In the United States Customs Court

Palestine and Yemen Day HA-17-4-25

By Anthony J. Sanders
Hospitals & Asylums
Public Trustee applicant

Having failed to pay $1,000 per child tax credit support obligation to the families of all children legally residing in the United States on April 15, 2025, although it is cheaper to count all children, than most children, the $1,000 tax refund is enforceable, to pay more than a few children, and zero administrative costs, by any district, State or tribal government under 18USC§228(b, d, e) with the wherewithal to order Congress to strike all the text of the child tax credit after 26USC§24(a) pursuant to Sec. 1 overruling and repealing Secs. 2-5 of the of the 14th Amendment to the US Constitution and budgeting $76.9 billion for the $1,000 Child Tax Credit (2026). The US is liable for $483 million UN Compensation for their falsely associated Myanmar Nuclear Family Fault Offense to enforce the US 2,200 nuclear warhead limit. The US is liable for $18 million to pay $5,150 UN Compensation to an estimated 3,500 un-lawfully deported persons, at least $1.2 million for Venezuelans held in El Salvador Terrorist Confinement Facility. Pertussis-COVID superbug isolated in tortilla flour of dubious national origin under USMCA. Held, in the absence of any ability of the United States to pay, or hold federal office, for any (t)reason, the Suez Canal Authority (SCA), has limited liability for loss of life from starvation or personal injury from bombing, to sustain a UN Red Sea Food Program pursuant to the Convention on Limitation of Liability for Maritime Claims (LLMC) of 1996.

1. Belated Child Tax Credit 2025 Tort - $76.9 billion (2026)

Scott Bessent, Treasury Secretary, Attorney General Pam Bondi and the Internal Revenue Service (IRS) are believed to have collectively failed to agree to pay $1,000 per child support obligations to all 76.2 million children estimated to legally reside in the United States on Tax Day April 15, 2025 pursuant to 18USC§228(b), *Elon Musk, DOGE eX rel v. Scott Bessent, Treasury Secretary* HA-25-3-25.

The United States is therefore ordered to pay mandatory restitution, whether or not the tyrannical Republican Congress is able to pass An Act Sustaining the Child Tax Credit of 2025, at the top of the United States Atlas, 2025 HA-24-2-25 and Sec. 3,000 of An Act To Balance the Budget for the Fiscal Years ending October 1, 2017-25 HA-10-3-25 under §228(d).

$1,000 per child tax credit support obligation is enforceable by any district, State or tribal government in behalf of any child legally residing in the United States, regardless of their income, under §228(e) who has the wherewithal to order Congress to strike all the text of the child tax credit after 26USC§24(a) pursuant to Sec. 1 of the 14th Amendment overruling Secs. 2-5 of the US Constitution.

Because of the delay informing the public regarding the equal protection of the Child Tax Credit the exact amount of the 2025 Child Tax Credit is even more dubious than the exact number of children legally residing in the United States, 76.2 million, with lower numbers of about 74 million being circulated to sustain rejected birth certificates, welfare cuts and criticism of the high cost of elementary and secondary education, ostensibly the highest in the world.

It is therefore necessary to prosecute the gay Treasury Secretary for theft or bribery (or gay pay) of federal funds 18USC§666 whereas reducing child poverty in half with the CTC seems to be above gay Scott Bessent's adopted child's pay grade. Child Tax Credit costs are reported to be $19.4 billion (2017); $19.0 billion (2018); $28.9 billion (2019); $27.8 billion (2020); $79.0 billion (2021); $131.4 billion (2022); $29.1 billion (2023); $28.7 billion (2024); Sec. 6 An Act Sustaining the CTC of 2025.

The exact number of child beneficiaries and thieves who must disgorge any administrative fees the Internal Revenue Service (IRS) or Treasury agents might have stolen from the $1,000 CTC census of children, remains to incriminate the unaccountable Treasury Secretary regarding the Bureau of Fiscal

Service weaponization of his inability to pay the CTC, USAID, UN, IRS and many other civilian agencies, being admitted as the treason for his inability to hold any office in the United States 18USC§2381 accounted for by An Act To Balance the Budget for the Fiscal Years ending October 1, 2017-25 HA-10-3-25 and Treasury Department Budget Request Total FY 17 - FY 25.

