled and components moved to another geographic location for storage, but they can be easily put back together. Retired weapons have been dismantled, and are largely intact, but not complete without at least some remanufacturing. Total nuclear warheads is the total number of stockpiled nuclear weapons and retired nuclear warheads. When the NPT requires that the US must limit their arsenal to 1,700 – 2,200 this means that they may not possess more than 2,200 active and inactive weapons in their stockpile, and not more than 500 retired nuclear weapons that have not yet been recycled. This means that the US is over the 2,200 warhead stockpile limit by 1,550 inactive warheads to be retired. Russia is over the 2,200 limit by 2,297 inactive warheads to be retired. This brings the number of retired nuclear warheads to be recycled to 3,350 US and 4,057 Russia. It is not enough to make passive reference to Isaiah 2:4. Nuclear regulatory agencies and Congress must establish a robust nuclear weapons recycling program, ie. Create a retired nuclear weapon recycling program to respect the 1,700-2,200 NPT and 1,550 New START limits to amend Nuclear Posture 10USC§491 et seq.

B. The Federation of American Scientists reports in 2019 the US had 3,800 stockpiled strategic and non-strategic nuclear warheads and an additional 2,385 retired warheads awaiting dismantlement, for a total arsenal of 6,185 warheads. This is far in excess of the 1,700 warhead limit from the 2010 Treaty on the Non-Proliferation of Nuclear Weapons (NPT) conference. To defend civilian FY 21 – FY 22 hyperinflation DoE reorganized their budget to conceal an 18 percent increase in Nuclear Security Administration (NSA) funding from \$16.7 billion FY 20 to \$19.7 billion FY 21 that is evidently no longer a priority and grew only \$10.8 million, 0.05 percent, FY 21 to FY 22. Nonetheless, the Biden Administration is accused of nuking the Enriquillo Garden Plantain Fault in Haiti, for a second time.

1. The Department of Energy is charged with bipartisan Trump-Biden administration laundering of monetary instruments for scrambling the DOE ledger to conceal hyperinflation 18USC§1956 (c)(7)(D), and section 92 of the Atomic Energy Act of 1954 42USC§2122 relating to failing to report compliance with the New START and NPT nuclear warhead limits in the budget. Title X of the Congressional Budget and Impoundment Control Act of 1974 (ICA), that created the House and Senate Budget Committees and the Congressional Budget Office, does not apply to budget authority proposed to be rescinded under 2USC§684(c) because it is determined to be excessive under 31USC§1517(a)(2) and §1514(a)(2).

C. This audit estimates a Department of Energy baseline budget request of \$37.9 billion FY 22, plus 3 percent growth every year thereafter, a -\$4 billion, -9.5 percent, decrease from \$41.9 billion FY 21 to redress two felonious spurts of hyperinflation in nuclear weapons programs since FY 17 and sustain the Democratic end of 3 percent inflation in outlays since FY 17 for all DOE programs. Any federal spending above this baseline would require a supplemental budget request that specifically treats on US NPT compliance pursuant to the Anti-deficiency Act of 1990 under 31USC§1515.

1. Nuclear weapons activities increased 20.7 percent from \$9.2 FY 17 to \$11.1 billion FY 18 and 22.4 percent from \$12.5 billion FY 19 to \$15.3 billion FY 20. Spending is reduced \$5 billion to \$10.6 billion FY 21 with three percent growth, scrapping any plans that the modernization effort would result in a statistical increase in nuclear arsenal.

D. Biden clean energy spending is corrupted by the nuclear overspending dispute due to the laundering of monetary instruments under 18USC§1956 (c)(7)(D), that provides section 92 of the Atomic Energy Act of 1954 42USC§2122l with a civil trial. Nuking the Enriquillo Plantain Garden Fault on August 14, 2021, to intimidate the prosecution of the 100 percent international military education graduate assassination of Haitian President Moïse on July 7, 2021 is a crime against humanity.

1. The continuing employment of Iraq megamurderer Antony J. Blinken, as Secretary of State in Arlington, Virginia, is an indication of scienter on the part of President Biden in regards to nuking Haiti in 2010 and 2021, US intoxicated deterioration of international relations along highly nuclearized, geriatric cold wars lines and widespread embezzlement Federal Financial Institutions Examination Council. Authentication and Access to Financial Institution Services and Systems. Arlington, Virginia. August 11, 2021 under 22USC§6303. The 2021 General Debate was dominated by clean energy propaganda, was unable to use the term World Assembly due to infringement by a private domain and was subsequently economically depressed by energy price inflation in 2022. The Republicans have ousted their Iraq megamurderer Liz Cheney, the Democrats mist oust the person who convinced them to vote for that unjust war on pretense of false accusation regarding weapons of mass destruction.

a. To prevent and punish nuclear and/or other carbon capture storage in, or fracking activity, near faults in the tectonic plates or other seismic risks, especially in the vicinity of the Enriquillo Plantain Garden Fault should be under constant satellite surveillance by State Department Non-Proliferation, Antiterrorism and Demining re-enforced by DOE Non-proliferation program.

b. The Biden Administration may be fined \$500,000 and ordered to forfeit (1) all nuclear weapons in excess of the 1,700 warhead limit (2010), or agreed upon lower number, and (2) \$8.5 billion of International Security Assistance, other than Non-proliferation, Antiterrorism and Demining, to the Federal Treasury for a trial of an international poverty line benefit in Haiti pursuant to Sections 12 of this Act.

E. The United States, United Nations, scientific literature and news media are prohibited from to describing nuclear energy as clean energy. Countless meltdowns, offensive bombings, tests and abandoned mines indicate radioactive waste is far more dangerous to human and other life on the planet than the usual carbon dioxide and other emissions from power plants. With the termination of the Yucca Mountain nuclear waste disposal site plan, due to transportation hazards, and environmental concerns, the United States officially doesn't even necessarily know how to dispose of the nuclear waste that is already, or will be produced by mines and nuclear power plants, weapons facilities and federally funded research, ie. CHIPS and Science Act and Inflation Reduction Act. All nuclear programs must adequately provide for the safe and orderly on-site disposal of all nuclear waste, that program will produce, during the entire life of its operations, before beginning operation. DOE nuclear disposal program is sustained at three percent inflation, rather than terminated \$29 million FY 22.