Due to the tortious negligence of the Treasury Secretary to pay the CTC in a lawful or timely fashion, Congress may vote to legislate $76.2 billion to pay an estimated 76.2 million children (2025), or merely pay "belated child tax credit" support obligations on a family with children case by case basis, and legislate 0.8% child population growth to an estimated $76.9 billion for 76.9 million children (2026) in a new subsections 26USC§24(b), however (b)(1) stands, In all subsequent years, the Child Tax Credit appropriation shall be $1,000 per child legally residing in the United States that year.'

'(b) To pay for the 2025 child tax credit a balance of $76,900,000,000 is made available for fiscal year 2025. This estimate is based upon best available estimates of the under age 18 population times $1,000 and the fact the IRS will not charge the tax credit any administrative costs. Any money that is not spent on the Child Tax Credit for every child, shall be returned to the General Fund at the end of the fiscal year. If there is not enough money to pay the families of all the children legally residing in the United States, the IRS shall pass a supplemental budget appropriation indicating the exact IRS estimate of the under age 18 population to compare with best available Census data.

Tort case work sustaining the "belated child tax credit" is very similar to that required to issue "belated birth certificate" Sec. 4 An Act Sustaining the Child Tax Credit: (a) Census net overestimate of 1,932,847 (2000-2020) as adjusted by *Annual Estimates of the Resident Population for the United States, Regions, States, District of Columbia, and Puerto Rico: April 1, 2020, to July 1, 2024* totals, is nearly exactly equal to the 1,927,000 birth certificates estimated to have been unlawfully rejected using the notoriously conservative 4 million birthmark method.

(b) It is the sense of Congress that the Social Security Administration (SSA) is obligated to index "belated birth certificate social security numbers" by state of birth, with a special indication to recount births to include belated birth certificates, archived by year of birth. SSA is also obligated to recount most popular baby name for the historical record. State Vital Statistics Offices and Birth Certificate Registries are obligated to issue "belated birth certificates" by year of birth and archive them properly pursuant to Art. 7 Convention on the Rights of the Child (1990).

(c) Belated birth certificates are protected by the US Constitution against any ex post facto laws that might opportunistically abridge the American tradition of birthright citizenship, when intellectually challenged to redress a malicious rejection of birth certificates and social security numbers since 2008, pursuant to Convention Relating to the Status of Refugees (1951), Convention Relating to the Status of Stateless Persons (1954), Convention on the Reduction of Statelessness (1961), and Convention on the Protection of All Migrant Workers and Members of Their Families (1990).

2. Myanmar Nuclear Family Fault Offense - $483 million UN Compensation

A fine and/or imprisonment up to six months is recommended for Trump's first (nuclear fault family) offense at §228(c)(1). Pam Bondi, Attorney General and Scott Bessent, Treasury Secretary, are jointly accused of infecting the phones of any of the impoverished $1,000 Child Tax Credit winners and Ms. Bondi's phone privilege with cellular zombie Desktop surveillance with remote security panel access,

often abused in Domestic Relations Courts who rarely email the US District Attorney computer consultant, when she visited the White House, resulting in the nuking of Myanmar, in contempt of reporting compliance with the 2,200 nuclear warhead limit. The US nuclear arsenal is the only such national nuclear arsenal, that has ever been intentionally used for willful killing, whether overtly or covertly. Failure to credibly report compliance with the 2,200 nuclear warhead limit disqualifies any legal defenses the United States might have regarding their nuclear arsenal being held responsible for any catastrophic earthquake in the world, pursuant to the prohibition on assisting nuclear proliferation through provision of assistance under 22USC§6303 and Compensation Chapter 14 of the United Nations Atlas, 2024 HA-9-12-24.