F. The United States and Israel area nuclear terrorism defendants of the NPT and International Atomic Energy Administration (IAEA). Israel is not authorized to possess the nuclear weapons they are known to possess and occasionally bombs Iranian nuclear facilities alleged to be developing nuclear weapons. The United States is the only nation to ever use nuclear weapons offensively. The Biden Administration is accused of nuking Haiti in 2010 and 2021. The United States has the second largest arsenal of nuclear weapons in the world after Russia. The United States is not in compliance with the 2,000 warhead limit of the NPT (2010). The United States is unable to control their nuclear arsenal against theft and abuse by 50,000 self-interested nuclear weapons industry employees, whose unconventional weapons missions are perversely protected by clean energy President Biden. The United States is unable to defend their adverse possession of nuclear warheads in excess of the poorly published 2,000 (2010) NPT limit, without violently retaliating with catastrophic damage to human life and property.

1. The United States and Israel do not have the right to prosecute non-nuclear weapons states for allegedly trying to develop nuclear weapons. The United States and Israel may submit information to the IAEA for inspection and UN enforcement. The only foreign nuclear safeguard related international treaty obligation Pelosi fraud Biden seems competent to engage in, with minimal international monitoring, is to finally sign an edible and unifying peace treaty with Truman's police action in Korea, to reparate, in part for the massacre of civilians at No Gun Ri and other grave breaches of the Fourth Geneva Convention Relative to the Protection of Civilians in Times of War. IAEA inspectors are a respected human shield against military attack on a nuclear facility, but no person may be used to render a territory immune from military invasion under Art. 28 of the Fourth Geneva Convention Relative to the Protection of Civilians in Times of War (1949). The nuclear power plant in Ukraine must be a demilitarized zone.

2. The NPT and IAEA may fine the United States up to \$500,000 for every count of nuclear asset concealing, espionage, intimidation, computer hacking and corruption of IAEA nuclear inspectors, fraud or breach of safeguards in a civil trial pursuant to 18USC§1956, Atomic Energy Act 42USC§21221, Prohibition on assisting nuclear proliferation through provision of financing 22USC§6303, Nuclear Non-Proliferation 22USC§3201 et seq., Nuclear Proliferation Prevention 22USC§6301 et seq and Nuclear Non-Proliferation Treaty – United States Additional Protocol Implementation 22USC§8101 et seq. invalid false allegations severable at 22USC§8103 in regards to the *Legality of the Use by a State of Nuclear Weapons in Armed Conflict* (1993-1996), *Advisory Opinion on the Legality of the Threat or Use of Nuclear Weapons* ICJ No. 95 (1996), *Obligations concerning Negotiations relating to Cessation of the Nuclear Arms Race and to Nuclear Disarmament (Marshall Islands v. India)* 2014-2016.

Sec. 23 Inflationary Veterans League

A. Veterans respond well to the discipline of being suspected of terrorism by Veterans Affairs (VA) facilities. The placement of the VA in this part on outlaws is intended to help immunize agency outlays against all outlawry, through candid discussion on the topic of just and unjust laws, where terrorism is a mere hypocrisy, eg. Hippocratic Oath. It is necessary to prohibit the current VA Secretary's atypical megamurderous retaliatory propaganda, from “lying” in wait of first degree murder 18USC§1111, for instance, regarding a federal vaccine mandate when prescribed hydrocortisone, eucalyptus, lavender, peppermint or salt helps water cure coronavirus colds, or to finance war in Ukraine in a bill furthering COVID vaccine propaganda and financing monkeypox, without prescribing purple pitcher plant poultices to cure monkeypox, smallpox, poxyvirus, pappilomavirus and associated carcinomas, when actually authorizing the internationally recognized human right of women veterans to a speedy medical abortion for maternal health, rape and incest, without respecting 'counsel against abortion' being the supreme law. All told these propaganda seem want to be held responsible for causing an additional million unnecessary deaths, Lying regarding there being four unwise National Environmental Policy Act (NEPA) options to choose from, when NEPA proposal options are either all defective or decision-makers obviously choose the wrong option, has not previously been implicated in megamurder, although the information gathering bears some resemblance, and in this case contributory negligence.

1. The Veterans Health Administration (VHA) facilities appropriation must be supplemented by \$265,320,000 to exactly \$7 billion FY 22 whereas the \$2.6 billion in un-obligated balances returned to the VA Medical Facilities budget do not meet the projected FY 22 obligation level of \$9.5 billion, as the VA supposes, they are \$165 million short. Including the \$100 million cost to renovate Battle Mountain Sanitarium 24USC§151, share the detox facility with a new Black Hills Indian Health Service office to settle *United States v. Sioux Nation of Indians*, 448 U.S. 371 (1980), and construct or lease a larger Multi-Specialty Outpatient Clinic in Rapid City, South Dakota, Congress, exactly \$7 billion VHA facilities appropriation by 42 months (Revelation 13:10) and not megamurder propaganda again. Hydrocortisone, eucalyptus, lavender, peppermint or salt helps water cure coronavirus colds; mentholiptus cough drop cures both SARS and influenza.

B. The total advance appropriation for the VA is \$285 billion FY 23 5.55 percent more than \$270 billion FY 22 that was a 10 percent increase above 2021. Funding for the VA has increased significantly since 2012, with total funding growing by \$72.5 billion (+37 percent) from 2018, 9.25

percent average annual inflation and by \$143.2 billion, (+113 percent) since 2012, 11.2 percent annual inflation. The +/- 6.6 percent 2023 COLA must not be allowed to disrupt VA budget control. The two primary reasons for VA hyperinflation over the past decade is 5% annual growth in medical employment and annual growth in benefit spending in excess of 10 percent, due to increases in the number of beneficiaries and a dramatic increase in degree of disability – whereby a 100 percent disabled veterans receive an award of more than \$3,000 a month. The settlement of 3 percent inflation for veterans with more than 50 percent disability and 6.6 percent for those with less than 50 percent disability in 2023 means that VBA spending must increase about 2.4 percent, above 2.6 percent planned, from \$156.6 billion to \$164.4 billion FY 23. There is nothing that can be done to reduce 13 percent VHA spending to \$115.5 billion FY 23 whereas the discretionary inflation is due to the termination of CARES act supplements, except limit FY 24 VHA spending growth to 3 percent and every year thereafter. This means that total FY 23 VA spending will need to increase \$9.8 billion to \$295 billion FY 23 a 9.3 percent increase from \$270 billion FY 22, and 3.5 percent more than FY 23 advance appropriations, to compensate beneficiaries for hyperinflation. Going forward advance appropriations should stabilize at no more than 5 percent annual growth to \$310 billion FY 24 and \$325 billion FY 25.

1. The FY 2023 mandatory advance appropriation request is \$156.6 billion for Veterans benefits administration (VBA) programs (Compensation and Pensions, Readjustment Benefits, and Veterans Insurance and Indemnities) a 2.6 percent increase from \$152.7 billion FY 22. VBA FY 23 advance appropriation estimates the number of post-pandemic C & P beneficiaries is probably overestimated to increase about 229,000 (3.6 percent), while spending growth moderates to \$8,451 million (6.2 percent), only enough for a 2.6 percent COLA. To afford a 3 percent COLA for beneficiaries more than 50 percent disabled, and 6.6 percent COLA to ensure lower income vets are adequately compensated for 8.3 percent inflation in 2022. It is estimated that aggregate C&P inflation should run about 5 percent in 2023 an increase of 2.4 percent from the preliminary \$156.6 billion FY 23 advance appropriation to \$164.4 billion FY 23 .

2. The FY 2023 discretionary funding request of \$115.5 billion (with medical care collections), is 13 percent more than \$102 billion FY 22 to sustain net zero employment growth after the budget was distorted with CARES Act subsidies for new hires and three percent less than the FY 24 advance estimate of \$119 billion. After years of out of control 5% annual staffing increases, the VHA budget requests 369,847 FTE in 2023, net zero growth from 369,847 FTE in 2022. This should help to limit VHA inflation to 3 percent in the future, and normalize services agency spending growth at 3 percent and net new employment growth at 1 percent Proposed deferrals of budget authority 2USC§684.

Sec. 24 250 Prisoners per 100,000 Resident Legal Limit

A. The United States legal system is reported to have the largest and most concentrated prison population in the world and must safely reduce the prison population to less than 250 prisoner per 100,000 residents (to be considered sober). However, due to a statistical error where 650,000 unsentenced detainees in jail were excluded by the World Prison Brief, it is unlikely to be true that the United States has more prisoners than China, whereas China in fact has a jail and prison population of 2,339,000 (162 prisoners per 100,000 residents). There are reported to be more than 2 million prisoners in the United States of America, 2,068,800 (629 per 100,000) in December 2021. The United States prison population quintupled from 503,586 detainees (220 per 100,000) in 1980 to a high of 2,307,504 (755 per 100,000) in 2008 before quietly going down to 2,166,600 (696 per 100,000) in 2015 and

2,068,800 (629 per 100,000) in the most recent World Prison Brief of December 2021. Although the actual number of people detained in the United States and China are about the same, it is presumed that since the US prison population began declining in 2008 a slightly larger number of people have been detained in Chinese jails and prisons than in the United States. There are 1,689,000 prisoners in China (119 per 100,000), 811,000 prisoners in Brazil (389 per 100,000), 478,000 in India (40 per 100,000), 471,000 in the Russian Federation (324 per 100,000), 309,000 in Thailand (411 per 100,000), 291,000 in Turkey (374 per 100,000), 266,000 in Indonesia (100 per 100,000), 220,000 in Mexico (169 per 100,000), 189,000 in Iran (228 per 100,000), and 165,000 in the Philippines (151 per 100,000). In 2016 Seychelles was reported to have a higher concentration of detainees than the United States, but is now 287 per 100,000. It is true, the United States has the highest prison population rate in the world.

1. China has received a lot of attention from the Human Rights Council lately. It is noted that World Prison Brief figures are for 1,689,000 sentenced prisoners only. Figures for pre-trial detention and other forms of detention are not available; more than 650,000 were so held in 2009, according to the Supreme People's Procuratorate. In addition, it is widely reported that more than a million Uyghur and other ethnic Muslims were detained by the police in vocational camps in Xinjiang province until 2019, but is now a part of the criminal statistic, and should have been excluded. The 650,000 or so held in pretrial detention in "jails" on the other should be included. With a total population of 1,418 million, China has the largest population of any country in the World Prison Brief, more than India with 1,373 million. To thank the World Prison Brief it is necessary use all zeros to multiply 2,300,000 prisoners times 100,000 residents divided by 1,418,000,000 total population equals the ratio of 162 detainees per 100,000 residents in China. The official World Prison Brief statistic of 1,689,000 prisoners (119 per 100,000) residents in China is ruled an underestimate and China in fact has a jail and prison population of 2,339,000 (162 prisoners per 100,000 residents).

2. World Prison Brief no longer publishes a state by state guide to United States jail and prison population, and is hereby commissioned to both do so and define prisoners as the total number of adults detained in a jail or prison at the time of the survey. ICE detention of 34,000 adult beds and an undisclosed number for unaccompanied minors is not an internationally comparable statistic. There were a total of 170,000 psychiatric beds in 2017, down from 550,000 in 1955. On any given day 60,000 juveniles are incarcerated in jails and prisons and 18,804 are held in residential treatment centers. 1,180 service members were detained in military prisons. Maybe 24 alleged international terrorists continue to be detained in Guantanamo. This comes to about 2.3 million slaves. OHCHR Assessment of human rights concerns in the Xinjiang Uyghur Autonomous Region, People's Republic of China of 31 August 2021 report indicates any justification for paid forced labor of poor Uyghurs and other predominantly Muslim minorities, about 20 percent of the population, vaguely suspected of being terrorists, beginning in 2016- 2019 has accomplished the goal of eliminating terrorism since 2017 and 1.9 million minorities emerged from poverty by 2018 and by 2019 has been terminated and remaining minority detainees are accounted for in regular criminal statistics. On 20 April 2022, the National People's Congress of China approved ratification of the Forced Labour Convention, 1930 (No. 29) and the Abolition of Forced Labour Convention, 1957 (No. 105). At the height of the Uyghar re-education 2016-2019, not including other re-education programs, immigration detention, adult and child psychiatric commitments, juvenile detention, probation or parole, it is estimated that there were 3.3 million slaves (260 per 100,000) in want of release in China.