The Myanmar earthquake directly killed up to 5,350 people in Myanmar and 51 in Thailand, while one person died from shock in Vietnam. Up to 7,860 people were injured and hundreds more were reported missing. More than 8,300 homes and pagodas were destroyed by the quake. The China Earthquake Administration recorded the earthquake at 7.9 on the surface-wave magnitude. At $5,150 per death and injury, plus $50,000 per building economic damage is estimated $68,031,500 casualty, $415,000,000 property, for a total of $483,031,500 UN Compensation owed by the United States for Trump's first nuclear fault offense. If the United States does not agree to pay Myanmar quake victims a total of $483 million UN Compensation, in addition to any humanitarian or emergency assistance, this sum will be included in the $250 billion UN Compensation the United States is assessed to owe $162 billion for Biden's nuclear fault, $100 billion for the 2010 Haiti quake, and $88 billion Iraq residual.

The United States of America owes $250 billion UN Compensation bail to treat earthquake victims and compliance with the US 2,200 nuclear warhead limit equally with overt war crimes since 2003 18USC§2441. $100 billion Russian assets are owed to Ukraine. Israel owes Palestine <$50 billion, for which the United States offers an interest free $50 billion loan from the General Fund balance in Sec. 30 of An Act To Balance the Budget for the Fiscal Years ending October 1, 2017-25 HA-10-3-25 as provided for in Chapter 14 Compensation of the United Nations Atlas, 2024 HA-9-12-24.

3. Deportations - $18 million UN Compensation plus costs

Donald J. Trump, President of the United States, is fined at least $18,025,000, plus foreign attorney and administrative costs, to pay $5,150 UN Compensation for an estimated 3,500 deportations. The 233 innocent Venezuelans, deported by false Tren de Aragua membership accusation, to the custody of the El Salvador Terrorist Confinement Facility are collectively due to $1,199,950 to secure their release. It is necessary to safely release the innocent trafficking victims with enough money, legal representation and guidance to avoid cannibalism and extortion on their way home, and prohibit any further seizure, detention, transportation or sale of slaves 18USC§1585, or unlawful conduct with respect to immigration documents 18USC§1597, *United States v. The Amistad* 40 US 518 (1841), *Trump v. J.G.G.* 604 US __ (2025) and *Executive Office of Immigration Review v. Office of Alien Property: In refouler* HA-4-4-25.

Property plus $5,150 (2025) UN Compensation for forced relocation is needed to reintegrate fully or partially refoulered deported persons under Arts. 3 and 14 of the Convention against Torture, Cruel, Inhuman and Degrading Treatment or Punishment (1987) and Hospitalization of mentally ill nationals returned from foreign countries, Reception of eligible persons at ports of entry or debarkation 24USC§322. Hospitalization of mentally ill nationals returned from foreign countries performance is evaluated by the release the innocent person in 48 hours or contract for judicial review within 5

working days under 24USC§326 - Form I-863 Notice of Referral to the Immigration Judge. In no circumstances should persons be trafficked outside of the district in which they were arrested without the authorization of a US District judge pursuant to Rule 4 Fed. Crim. P. and *Trump v. J.G.G.* (2025).

4. Ole Mexican v. Center for Disease Control In re: Atlanta, Georgia

I contracted the new COVID/pertussis superbug from what I believe to be Ole Extreme Wellness Tortillas purchased at a Dollar General in New Mexico, where the Mission tortilla shelf was conspicuously empty. After throwing away the remaining tortillas I am pretty much recovered. The previous week I had been very happy with Ole tortilla. Now neither I, nor the Gospel Mission free lunch serve tortillas or bottled hot sauce at all. I have had only one other adverse experience with California habanero sauce made in the USA. Imports are bad in proportion to the refouler of deported persons to the country that does not make export grade, and it is necessary to inform consumers to Buy American Provisions 24USC§225h. The Mayor may be the most useful office for food service companies to either neutralize the possibility of irregular federal CDC COVID leak in this case, or destroy all the poisoned imported food on the shelves in their town pursuant to Buy American Provision 24USC§225h(a).