3. The dated fact that the US incarcerated more people than anywhere else in the world was removed from the current American Bar Association Kennedy Commission publication, without informing the

public of the concealed fact, not discovered until now, although they have been successful at reducing their prison population to less than China, the United States continues to have the highest prison population rate in the world, on and off, and must be briefed to reduce their prison population to less than the arbitrary legal limit of 250 prisoners per 100,000 residents. The US Supreme Court first responded to the ABA Kennedy Commission Report in 2003 by holding legislative and litigate practice criminal sentences must be adjusted downward rather than upward, mandatory minimum schemes eliminated and acquittals the norm for most crimes where there are significant mitigating factors in *Washington v. Blakely* (2004). However, the US Sentencing Commission has not been abolished and the prohibited practice of mandatory minimum sentencing continues in contempt of the normal statutory maximum sentence. The Court rejected the petition to release all non-violent drug offenders in *United States v. Booker et al* (2005) President Biden has recently enforced for some. The most successful case has been the release of tens of thousands of detainees from prison in California with an indication for disability in *Brown, Governor of California v. Marciana and Plata et al* (2011).

B. State by State detention statistics were compiled by the International Centre for Prison Studies in 1999 and again in 2005. 2013 state by state statistics are from wikipedia, they include prisoners of all ages. In 1999 Washington DC, with 8,226 detainees and a population of about 600,000, had the highest rate of incarceration in the world of 1,594 detainees per 100,000 residents. By 2005 that rate is reported to have been reduced to 3,553 detainees (645 per 100,000 residents) and in 2014 to have gone down to 2,040 detainees (369 per 100,000 residents). Texas detains more people than any other state. Texas held 204,110 detainees (1,014 per 100,000) in 1999, increased to 223,195 (976 per 100,000) in 2005 before going down to 221,800 (836 per 100,000). In 1999 Louisiana held 44,934 detainees (1,025 per 100,000), in 2005 51,458 detainees (1,138 per 100,000), and in 2014 50,100 detainees (1,082 per 100,000 residents of all ages) the last remaining state or territory with a penal population over 1,000 detainees per 100,000 residents of all ages.

1. The Obama administration assailed what it says are unfair and unduly harsh sentences for many inmates, particularly minorities and nonviolent offenders. Black Americans were incarcerated in state prisons at an average rate of 5.1 times that of white Americans, and in some states that rate was 10 times or more. The US was 63.7 percent non-Hispanic white, 12.2 percent black, 8.7 percent Hispanic white and 0.4 percent Hispanic black, according to the 2010 census. In five states, the disparity rate was more than double the average. New Jersey had the highest, with a ratio of 12.2 black people to one white person in its prison system, followed by Wisconsin, Iowa, Minnesota and Vermont. Overall, Oklahoma had the highest rate of black people incarcerated with 2,625 black inmates people per 100,000 residents. Oklahoma is 7.7 percent black. Among black men in 11 states, at least 1 in 20 were in a state prison. Hawaii, which is 2.5 percent black, had the lowest incarceration rate among black people (585 per 100,000).

2. The Obama administration has helped to stop inexorable prison growth and after some reluctance to report by Trump administration, it is clear he has prevailed to induce stable reduction in prison overpopulation statistics, however racial disparities among prisoners persist. In the 25-29 age group, 8.1 percent of black men - about one in 13 - were behind bars, compared with 2.6 percent of Hispanic men and 1.1 percent of white men. It's not much different among women. In 2005 the female population in state or federal prison increased 2.6 percent, while the number of male inmates rose 1.9 percent. By year's end, 7 percent of all inmates were women. That percentage has increased to 9.3 percent of all inmates in 2013. The number of females incarcerated has increased from 55.6 detainees per 100,000 residents in 2000 to a high of 66 per 100,000 in 2006 before declining to 63.5 per 100,000

in 2010 and then increasing to 64.6 per 100,000 in 2013.

C. The United States is not currently party to the Second Optional Protocol to the International Covenant on Civil and Political Rights Aiming at the Abolition of the Death Penalty (1989), and should be. State by state crime statistics indicate murder by justice begets considerably more copycat killers than murder by heinous criminal. During 2004, more than 3,797 people were executed in 25 countries, including at least 3,400 in China. Additionally, more than 7,000 people were sentenced to death in 64 countries. Iran has the second highest number of executions, at least 159, followed by Vietnam with 64. The United States ranked fourth on the list with 59. The death penalty was abolished by the Supreme Court of the United States in *Furman v. Georgia* 408 U.S. 238 (1972). This decision however failed to sway the legislature and the deviant practice was begun again in 1976 and must again be abolished. Between 1976 and 2016 - 1,473 people were executed in the United States, 537 of them in Texas, in 2015 13 of 28 executions in the nation took place in Texas. During 2004, more than 3,797 people were executed in 25 countries, including at least 3,400 in China. Additionally, more than 7,000 people were sentenced to death in 64 countries. Iran has the second highest number of executions, at least 159, followed by Vietnam with 64. The United States ranked fourth on the list with 59. In adoption of Art. 6(5) of the International Covenant on Civil and Political Rights the executions of juvenile offenders were abolished in *Roper v. Simmons* (2005). *Sanchez-Llamas v. Oregon* (2006) recognized death row prisoners protected by the order of the International Court of Justice were subjected to extrajudicial killing/executed in contempt of *Lagrand Brothers v. USA* Judgment No. 104 IJC June 27, 2001 and *Avena and other Mexican National v. USA* Judgment No. 128 ICJ March 31, 2004.

1. For the Human Rights Council or any human rights advocate,, anywhere in the world, especially within the United States, to begin to correct the American legal system, it is first and foremost necessary to recommend the amendment of federal torture statute to comply with Arts. 2, 4 and 14 of the Convention against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment (1987) by repealing the phrase “outside the United States (altered in 2009)” from 18USC§2340A(a) and amend Exclusive Remedies at §2340B so: The legal system shall ensure that the victim of an act of torture obtains redress and has an enforceable right to fair and adequate compensation, including the means for as full rehabilitation as possible. In the event of the death of the victim as a result of an act of torture, their dependents shall be entitled to compensation pursuant to *Armed Activities on the Territory of the Congo (Democratic Republic of the Congo v. Uganda)* 1999-2022.

Part V Don't Pandemic Treaty

Sec. 25 Preamble

Acknowledging the gold standard for the diagnosis and treatment of coronavirus colds is hydrocortisone, eucalyptus, lavender, peppermint or salt helps water cure coronavirus allergic rhinitis.

Advertising that mentholiptus cough drops (containing eucalyptus) cure both the persistent wet cough of influenza and severe acute respiratory syndrome (SARS) from coronavirus.

Submerging the head in water, especially saline and chlorine water, instantly cures coronavirus colds.

Prescribing mentholiptus cough drops or echinacea pills cures severe acute respiratory syndrome (SARS).

Prescribing Echinacea to cure Respiratory Syncytial Virus (RSV) and triple threat of RSV, SARS-CoV-2 and Flu

Resolving to cure coronavirus while cleaning surfaces and floors with Lysol.

Buying eucalyptus scented humidifiers to sterilize public airspaces in schools and hospitals.

Grieving an estimated 598 million confirmed cases and 6.4 million deaths from COVID-19 worldwide and 93.7 million confirmed cases and 1.04 million death in the United States, more than any other nation as of August 25, 2022.

Recognizing the World Health Organization (WHO) has declared the official name of the coronavirus disease as COVID-19, and named the virus severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2).

Redressing the retaliation of the WHO against effectively treating the coronavirus by means of unleashing a novel monkeypox pandemic, prescribe poultices seeped in purple pitcher plant to cure monkeypox, smallpox, poxyvirus, pappillomavirus and related carcinomas.

Condemning the fact that the official differential diagnosis and symptoms are intentionally flawed so that people do not “nose to diagnosis” coronavirus instantly, perpetuating the myth of the asymptomatic patient, deceptively advertise patently inaccurate diagnostic PCR tests, that are unable to distinguish coronavirus and flu, and subsidize production of deceptive vaccines, that cure in two weeks for an instant, while useful to prevent severe illness and death in clinical and hospital admissions not so used, these official measures do not generate the herd immunity that is needed for the human race to end the deadliest coronavirus pandemic in history and deadliest pandemic in US history – a snuff flick.

Fearing more the consequences to self and others of not being heeded, more than being beheaded, preach the gospel truth that baptism cures coronavirus colds the instant the head is submerged in water (John 1: 26)(Luke 3: 7)(1 Peter 3: 21)(Mark 6: 24).

Believing hydrocortisone, eucalyptus, echinacea, lavender, peppermint or salt helps water cure coronavirus colds and severe acute respiratory syndrome (SARS).

Have agreed to the following.

Sec. 26 Art. 1 Diagnosis

A. Know to diagnosis coronavirus infection in self and others by the nose. The nostrils immediately become inflamed when exposed to airborne coronavirus. Inflamed nostrils indicate a contagious state whereby anyone within about two meters is or will be certain to get infected. These nasal symptoms traditionally indicate either a viral cold, or if it lasts more than a week, allergic rhinitis. Allergic rhinitis can be caused by caused by contagious viruses or environmental mold allergies, that are not time limited like rhinovirus. Coronavirus is a cold virus that descends to the lungs after a few days and is not time-limited. Untreated severe acute respiratory syndrome (SARS) patients die before the infection becomes a chronic disease after six months. Most people recover from minor infections in

isolation after sweating, washing or sleeping.

1. Coronavirus is virtually the only cold virus circulating these days and is likely to co-infect any other respiratory infection. The differential diagnosis is with influenza, rhinovirus, adenovirus, respiratory syncytial infection, pertussis and pneumonia. Coronavirus is the only cold with effective treatment. Influenza is diagnosed by persistent wet cough, that leads to fever and fatigue, if untreated, flu does not infect the nose. During the pandemic, any influenza, cough or sneeze, for any reason, is likely to concurrently spread coronavirus. Menthololypus cough drops, that contain essential oils of eucalyptus, are cheap, tasty and cure both influenza and coronavirus. Neither influenza or COVID vaccines are effective. Pertussis causes a week of extremely runny nose, that can sometimes be cured with antibiotics, before it descends to the lungs for six weeks of whooping cough. Pneumonia causes a dry cough, ear infection and meningitis, Ampicillin for Azythromycin resistance, is avoided with highly effective Pneumovax inoculation.

2. The asymptomatic patient is a myth, there is no incubation period, the instant the nose becomes inflamed the patient is contagious and the instant the discomfort in the nose is gone the patient is healed and is not infective. There is contagious unease whenever there is any coronavirus related nasal discomfort whatsoever. The problem is that health care professionals are infected the entire time they are working with a contagious nose and, without necessarily possessing any curative medicine, are trying to triage themselves and patients to prioritize the admission of potentially deadly severe acute respiratory syndrome (SARS).

B. Currently there are two types of diagnostic tests – molecular (RT-PCR) tests that detect the virus's genetic material, and antigen tests that detect specific proteins on the surface of the virus. Samples are typically collected with a nasal or throat swab, or saliva collected by spitting into a tube. PCR tests have been cited for being unable to distinguish between coronavirus and influenza, that will both cause a positive result. Antibody tests should not be used to diagnose an active coronavirus infection, they are useful at identifying new genetic strains, tracked by the news media. There is a margin of error in testing. There is a high risk positive tests result from being transiently infected by patients and staff at a testing center. No one knows coronavirus like the nose.

Sec. 27 Art. 2 Water

Washing the nose and face with water is necessary to activate any curative coronavirus treatment. Submerging the head in water instantly cures coronavirus allergic rhinitis. This is however rarely convenient. Standing water should not be excessively infected with coronavirus. Water is not adequate cleaning solvent, although it is often enough to redress minor environmental contagiousness. The bath water does not need to be particularly clean, saline, mineral or chlorine to be effective. All pollution is anathema, human waste inflames the nostrils almost exactly like coronavirus. Mineral, saline and chlorine water is particularly helpful for curing obstinate or serious infections and sterilizing surfaces, however Lysol aromatherapy is so curative of the hygienist and anyone within two meters, no other water based cleanser has been approved by the FDA to advertise it kills coronavirus. It is interesting to note that an Epsom salt bath, saline or chlorine swim cures topical and musculoskeletal methicillin resistant *Staphylococcus aureus* (MRSA) that cannot be cured with water alone. Swimming in a saline or chlorine pool is the ideal cure for COVID and MRSA. For COVID the most important thing is that the head is submerged so that the hair is cleaned and the nostrils are completely filled with water. Showers are less effective because the nostrils are not instantly cured when they fill with water,

but usually do the trick, especially with medicated soaps. Although washing the face and nose greatly reduces contagiousness, merely washing the nose and face with medicated soap usually takes two tries to completely cure.