The nation's supply of un-pertussis contaminated tortilla flour may have been contaminated by Ukraine wheat, or the same CDC laboratory Ole might use for testing in their common ground of Atlanta, Georgia, incidental to Article 3.A.4 of USMCA Grain 2. No Party shall require that a country of origin statement be issued on a quality grade certificate for originating wheat imported from the territory of the other Party, recognizing that phytosanitary or customs requirements may require such a statement. USMCA is in error to intentionally affix a label bearing a “Made in America” inscription, or any inscription with the same meaning, to any product sold in or shipped to the United States that is not made in the United States under 24USC§225h(f). Trump is grain regulations weakest link.

Wash dry nose. Eucalyptus cures coronavirus and influenza. Pneumovax (10 year streptococcus cure and prevention) and Pertussis vaccine (not so effective in snot nosed children) but might be equal to treatment with antibiotics to limit the un-reinfected runny nose to one week and prevent 6 weeks of whooping cough, vaccination is needed for food service personnel worldwide. Food service workers with untreatable allergic dry nose, runny nose, cough or sneezing symptoms need paid sick leave. Not to go out like "one snot" Yucateco habanero sauce, because the infectious employees obviously work too much, eat the product (and other contaminated imports), the epidemic won't be cured until the both pertussis contaminated flour, of dubious country of origin (Ukraine?), is destroyed and replaced with good flour and COVID infected workers are quarantined with paid sick leave, until completely recovered pursuant to the Food, Drug and Cosmetic Act FDCA 21USC§342 and §381 *In refouler: Jumex, Yucateco, Indian basmati rice imports et al* HA-7-4-25.

Cafe coffee has become one of several common causes of Hashimoto thyroiditis, sore throat caused by Epstein Barr virus, *Streptococcus pyogenes*, wax paper, green tomatoes and other nightshades. The green tomatoes are often accompanied with rat poop, with disabling to deadly consequence for too much rodent poop consumption, ie. Extinction of the Tasmanian devil due to facial tumor. I hope to leave the autism spectrum with a diagnosis of rat poison exposure. Rat urine in the hair causes hip pain, the hair must be quickly washed off, before the poison sinks in. Rat poop causes encephalitis and mild back pain. Hantavirus pneumonia has a 48% mortality rate in New Mexico, but seems to only test positive in the most chronic cases of rat infestation, perhaps incidental to the inhalation of a large

quantity of aerosolized urine and feces contaminated particulate matter. Rat poison causes intestinal bleeding that is sensed as an unusual slimy rectum and black stool. The most effective strategy for swiftly eliminating rats is to seal the warehouse so rats cannot enter. Rats are extraordinarily attracted to human food and will spoil anything exposed, they also maliciously pee in the hair of sleeping persons, the poop is more incidental to eating a lot. Rat traps and other non-toxic methods of capture and killing or relocation are preferred to introducing human rat poison into the etiology. In the US there live mostly the small Norwegian rat and the large wood rat, who thrives eating all the feces of one human, ie. New York City. In Texas feral pigs are hunted like rats. Bears market the odor proof bag in 8. Rats *Executive Office of Immigration Review v. Office of Alien Property: In refouler* HA-4-4-25.

5. Palestine and Yemen

A Treaty of Peace between the United States of America and Yemen

It is resolved for the United Nations to withhold a reasonable money toll for commercial shipping to pass the Gates of Grief, between Yemen and Djibouti, to help pay for the cost of the United States and United Kingdom to feed the hungry people in the region, until such a time the self-determinate regional food program costs less than the toll.

Wherefore, after a friendly fire prior, the USS Truman recently caused civilian casualties bombing in retaliation against the ruling Houthi tribal alliance for their piracy advertising the Palestinian cause, but unlawfully detaining three UN employees, while the United States and Israel confusedly sanction Hamas at the expense of Palestine, UN membership application;

Whereas, both Palestine and Yemen are reported to be afflicted by the unusual condition of famine, as deadly as in Ethiopia and North Korea in recent history, and Palestine and Yemen spells PAY, it is painfully obvious these people, suffering from night terrors, like President Trump, after his ear piercing, are so extremely keen on establishing a safe and effective system to supply free food and humanitarian assistance to a very demanding people, sufficient free food is likely to win the peace;

Whereby, it is in the national interest of the United States for the Department of Justice (DOJ) to convince the US Department of Agriculture (USDA) to finance US Agency for International Development (USAID) to feed Palestine and Yemen (PAY).