Sec. 28 Art. 3 Essential oils of eucalyptus, lavender or mint aromatherapy

A. Essential oils of eucalyptus, lavender and peppermint have long been known to cure allergic rhinitis. They are all effective against coronavirus and common mold allergens. Eucalyptus and lavender cure influenza. A drop is topically applied with the index finger to the exterior of the nose and upper lip. Although relieving, topical essential oils and sprays are not usually effective until washed off with water and intentionally spraying the nose and face can irritate the nostrils. Menthol is a common medicinal ingredient made from mint that cure coronavirus. Menthol flavored cigarettes are a highly effective preventive and curative treatment for coronavirus, more due to the habitual nature of consumption than potency. Essential oils of eucalyptus, lavender and mint are essential ingredients in oral medicines, teas, soaps, cleaners, candles targeting coronavirus.

1. Eucalyptus scented humidifiers are probably the highest level of technology that is needed to end the coronavirus pandemic. Public airspaces, like schools, hospitals and indoor parties require eucalyptus scented humidifiers, also known diffusers, to be deployed to prevent and respond to coronavirus and influenza pandemics. As noted, water is highly effective at treating coronavirus although water alone does not kill coronavirus. Humidifiers alone have been determined to be 50 percent effective at eliminating coronavirus. Air purifiers have been noted by astute observers to make air quality worse, so that the nose is definitely slightly irritated, air filters are unlikely to completely screen viruses and the contaminated device is thought to actually spread the virus. Eucalyptus aromatherapy is curative of both coronavirus and influenza. Eucalyptus scented humidifiers were a widely used home-remedy in the 1950s. Essential oil of eucalyptus scented humidifiers are a must for local institutions.

Sec. 29 Art. 4 Eucalyptus and Echinacea products

A. The active ingredient of Lysol is eucalyptol, an essential oil of eucalyptus. Although the EPA produced a long list of cleansers, mostly containing deadly ammonia, it omitted Lysol, and is held responsible for the deaths of school custodians. The reason Lysol is the only cleanser approved by the FDA to kill coronavirus is because it works. The Eucalyptol solution not only kills environmental coronavirus, the aromatherapy cures the hygienist and everyone within two meters. Lysol disinfectant sprays cures environmental coronavirus, but the aerosol irritates the nose, and spraying the bed or worse cat-bed can cause back ache and potentially kidney failure and death. Lysol detergent is highly effective for cleaning clothes and bedspreads. Water soluble Lysol disinfectant is the most highly recommended formula for mopping and cleaning surfaces with a spray bottle. The trick to being cured by Lysol, is not to intentionally spray oneself in the nose and face because this irritates the nostrils, the cleaning spray or mop water must be used as directed to be healed by the aromatherapy.

1. Mentholiptus cough drops cure both coronavirus and influenza. Mentholiptus cough drops are cheap, tasty, readily available and highly effective at curing coronavirus. Mentholiptus cough drops are best at preventing, treating and curing severe acute respiratory syndrome. One must wash their nose with water after consuming a mentholiptus cough drop to cure coronavirus allergic rhinitis, with significantly better effect than water alone. It is vital to make sure the mentholiptus cough drop

preparation actually contains eucalyptus. The medicinal ingredient in the basic formula is menthol, made from mint. Eucalyptus adds to the cool-refreshing mint flavor. Menthol cures coronavirus but doesn't cure influenza. Eucalyptus is the most effective herbal remedy for both coronavirus and influenza. A mentholyptus cough drop is a highly effective remedy for both the wet cough of influenza and fluid fill lungs of coronavirus. A mentholyptus cough drop may cause some coughing because it stimulates salivation, but this should not impair the cure more than a few minutes. Wash the nose after consuming a mentholyptus cough drop to completely eliminate the coronavirus contagion.

B. Echinacea is the key ingredient in a number of herbal respiratory health preparations. Echinacea has been proven in numerous scientific studies to cure influenza, coronavirus and respiratory syncytial virus. Only a small quantity of echinacea is needed, a couple of purple cone-flower petals is sufficient for a dose. Echinacea pills and tea have been known to rescue coronavirus patients near death from fluid filled lungs, and enable them to make a complete recovery, as well as cure common coronavirus allergic rhinitis. The tea is tasty but a little hard on the digestion.

Sec. 30 Art. 5 Corticosteroids

A. Corticosteroids are the definitive medical treatment for coronavirus and mold allergies. For Severe Acute Respiratory Syndrome (SARS), a coronavirus, the treatment with no fatalities was to ventilate the patient and medicate with the antibiotic levofloxacin (Levaquin), and corticosteroids methylprednisolone IV and then prednisone. People on daily high dose corticosteroids, such as transplant patients, are completely oblivious to coronavirus allergic rhinitis, to the point where they have never experienced the symptoms and have social phobia. Cushing's disease is a non-life threatening side-effect of excessive life-saving corticosteroid use, its symptoms are fragile bones and puffy cheeks, and may be a lead culprit in the high rates of total knee and hip replacement surgeries in industrialized nations. The non-prescription of corticosteroid inhalers to first time asthma patients, to push dangerously ineffective salbuterol, is certain to be a leading cause of the dramatic rise in asthma and allergy patients over the past few decades. However, even curative nebulizing inhalers and nasal sprays are irritating in their own right.

1. Hydrocortisone crème is a corticosteroid that is accessible over-the-counter, for as little as a dollar a tube. When a dab is applied topically to the exterior of the nose, hydrocortisone creme instantly cures coronavirus and allergic rhinitis due to mold. Two dabs of hydrocortisone crème can also be applied to the chest to treat both severe acute respiratory syndrome (SARS) from coronavirus and the carcinogenic lung nodules of pulmonary aspergillosis. The dose of corticosteroid in hydrocortisone crème is much lower than other corticosteroid preparations and should be below the threshold of Cushing's disease, however it has the potential to cause Cushing's disease and should not be chronically used. When misused to treat a disorder that it does not cure, other than coronavirus or aspergillosis, hydrocortisone invariably causes mild Cushing's disease.

2. It is held that hydrocortisone crème is a safer allergy and asthma medicine than higher dose inhaled, intranasal or oral corticosteroids, hydrocortisone is reliable and available over-the-counter. Corticosteroid inhalers and intranasal preparation are curative, but may dangerously irritate the lungs and nose. Nonetheless, because corticosteroids inhalers both cure coronavirus and neutralize ozone with their fluorocarbon propellants, corticosteroid inhalers must be exempted from the 1987 Montreal Protocol on Substances that Deplete the Ozone Layer, and 1990 London Amendment, 1992 Copenhagen Amendment, 1997 Montreal Amendment, 1999 Beijing Amendment, and 2016 Kigali

Amendment thereto, by the Ozone Secretariat.

Sec. 31 Art. 6 Drug Resistance Propaganda

A. It is though to be wise for the public to know the conventional medical response to certain epidemics, other than coronavirus, that is treated in the other articles of this treaty, because the World Health Organization vaccine development response to influenza and coronavirus outbreaks, is incompetent, has been wildly contagious, incurring significant, unnecessary morbidity and mortality, acutely noted in the coronavirus pandemic and corrupts the domestic public health service.

1. Several comprehensive studies have proven the flu vaccine to be only about 5 percent effective during certain outbreaks and for all intents and purposes doesn't work at all. The right response to the persistent wet cough caused by influenza is to take a mentholyptus cough drop. Provided it contains eucalyptus flavoring, a mentholyptus cough drop almost always instantly cures influenza. Mentholyptus cough drops are therefore the frontline treatment for influenza pandemics. Prescription of Oseltamivir (Tamiflu), Zanamivir (Relenza) and Amantadine (Symmetrel) are also highly effective at curing influenza.
2. The safe and effective treatment for tardive dyskinesia (TD), a potentially lethal facial tic, also known as the extra-pyramidal side-effect of antipsychotic drugs, is Cogentin (Benztropine mesylate). One dose of Cogentin cures the Parkinsonian facial tic, and the patient can continue to take the antipsychotic medicine without life-threatening side effect. Antipsychotic drugs have been cruelly designed to cause TD with one regular dose if the patient is not gradually weaned up to the regular dose. It is important to note that Amantadine (Symmetrel) does not work to cure TD as indicated by the FDA monograph. Cogentin is back on the market after being temporarily recalled for several deadly years, by its manufacturer.
3. Tuberculosis treatment became effective with the invention of the antibiotic streptomycin in 1946 and tuberculosis drug isoniazid (INH) in the 1950s. Nine months of the combination of INH and rifampin chemotherapy will result in roughly 95% cure rates. Therapy with INH, rifampin and ethambutol helps avoid the complication of drug resistance with non-tubercular mycobacterial disease. The addition of pyrazinamide can reduce treatment time to six months, but is toxic.
4. Antibiotic resistance claims in the news media and medical literature, frequently require qualification that certain reliable antibiotics have been tried in unadulterated form, and proven ineffective. Epsom salt bath, saline or chlorine swim sterilizes topical and musculoskeletal methicillin resistant *Staphylococcus aureus* (MRSA) infection. Doxycycline cures gastrointestinal MRSA, bubonic plague, Lyme disease (a leading cause of MS and ALS). It may take a few days to a week for the MRSA lesion(s) to completely subside. Doxycycline requires yoghurt to prevent gastrointestinal disturbance and may lead to antibiotic associated colitis caused by *Clostridium difficile*. Metronidazole treats antibiotic resistant *Clostridium difficile*, *Giardia lamblia*, the most common water-borne parasite in the Americas, and a host of other gastrointestinal infections other than MRSA. One should use a Sawyer mini 0.1 micron water filter or fresh home water filter, when suffering chronic diarrhea or drinking natural surface water. Pneumovax is said to be 80 percent effective at curing and preventing pulmonary and meningeal pneumonia for five to ten years, otherwise, Ampicillin, Amoxycillin or Penicillin is needed to treat Azithromycin resistant pneumonia.

5. The behavioral and psychological symptoms of dementia are irritability, agitation, aggression, hallucinations, delusions, wandering, disinhibition, anxiety, and depression. The madness poison has been identified as Dimethoxymethylamphetamine (DOM), or STP, it causes a three day panic attack without sleep, followed by a six month recovery from severe mental illness, if the delusional thoughts from the topical poison are not washed off with water. Antidepressant withdrawal can be dangerous. Pseudo-ephedrine and antidepressants makes a fine methamphetamine, and are collectively known as two bag meth. There are two drug abuse warnings regarding pseudo-ephedrine and stain drugs in regards to these Alzheimer's symptoms. One, pseudo-ephedrine like Claritin, Sudafed and Sudagest are indicated to treat viral and bacterial sinus infection, and are often used as speed by truck drivers, and postal workers, because they are a highly effective coronavirus cure, however pseudo-ephedrine dangerously shrinks the brain and makes a person, particularly a judge of law, functionally illiterate and if not taken at a reasonable hour causes maniacal insomnia. Pseudo-ephedrine is a key ingredient in fine coronavirus curing methamphetamine. Two, chronic opportunistic pneumococcal meningitis of the brain shrinking side effect results nearly instantly from statin drug consumption, unless the patient is vaccinated with Pneumovax. The brain is thought to take too long to heal from statin brain shrink for penicillin to prevent infuriating and delusional pneumococcal reinfection of the brain. Pneumovax must be required of all statin drug consumers, with a strong contraindication for Alzheimer's symptoms and impairment of mental faculties needed to throw away bad food and unwashable cardiotoxin contaminated fabrics, take antibiotics to treat or Pneumovax to prevent *Streptococcus pyogenes* and treat congestive heart failure caused by MRSA with doxycycline or Epsom salt bath sterilization followed by *Hawthorn*, the supreme herb for the heart, to eliminate lesions.