Article 1 Palestine

The Assembly adopted the resolution titled “Admission of new Members to the United Nations A/ES-10/L.30/Rev.1 by a recorded vote of 143 in favor to 9 against (Argentina, Czech Republic, Hungary, Israel, Federated States of Micronesia, Nauru, Palau, Papua New Guinea, United States), with 25 abstentions. By its terms, it determined that the State of Palestine is qualified for membership in the United Nations in accordance with Article 4 of the Charter of the United Nations and should, therefore, be admitted to membership in the Organization. Annex (l), “The State of Palestine, in its capacity as an observer State, does not have the right to vote in the General Assembly or to put forward its candidature to United Nations organs” must be deleted to provide for an informed vote on Palestine membership. Otherwise, the UN Assembly must be held in contempt of Legal Consequences of the Construction of a Wall in the Occupied Palestinian Territory (2004) obligation...establishment of a

Palestinian State.

Article 2 Red Sea Food Program

Landlocked Palestine and Ethiopia, must be insured against famine, on an equal basis with Djibouti, Egypt, Eritria, Saudi Arabia, Somalia, Sudan Djibouti, and Yemen, by tolls imposed on the passage of commercial shipping through the Red Sea. Currently only Palestine and Sudan are reporting acute famine conditions that require the delivery of large quantities of humanitarian assistance of food, water, medicine and fuel to alleviate. It is hoped the United Nations (UN) will quickly alleviate these famines and establish a regular Red Sea Food Program with a percentage of the toll on the Gates of Grief to be collected by the Suez Canal Authority (SCA).

The Red Sea is a vital shipping route, handling approximately 12-15% of global trade. Prior to recent disruptions by Houthi attacks, it facilitated around 30% of global container traffic. Suez Canal tolls are determined by vessel type, size, and other factors, with container ships potentially paying between $400,000 and $700,000 per transit. The Suez Canal Authority (SCA) calculates tolls based on SDR units and offers rebates for long-haul trips. The Gates of Grief between Yemen and Djibouti command equal respect.

Article 3 Limited Liability of the Suez Canal Authority

To ensure appropriate action is taken against persons committing unlawful acts against ships including the seizure of ships by force; acts of violence against persons on board ships; and the placing of devices on board a ship which are likely to destroy or damage it in violation of the Convention for the Suppression of Unlawful Acts Against the Safety of Maritime Navigation (1992). It is held by vote of the International Maritime Organization (IMO), the SCA as the Red Sea toll collector, has limited liability for loss of life from starvation or personal injury from bombing in the Red Sea area, dedicated to feeding the disproportionately starving people in that United Nations (UN) Red Sea Food Program vicinity pursuant to the Convention on Limitation of Liability for Maritime Claims (LLMC) of 1996.

The 2005 LLMC Protocol raised the limit of liability for claims for loss of life or personal injury on ships not exceeding 2,000 gross tonnage is 3.02 million SDR (up from 2 million SDR). For larger ships, the following additional amounts are used in calculating the limitation amount: For each ton from 2,001 to 30,000 tons, 1,208 SDR (up from 800 SDR). For each ton from 30,001 to 70,000 tons, 906 SDR (up from 600 SDR). For each ton in excess of 70,000, 604 SDR (up from 400 SDR). The limit of liability for property claims or ships not exceeding 2,000 gross tonnage is 1.51 million SDR (up from 1 million SDR). For larger ships, the following additional amounts are used in calculating the limitation amount: For each ton from 2,001 to 30,000 tons, 604 SDR (up from 400 SDR) For each ton from 30,001 to 70,000 tons, 453 SDR (up from 300 SDR). For each ton in excess of 70,000 tons, 302 SDR (up from 200 SDR). $1.39 SDR per US Dollar (2025).