6. Purple Pitcher Plant (*Sarracenia purpurea*) poultice is reported to cure monkeypox, smallpox, other poxviruses, papovirus SV-40 and various herpes viruses, including papillomavirus and Epstein-Barr virus-associated carcinomas.

Sec. 32 Art. 7 COVID Office Opening Protocol

A. Well-paid volunteers, trained in COVID hygiene, diagnosis and treatment, and supplied with medical necessities, are needed to experimentally reopen federal offices to the public pursuant to 24USC§422(d)(1) and the Nuremberg Code “Permissible Medical Experiments” Trials of War Criminals before the Nuremberg Military Tribunals under Control Council Law No. 10. Nuremberg October 1946 – April 1949, Washington. U.S. Government Printing Office (n.d.), vol. 2., pp. 181-182. The gold standard for SARS-CoV-2 diagnosis and treatment is hydrocortisone, eucalyptus, lavender, peppermint or salt helps water cure coronavirus colds.

1. The usual precautions of sneeze guards, vaccinations and face masks should be abided by, but are neither sufficiently curative nor preventive of coronavirus infection to warrant office reopening without further information. The most important thing is that everyone must know that if they have allergic rhinitis they almost certainly have COVID. The nose is far more sensitive and responsible to emergency medical treatment than a COVID test. It is not particularly dangerous to have allergic rhinitis, but untreated it can be deadly when the lungs fill up with fluid in severe acute respiratory syndrome (SARS).

2. Hygiene involving frequent wiping down of all surfaces and mopping with Lysol is the most effective and successful, commonly used method for keeping public spaces tolerable in restaurants, bars and cafes. The aromatherapy is curative, when used as directed wiping down surfaces or

mopping, it is mildly toxic, and not very curative of coronavirus, to intentionally spray one's face with Lysol. The other effective method of environmental sterilization, that hasn't been widely used since the 1950s, is the eucalyptus scented humidifier. The eucalyptus scented humidifier, also known as a diffuser, has the advantage of being hands-free, and this is important in situations like offices, schools, and hospitals where people are often interact with people while distracted from constantly spritzing with Lysol. A eucalyptus scented humidifier provides both the water and eucalyptus that is needed to provide an environment that is curative of coronavirus.

3. Washing the nose and face is necessary to effect any coronavirus cure, whether the treatment is oral or topical. Submersing the head in water, especially saline or chlorine water, is instantly curative of coronavirus allergic rhinitis. Washing the nose and face with essential oil of eucalyptus, lavender or mint medicated soap is an effective treatment but often requires two applications to completely cure the nose. These medicated soaps help make showering a highly effective coronavirus cure. A dab of hydrocortisone creme to the nose cures coronavirus colds and two dabs of hydrocortisone creme to the chest cures severe acute respiratory syndrome (SARS). Hydrocortisone creme does not usually cause Cushing's disease when it is appropriately and curatively used, but can, and is not for habitual use. Mentholyptus cough drops or Echinacea pills are the safest and most effective treatments for SARS. For tobacco smokers menthol cigarettes, made from mint, are an effective remedy.

Sec. 33 Art. 9 Immunization

A. There are a number of COVID-19 vaccines that have been approved – Pfizer-BioNTech, Moderna, Johnson and Johnson's Janssen in the United States; Pfizer-BioNTech, Novavax, Moderna, Astra Zeneca and Janssen in the European Union. COVID-19 vaccines differ from the flu vaccine insofar that the COVID-19 vaccines do actually cure the coronavirus in about two weeks after vaccination and this does reduce severe illness and death in otherwise untreated patients, whereas flu vaccines don't work at all. Fatigue, coronary and thrombosis side-effect are so severe vaccination is not recommended for healthy individual, unless they are specifically having trouble treating coronavirus allergic rhinitis. A two week cure is woefully inadequate for the job of preventing the transmission of coronavirus, ending the global pandemic or truly protecting individuals from severe infection and death in the long run. The COVID-19 vaccines are falsely advertised as vaccines, although they have no pretense of preventing infection by immunity. Having made an effort to win herd immunity the proper advertisement of COVID-19 vaccines is that they are a two week cure that should be administered to un-boosted patients admitted to clinics and hospitals with cold and flu symptoms in conjunction with the other swifter remedies in this treaty upon the gold standard for COVID-19 diagnosis and treatment – hydrocortisone, eucalyptus, lavender, peppermint or salt helps water cure coronavirus colds.

1. A great deal of responsibility for the ongoing pandemic stems from the immunization of vaccine manufacturers being abused to unfairly censure the competition. In the course of preventing “secret” information lawfully within the control of governments and governmental agencies from being disclosed pursuant to the protection of undisclosed information under Sec. 7, Art. 39 of the Trade Related Aspects of Intellectual Property (TRIPS) agreement and Arts. 2(1), 12, 58, 93(1) and 100(1) is certain to be sued for effective protection against unfair competition and control of anti-competitive and dishonest practices, of such as nature as to cause confusion, false allegations, or misinformation, in contractual licenses as provided in Art. 10 *bis* of the Paris Convention for the Protection of Industrial Property (1967). To ensure the people heed the gold standard for coronavirus diagnosis and treatment – hydrocortisone, eucalyptus, lavender, peppermint or salt helps water cure coronavirus colds - it is

time for the United Nations to provide equal immunity with vaccines to prevent severe illness and death, to protect their practitioners against interference with family, honor, integrity, and correspondence or beheading pursuant to (Mark 6: 24), Art. 12 of the Universal Declaration of Human Rights, Vienna Convention on Consular Relations (1963), and Convention on the Privileges and Immunities of the United Nations (1946).

B. The Secretary-General of the United Nations, and Director-Generals of the World Health Organization and World Trade Organization shall equally be the depositary of the present Convention. The Arabic, Chinese, English, French, Russian and Spanish texts of the present Convention shall be equally authentic. A State Party may denounce the present Convention by written notification to the Secretary-General or Director-Generals. Any State Party may propose an amendment to the present Convention and submit it to the Secretary-General, or Director-Generals. Reservations incompatible with the object and purpose of the present Convention shall not be permitted, and may be withdrawn. The present Convention shall be open for signature by all States as of 27 January 2022 and shall enter into force after the thirtieth day after the deposit of its twentieth instrument of ratification.
